city. The amount they received would be the same as if they had received it here. None of the men could be compelled to follow this course, however, and the idea could not be adopted unless all or a large majority of the men agreed to it. In any event the men would each be paid \$33 on their arrival in port here.

There is much interest in the question here and the sentiment among the large business men, city officials and the best peopie generally is that the volunteers ought not to be mustered out here. Their reason for this is that if the men are paid off here a large part of the money will be spent in a dissolute way, without helping legitimate business, and a large number of the men, getting rid of their money, will remain here on the coast and by increasing the number of laborers here cause a reduction in wages that is not desirable. The leaders of the labor organizations also take this view of the case and would like to see the men go to their own states to be mustered

out General Shafter today bestowed much praise on the Nebraska troops and said it was a pity that a regiment with such a record could not go home intact, but he had no idea that the men would vote to be mustered out in Nebraska, on account of the difference in the amount of pay each F. A. HARRISON. would receive.

DEAD IN COUNTRY'S SERVICE

Complete List of Fatalities in Philip pines Contains Names of 736 Officers and Men.

SEATTLE, Wash., July 28 .- The Times prints this afternoon what purports to be a full list of fatalities in the American army in the Philippines up to June 2. The list was furnished by Fred F. Eitell, a representative of the Manila Freedom, who claims to have obtained it from the records of the surgeon general's office at Manila.

total number of fatalities is 736twenty-three officers, 699 privates and fourteen civilians attached to the army. A remarkable feature of the record is found in the statement that the number of officers killed in battle is out of all proportion to the number of privates killed. On the other hand fewer officers died from disease propor tionately than privates. Out of the twentythree officers dead sixteen were killed in ac tion, two were drowned and five died of discase, as follows: Typhoid, 1; meningitis, 2; rhoumatism of the heart, 1; paralysis, 1.

Of the 699 privates 294 died of wounds received 12 action, nine were killed accidentally, twenty-three were drowned and seven committed suicide. One hundred and six died of typhoid fever, eighty-nine of smallpox, forty-seven of dysentery, twenty-eight of pneumonia, nineteen of malarial fever, and fourteen of meningitis. The remaining sev enteen died from various diseases.

Of the fourteen deaths among civilians seven were from smallpox and three from gunshot wounds received in action.
