The market opened 15c lower and though sellers were rather backward about making the concession they had to give in to the in-ovitable and the most of the hogs sold early at the decline noted.' The majority brought \$4174;694.20, with a few light loads at \$4.25. The close, if anything, was a little stronger than the early market. So far as can be judged from appearances there was no cause for the break in the provision market aside from the yellow fever scare in Virginia, which was taken advantage of by the bears to force values downward. What these reports amount to can be learned from the table of average prices at head of column that today's break wipes out a good share of the advance gained in the last two weeks. In fact the hogs sold today in very nearly the same not. As Sh Pr. No. As Sh Pr.
