Windap of the Trial Cruise for Prizes, Which Are Distributed to Fortunate

NEWPORT, R. I., Aug. 15,-Under the clearest of skies and in as fine a topsail breeze as could be wished Columbia put the finishing touches to its series of trial races against Defender in the presence of the New York Yacht club fleet today, winning the twenty-one-mile race by 8 minutes and 51/2 seconds. The fickleness of the breeze caused disappointment and the race, which looked at the start as if it were going to be a splendid one, developed into a lazy drifting match. The race was given by the New York Yacht club as a windup for the cerned, and cups which were designated as of natives, 'windup cups" were offered as prizes for the competing yachts. In addition to a twenty-dollar bill around a cake of soap, schooners and sloops all the yachts in this district had a little race of their own, the

New York Yacht club. Then there was considerable interest in the schooner class, in which Amorita and game. In vain I used all my wiles. At Quisetta competed. Of course Columbia won last, thinking the amount might be more from Defender and it appears that the people down this way are getting rather tired of seeing these big single stickers race, for the fleet that witnessed the contest was not the races came up and looked me over. nearly as large as yesterday.

Some Other Winners. Amorita won easily from its rival, Quisitta. In the thirty-foot class the Carolina won by skillful handling. The start made by Columbia and Defender has never been equaled by such large boats in any race. A bare two seconds separated them when they rushed over the line, carrying clouds of canvas aloft. For a few seconds they held on even terms, but Columbia having the weather berth cut off Defender's wind just enough to check it a little and as they both crossed a quarter of Columbia's bull was showing by Defender's bow. A moment later Defender was astern and Columbia heading for the flag mark off Point Judith with a lead of a good length. From there on it was simply a steady gain for the new boat. The Columbia won by eight minutes and two seconds. Summary:

Columbia-Started, 11:35:25; finished, 3:29:00; elapsed time, 3:53:35. Defender-Started, 11:35:27; finished 3:37:54; elapsed time, 4:02:27.

THE WHISKY BARREL.

Most Expensive of Barrels-Other Uses to Which it is Put.

A whisky barrel of the highest grade costs from \$2.50 to \$2.75, and it is the most expensive of all barrels, says the Roanoke World. It is made of heavy, selected, kilndried oak, free from sap—a handsome and substantial package. Such barrels are made in great cooperages in the west, in the tion of the proposed school building in the neighborhood of the distilleries, and in Second ward on account of the delay in seproximity, when possible, to the forests from which the materials for them are taken. Whisky barrels of the best grade used to cost from \$4 to \$5. Machinery has been brought more and more into use in making them, with the result that they are now cheaper than ever before.

These barrels are likely to be filled with whisky and stored for three years or more before they are shipped. When a barrel has found its way to this market and into the hands of the final distributer and has

n great numbers. Bought in this manner, the whisky barrel s inspected and put in order, if it requires any repair, and sold, it may be, to a whole-sale dealer in liquors, to be used for blended liquors, but it is much more likely not again to be used as a liquor package, but to be sold for a vinegar or a cider barrel. In this use it is not likely again to get as far away from New York as the point whence it originally came, and when it gets back here and has been again emptied it is gold again. again to the dealer. In the course of its use and travel it may come to need repairs. a new stave or two, or new hoops. It is put in order and sold again. When it has rensed to be useful as a vine-

Not counting the time that it may spend storage before its first shipment, the whisky barrel is likely to last through the

various stages of its existence, from the time it starts out until the end, two or three years, though much depends upon the care taken of it; carefully handled it may last ten years or more. The whisky barrel holds forty-five gallons.
There is a cheaper whisky barrel, also

made of oak, but of lighter materials, costs from \$1.50 to \$2, which is used largely by eastern distillers. Great numbers of the heavy barrels are used, larger numbers still of the lighter barrels, which, like the heavy barrels, are made in cooperages in the neighborhood of the distilleries in which they are first used, of materials drawn from forests of the region in which they are situated, or of shooks brought from the The life of the lighter barrel is abo the same as that of the heavier barrel, and it is put to the same uses. Of the lighter barrels, however, thousands, after the first emptying, are said to go to Scotland.

********** SOUTH OMAHA NEWS. 2

After innumerable delays the Board of Education has finally taken steps to repair some of the school buildings. Less than head. thirty days remain before the schools open for the fall term and the work of making alterations and repairs will have to be pushed if the rooms are to be ready for occupancy by September 11.

Last March Member Wyman offered a resolution which was adopted requiring the committee on buildings and grounds to make an examination of all of the school buildings and make a report of the repairs needed at the first meeting in April. The intention was to have the cost of repairs and alterations estimated and bids advertised for so that the contractors could go to work as soon as the schools closed for the summer. This early action was deemed necessary by some of the members for the reason that the heating and ventilating plants at the Brown Park and Albright schools would

For reasons best known to themselves the members of the board did not insist upon a one containing the bill. Well, I opened up never submitted until just recently. Now report from the committee and one was annual cruise, so far as racing is con- and was soon surrounded by a curious crowd everything will have to be rushed in order to prepare the rooms.

Orders were issued Monday night by the board for the fixing up of basement rooms in four of the schools and bids for this work will be advertised for. Bids are also asked for painting the interior of the High school annex and the exterior of the Albright school. The board will receive bids for the papering of thirty school rooms and the cleaning of paper on the walls of a number of other rooms,

As these advertisements for bids will run at least five days the bids cannot very well arm. be opened until next Monday evening, thus reducing the time for making repairs a full

Superintendent Wolfe has recommended that the High school annex be placed in first-class condition, as he proposes to have the A, B and C classes of the first grade attend school in this building. This move is considered one in the right direction, as it will take all of the smaller children from the High school building and place them in a small building by themselves. No pupils below the second grade will be taught at the High school building. This action of Superintendent Wolfe is being commended by parents on account of the report that the High school building is a fire-trap. Little progress is being made toward the erec curing a title to the ground. The board has virtually approved the plans prepared by Architect Kiewit, and when the deed is turned over bids for grading and erection and completion can be advertised for. It is understood that the delay in turning over the deed is due to the absence from the city of the owner of one of the lots purchased J. G. being. Improvements Wanted by Eastsiders Residents in the eastern portion of the city are preparing to make a request to the city council for some improvements in that section of town. Electric street lights are wanted at Thirteenth and Missouri avenue and also at Twenty-second and L streets It is also desired that some attention be paid to the streets, as the heavy rains have greatly damaged the roadways. It is asserted that the road is nearly washed away at Fifteenth and Missouri avenue. The sidegar or a cider barrel, gradually wearing out walks in this locality are reported to be in and becoming cheaper, it is sold as a pickle a bad condition and the city will be asked in this section within the last year and more are projected and the eastsiders naturally think that they are entitled to some of the improvements which are going about.

Operations at Armour's. The grading operations at Armour's are not proceeding as rapidly as was expected, although considerable dirt has already been moved. Owing to an error in locating the that traps the recent heavy rain did considerable damage to the excavations and made some extra work necessary. When the traps were arranged no provision was made for drainage and a cave-in of a portion of the excavation was the result.

It is reported that in connection with the building of the new warehouse the smokehouses which are now under construction will be enlarged and extended east as far as the east end of the box factory.

Complaint Against Shanahan Filed. Assistant County Attorney Dunn filed a complaint against John Shanahan in police court yesterday charging him with the murder of Ed Callahan. While no time for a preliminary hearing was agreed upon it is expected that the case will be called some time today. It is expected that Shanahan will waive examination, as the testimony will be identical with that introduced in the Joyce-Shanahan case.

The Harris Case Dismissed. The case against Ed Harris for stabbing Mike Markeson has been dismissed for want of prosecution. A couple of months ago Harris and Markeson became engaged in an altercation in the latter's saloon and while Markeson was trying to put Harris out of the place he was stabbed in the abdomen. Markeson recovered and as Harris is a hard working man he declined to prosecute when the case was called.

It could not have been made without their knowledge and they do not believe the report is that an employe of the establishment must therefore have been one of the number who looted the vault.

The valuation of the furs named by Shukert to the police does not tally with the figures quoted to a reporter Monday night. The amount of the loss as told to the detectives was in the neighborhood of \$5,000. Later the value of the missing garments was sald by Mr. Shukert to be not less than \$10,000. When asked which amount is correct the larger was designated.
