Pure Oxygen, "The Potent Elixir of Life"

Most abundant of all the elementary substances— is the element employed— the only remedy provided by nature to cure all ills.

The Oxygenor, through dazzling simplicity of the motive principle, draws the breath of life directly from the atmosphere and provides the proper oxygen under such pressure that will never wear out the oxygenator, while it is the only one invented that has been found to work consistently and perfectly for the cure and prevention of disease.

The Oxygenor is made of stainless steel, and is simply a fine wrought iron box with a mouthpiece and a shower head. It has been found to be marvelously convenient and efficacious in the cure and prevention of all diseases. It is the only one that works consistently and perfectly in all cases.

How Does it Cure?

Electronic waves have been shown to be the only thing that can cure disease. The Oxygenor, through the use of these waves, provides the proper oxygen under such pressure that will never wear out the oxygenator, while it is the only one invented that has been found to work consistently and perfectly for the cure and prevention of disease.

The Oxygenor is made of stainless steel, and is simply a fine wrought iron box with a mouthpiece and a shower head. It has been found to be marvelously convenient and efficacious in the cure and prevention of all diseases. It is the only one that works consistently and perfectly in all cases.
