

NO WARRANT FOR HIBBARD

Auditor Cornell Still Holds Up the Claim of the Food Commissioner.

GOVERNOR POYNTER NOW TAKES A HAND

Will Begin Mandamus Proceedings at Once if the Claim is Not Paid Today—Details of the Imbroglio.

LINCOLN, Sept. 5.—(Special.)—Auditor Cornell refused to issue a warrant on the salary claim of Deputy Food Commissioner Hibbard. When Mr. Hibbard was appointed by Governor Poynter the auditor announced that he would not allow claims made against the appropriation for the expenses of the food department and it now appears as though he means to keep his word, notwithstanding the fact that he admitted last week that the appropriation was legal and that the claim was correct.

Auditor Cornell has since given the matter no consideration and has not even asked the attorney general for an opinion regarding the food commissioner law. This afternoon Governor Poynter issued a writ of mandamus authorizing the claim if it is not finally allowed tomorrow mandamus proceedings will be commenced at once.

Auditor Cornell's first contention regarding the constitutionality of the appropriation was that it was not specific, holding that the legislature could not provide for an expenditure of state money beyond the present biennium. The pure food law appropriates annually for an indefinite period.

Deputy Attorney General Higdon filed in an opinion that the appropriation to be legal must meet three requirements. First, that it must be for a specific amount or have a definite limit; second, that it must be for a specified fund; and third, that it must be for a specified purpose.

National Guard Transportation. The last legislature, in making the appropriation for the support of the Nebraska National Guard, made no provision for the transportation of the troops to and from the annual encampment.

Orders were issued to each company commander today for a list of names to be returned for the purpose of determining who will be honored by the railroads. According to the provisions of the National Guard appropriation it would seem that it was not the intention of the legislature to have two encampments.

There's not one of the number but would be glad to see the suffering, though he knows that he would fall and the cannon's opening roar is but a call to victory more glorious than before.

BIG CROP RECORDS BROKEN

Statistics Collected from the Great Corn Belt of the West.

BILLION AND THREE QUARTER BUSHELS

Figures from Nebraska Show an Increase of Nearly One Hundred Per Cent Over Crop of 1898.

Reports to the Chicago Tribune indicate that all previous high records will be broken by the corn crop production of the United States of 1899. A canvass of the eight states which raise the bulk of the corn of the United States warrants an estimate above that of 1898, which heretofore has been the record.
