

MILLS PAROLED BY POYNTER

Harlan County Banker, Sentenced for Five Years to Prison, is Released. GRAND ARMY MEN ACTIVE IN HIS BEHALF

Auditor Cornell Rejects Claim of State Fair Appropriations

of 1898 and 1899.

LINCOLN, Sept. 8.—(Special.)—Benjamin D. Mills, the Harlan county banker who was sentenced to the state penitentiary about three years ago on the charge of being an accessory to the unlawful conversion of public funds, was today paroled by Governor Poynter. Mills had spent about a year and a half of a five-year sentence in the penitentiary.

Benjamin Mills was at one time one of the leading republicans of Harlan county and head of a bank at Republican City. The offense for which he was convicted was that of borrowing public money from Ezra S. Whitney, treasurer of Harlan county, who was also convicted, sent to the penitentiary and paroled about two weeks ago. When Whitney retired from office his books were inspected and it was found that he was owed \$20,000. On promise of immunity for his own delinquency he testified that he had loaned \$5,000 of the county money to Mills.

Mills claimed as a defense that the money had been placed in his institution as a deposit for the county, his bank being the county depository. Both the county treasurer and the banker were convicted in the district court, but Mills appealed his case to the supreme court. The findings of the lower court were approved and he was taken in custody by the sheriff and conveyed to the state prison. His friends immediately began a systematic effort to secure his parole or pardon on the grounds that he was an old man and that to keep him in confinement would jeopardize the life of Mrs. Mills. Members of the Grand Army were particularly active in his behalf.

When the parole of Whitney was announced the friends of Mills renewed their efforts and today J. H. Humpe of this city and Mrs. Mills called on the governor and appealed for the pardon of the prisoner.

Politics a Factor.

The element of politics had a good deal to do with the conviction of Mills, it is thought. In Harlan county the friends of Whitney, who is a populist, all favored his conviction.

The law under which Governor Poynter granted the parole reads as follows:

That the governor shall have power in the case of any prisoner, who is now or hereafter may be imprisoned in the state penitentiary under a sentence of not more than ten years, to allow any such prisoner to go upon parole, outside the enclosure of said penitentiary, to remain within the state under the control and supervision of the governor, and subject at any time to be taken back within the enclosure of said institution, and full power to revoke and re-imprison any convict so upon parole is hereby conferred upon the governor, whose written order shall be a sufficient warrant, for all officers named in the statute, to receive such officers to return to actual custody any conditionally released or paroled prisoner; and it is hereby made the duty of all officers to execute said order the same as ordinary criminal process.

Cornell Rejects Claims.

Auditor Cornell has rejected the claims of Robert W. Furnas for the unused State fair appropriations for the years 1898 and 1899. Mr. Furnas acting as secretary of the State Board of Agriculture, sought to obtain this money, amounting to \$4,000, to apply on the indebtedness of the association. Deputy Attorney General Oldham furnished the auditor with a written opinion this afternoon, holding that the money appropriated by the legislature could not be drawn from the treasury only for premiums offered and paid by the Board of Agriculture. As the board has held no fairs for the last two years the money will therefore remain in the treasury. The indebtedness of the association is something like \$8,000 and it was thought that the appropriation might be applied on unpaid premiums of previous years. The vouchers filed by Mr. Furnas are as follows:

Unpaid premiums due after 1897 and for services rendered for the Board of Agriculture.

Extensive improvements have been made in several of the university buildings during the summer. New shelves have been placed in the library and the other furniture arranged. In the main building one more room has been appropriated to the college of law. Work on the armory extension or chapel building will not be commenced for several months. This delay is caused by a scarcity of workmen and lack of building material. When the structure is completed the room now used as a chapel will be given to the law department. The extensive subway system of steam pipe conduits that has been in process of construction during the summer is now nearly completed. The roadway, which is in use for both present and future needs, being 65 feet square. They are solidly constructed, with brick bottom and sidewalks and a tile roof supporting a waterproof layer of concrete and cement. The steam pipes are arranged along the sides of the tunnels and are so constructed that all water in them will drain back to the boilers. The main conduit extends from the boiler-house to the chemical laboratory, with branches to the library building, the gymnasium, the main building and the shops. All will be lighted with gas.

At the state farm work on the agricultural building is being rushed with all possible haste. The excavating was finished several days ago and the foundation has been started. The builders hope to have this building finished before December.

Prof. Morcan Brooks of the department of electrical engineering returned today from Minnesota, where he spent the summer months, delivering a number of lectures on the subject of electricity.

Miss Ada Caldwell, sister of Prof. Caldwell of the department of American history, has been elected professor of art in the South Dakota Agricultural college at Brookings.

Prof. W. D. Hunter of the entomological department has returned from southwestern Nebraska, where he spent considerable time investigating the damage done by the army worm, an insect which attacks alfalfa, sugar beets and garden crops. In some places the damage done is great.

Another Sensation at Hastings. HASTINGS, Neb., Sept. 8.—(Special Telegram.)—A new sensation has just come to light in Hastings. During the last three years Annie Lambert has been living in Hastings and during that time she cultivated the acquaintance of John Gates, colored, whom, it is said, she claims took advantage of her weakness and she now finds herself in a troubled condition. Relatives of the girl have made an effort to send her to the B. & M., but she was arrested here yesterday, but failed. Gates is still at large.

Held to District Court. FAIRBURY, Neb., Sept. 8.—(Special.)—A man giving the name of John Fox was bound over to the district court to answer the charge of stealing a horse from Arthur Weddle of Steele City. It was shown that Fox was badly intoxicated at the time, unhit the horse from where it was fastened and rode slowly down the road until overtaken by the owner, who caused

his arrest. Fox claims to live at Nashville, Ill., and has been traveling through the country with an "Uncle Tom's Cabin" troupe. He was unable to give bond.

Fullerton Celebrates in Rain. Assistant Secretary McKeljohn At Fullerton Secretary's Reception.

—The largest gathering of people ever seen here met today to honor members of Company B, First Nebraska, and the regimental band. Notwithstanding the rain, which continued most of the day, there was an interval from 11 a. m. to 1:30 p. m., when the sky was clear, and everyone became hopeful the elaborate program prepared by the executive committee could be carried out. The procession which was to have been formed at 10 a. m. did not move until 12:30 p. m., when it proceeded in the following order: President of the day, with the orator of the day (W. F. Gurley of Omaha), in carriage; mayor and city council in carriages; Fullerton band, marching in front of the band; a group of twenty-four young women in uniform; Company B, First Nebraska; young women companies in uniform from Geneva and St. Edwards, Grand Army of the Republic veterans; Fullerton fire department in uniform; Knights of Pythias and Woodmen of the World.

The procession paraded the business streets and then wended its way to the picnic grounds, about a half mile from town, where the Woman's Relief Corps had prepared an elaborate spread for the returned heroes and the escorting auxiliary companies. Fortunately the tables were placed in a large tent, so the guests had hardly been seated when the rain again poured down in torrents and continued until 1:30 p. m. Speeches were delivered by W. F. Gurley, Rev. Ray and Sergeant C. W. Martin of Company B.

Just as the president of the day announced that a period of unendurable suffering from heat, dust and relief came last night in cool north winds and a light rain. Rain is past all help and rain in this section, and is seriously damaged. The late planting will not average ten bushels per acre. Late corn is considerably damaged, very chaffy. There will be pieces of early corn that will make forty bushels per acre, but most corn is estimated at from twenty to twenty-five bushels. Rain was needed to prepare the ground for sowing of fall wheat. Most of the ground is now plowed and ready for the seed, but farmers are afraid to sow. Some few have chanced it and put the grain in.

SHELTON, Neb., Sept. 8.—(Special.)—The day's wind, which has been blowing from the north for the past few days, has abated, when the mercury fell from 100 in the shade to 70, and a pleasant coolness from the north prevails. Rain began falling at 2 o'clock and continued all afternoon. This late corn is considerably damaged, but a few cool days will put most of the crop out of danger.

PONCA, Neb., Sept. 8.—(Special.)—The extreme hot weather and winds were displaced last night by a severe thunder and rain storm and it rained the greater part of today.

BRADSHAW, Neb., Sept. 8.—(Special.)—This section, which has been suffering for several weeks from hot winds, dust and drought, has greatly benefited yesterday by a fine rain which began falling about the middle of the afternoon and continued until the ground was nicely soaked. Farmers will be able to complete their fall plowing and sowing of winter wheat which they have been compelled to abandon on account of the drought.

ST. PAUL, Neb., Sept. 8.—(Special.)—The long, hot, dry spell was broken this morning by a shower, accompanied by heavy thunder and lightning. This afternoon another refreshing shower fell. The total rainfall amounted to .62 of an inch and the thermometer dropped forty degrees. It is reported here that during the thunderstorm this afternoon lightning struck the Catholic church at St. Libory, about ten miles from here, and it was burned to the ground.

NEBRASKA CITY, Sept. 8.—(Special.)—A heavy rain fell in this section last night, affording effective relief from the extreme heat and hot weather. The rain interferred somewhat with the races scheduled at the fair today.

WYMORE, Neb., Sept. 8.—(Special.)—The drought was broken here yesterday by a fine rain as could be desired. The rain was preceded by several days of the most disagreeable kind of weather, it being sultry with hot winds blowing. When the rain came the water fell so fast that the sewers could not carry it away and the streets were solid sheets of water.

CLAY CENTER, Neb., Sept. 8.—(Special.)—The long drought and extremely hot weather of the last week were broken yesterday by a splendid shower, which continued into the night. Although the corn crop in this locality is a failure the rain is welcome to the many putting in wheat.

GENEVA, Neb., Sept. 8.—(Special.)—Yesterday an exceedingly small fine rain fell which was instrumental in lowering the temperature from 100 to 50 degrees.

ST. EDWARD, Neb., Sept. 8.—(Special.)—A good rain fell at intervals all day yesterday.

Otoe County District Court. NEBRASKA CITY, Neb., Sept. 8.—(Special.)—Judge E. H. Bayard, senior, appeared here last evening and convened district court for Otoe county. The greater part of today was spent in calling the docket, setting cases for trial and arguing motions and demurrers. The jury will be called next Monday. Senator Hayward appeared in court, the first time he has been out since his recent illness, and was congratulated upon his recovery, which is now almost complete.

Caught on a Crossing. SUTTON, Neb., Sept. 8.—(Special.)—Last night while driving home in a buggy, the hired man of L. Livingston attempted to cross the railroad track ahead of No. 3 and was struck by the engine and thrown out, but not seriously hurt. The horse was killed and the buggy wrecked.

Horn Burned. NEBRASKA CITY, Neb., Sept. 8.—(Special.)—A barn belonging to John H. Hays, seven miles from this city, was burned yesterday, together with some farm machinery, harness and grain. The loss is about \$1,000. No insurance. The origin of the fire is unknown.

Contract Awarded. NEBRASKA CITY, Neb., Sept. 8.—(Special.)—The contract for building the gymnasium for the State Normal school was awarded to J. B. Mason of this city. Forty-five hundred dollars was appropriated by the last legislature for the construction of this building.

Guards Go to Camp. NEBRASKA CITY, Neb., Sept. 8.—(Special.)—Company C, Nebraska National Guards, leaves tomorrow for Lincoln, where the Second regiment will be in camp from September 9 to 14.

Johnson Lodged in Jail. WAHOO, Neb., Sept. 8.—(Special.)—Johnson, the would-be slayer of Sheriff Farrie, was brought here yesterday and lodged in jail last night to await a preliminary examination.

WRECK ON THE UNION PACIFIC

Train Laden with Fruit Crashes Into Freight and Lateral Is Thrown Into the Ditch.

SIDNEY, Neb., Sept. 8.—(Special Telegram.)—A wreck occurred on the Union Pacific at Pine Bluffs, Wyo., last night. Freight train No. 22, eastbound, with Conductor Smith and Engineer Henry Thorne in charge, had been at the above-named station switching for an hour. There is a sharp curve at this point and a fruit special, with Engineer Baldwin and Conductor Ed Leighton in charge, came around the bend at the rate of thirty-five miles an hour. The freight had no signal out and was waiting for the fruit special. The latter showed signals to ten miles an hour and struck the caboose of the freight train and smashed it, together with five cars of coal.

The fireman of the fruit train, Parr, was slightly injured, receiving a sprained side and a bruise. The headlight and smokestack were knocked off, the engine was derailed and the track torn up for about 100 feet. A wrecking crew from this point is clearing up the debris.

GENERAL RAINS IN NEBRASKA.

In Localities the Showers Came Too Late to Save Burning Corn.

EXETER, Neb., Sept. 8.—(Special.)—After a period of unendurable suffering from heat, dust and relief came last night in cool north winds and a light rain. Rain is past all help and rain in this section, and is seriously damaged. The late planting will not average ten bushels per acre. Late corn is considerably damaged, very chaffy. There will be pieces of early corn that will make forty bushels per acre, but most corn is estimated at from twenty to twenty-five bushels. Rain was needed to prepare the ground for sowing of fall wheat. Most of the ground is now plowed and ready for the seed, but farmers are afraid to sow. Some few have chanced it and put the grain in.

RIBBONS AS "PRINTERS' INK"

Typewriter Ink Now to Be So Classified Instead of "Colors Containing Oil."

NEW YORK, Sept. 8.—The United States general appraisers today handed down a decision that has been awaited with considerable interest by typewriter concerns and dealers in typewriter supplies generally. In March last a firm imported a large quantity of ink for typewriter ribbons. It was appraised under the tariff act of 1891 as "colors containing oil and size" at 30 and 35 per cent ad valorem and 8 and 10 cents per pound, according to quality. The firm claimed that the ink should be classified as printer's ink at a 25 per cent ad valorem duty. The appraisers sustained the claim and class the product as printer's ink.

STEAMER MICHIGAN ASHORE

Wrecking Tug Sent to Its Relief—Struck on Its Way to Mackinaw—Bound Down.

DETROIT, Mich., Sept. 8.—The passenger steamer State of Michigan is ashore at Colchester. The wrecking tug Saginaw has gone to its relief.

The State of Michigan runs from Lake Erie points and Detroit to Mackinaw. It was bound down.

Bucklen's Arnica Salve. The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever blisters, itchy humors, chomls, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Kuhn & Co.

HAY FEVER OR ENDEMIC CATARRH

The Remarkable Experience of a Philadelphia Architect With This Malady.

Hay fever is really acute catarrh excited by minute emanations from certain grasses, flowering plants, fungi or dried vegetable substances. It is very sudden in its onset, and, without proper treatment, continues all the season changes or the patient goes to some favorable locality. It has all the symptoms of acute catarrh—sneezing, abundant exudations of mucus, and, sometimes, reddened mucous membranes, and sometimes exciting spasmodic asthma.

Per-una is a specific for hay fever and should be taken during the whole season of the exposure to the cause; for as long as the exciting cause remains, no cure can be permanent. People who are unable to change their location during the season of hay fever will find in Per-una a priceless benefit to them, as it moves every disagreeable symptom exactly. It is always advisable to begin the use of Per-una a week or two before the expected attack of hay fever in old cases, where the attack can be foretold, as this will often prevent entirely the return of the disease. Address Dr. Hartman, Columbus, Ohio for a free book.

The microbes that cause chills and fever and malaria enter the system through mucous membranes made porous by catarrh. Per-una heals the mucous membrane and prevents the entrance of malarial germs, thus preventing and curing these affections.

STATE ELECTRO-MEDICAL INSTITUTE

COMBINED TREATMENT OF THE GREAT CURATIVE POWERS OF MEDICINE AND ELECTRICITY

WHEN OTHERS FAIL

Remember the wonderfully successful and treatment of this Institute combined the two greatest factors of the healing art—known to the medical profession—ELECTRICITY AND MEDICINE. It is the largest, most thoroughly and completely equipped Institute, both electrically and medically, ever established for the treatment and absolute cure of all Nervous, Chronic and Private Diseases of MEN and WOMEN. Honorable and Fair Dealing Accorded All.
