Face to Face.

With Disease a Man Hardly Knows Which Way to Turn-Drugs Do Not Cure-They Stimulate-Dr. Bennett's lectric Belt Equips You With a Weapon to Fight Disease That You Can Trust-The Cure Is Guaranteed. I worked so long and assiduously to perfect my Electric Belt and so well do I know its wonderful virtues, that I unknow its wonderful virtues, that I unhest attingly guarantee a cure in every case where I recommend the treatment of my Belt. It has asionished physicians and scientists—who now indorse it. My Belt is recommended by more than 10,000 curid patients. It is Nature's remedy. Drugs will not dure you—they simply stimulate. Under its potent flame the eyes become clear, the skin clean, the muscles hard, the step becomes clastic and the bowels regular. The digastion will become normal, the appetite will increase, and headache, flushing and nervous disorders disappear. New red, rich blood will course through your velns which will mantle the cheeks and lips and give them the rosy glow of health. The dark circles around the eyes will fade away and the weak man or woman is made a new being; restored to health and sexual power. I am the inventor of

Dr. Bennett's Electric Belt

And know exactly what it will do. Electricity is the Vital and Nerve Force of every human bring. When there is a lack of this Force, Electricity must be supplied. My belt is to supply this LOST ELECTRICITY. It is a food for blood, brain, muscles and nerves. 1 Bexual Impotency,

cocele. Spermatorrhoea and all sexual weak-nesses in either sex; estore shrunken undeveloped organs undeveloped organs and vitality; eure Rheumatism in every guise. Kidney, Liver and Bladder Troubles, Chronic Constipation, Nervous and General Debility, Dyspepsia, all Female Complaints

It is hard for some people to think they

It is hard for some people to think they can be cured now, because they have tried the old drug remedies of years ago and found them failures. It is necessary for these people to think a little. The world moves—this is an age of progress. The man or woman who has suffered for year after year withwho has suffered for year after year withwhite may be be their case hopeless, and year, may consider their case hopeless, and for that reason hesitate to begin treatment with my Electric Belt. Such hopelessness is almost as bad as disease itself. It puts one beyond the reach of health and happiness. You take no chances when you begin treatment with my Belt: what it has done for thousands of others it will not fail to de for you. If it will not cure you I will frankly tell you so.

My Belt has soft silken, chamois-covered

for you. If it will not cure you I will frankly tell you so.

My Belt has soft, silken, chamois-covered sponge electrodes that cannot burn and blister, as do the bare meisal electrodes used on all other makes of belts. I have entirely done away with this frightful burning, and still my with this frightful burning, and still my Belt will give four times the current of any other belt. My Electric Suspensory for the curs of the various weaknesses of men is cure of the bar of the bar of the bar of the various weaknesses of men is cure of the various weaknesses of men

War in South Africa Exerts No Unfavorable Effect on Commerce.

Immense Orders for Iron Are Unloaded on Mills Which Are Still Far Behind Contracts and Prices Hold Strong.

NEW YORK, Oct. 27.-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say: Fears and not facts made a war in South Africa seem a menace to prosperity here and a week of conflict has cleared away the fear. British markets for securities have been helped by the belief that mining shares would be worth more with no Boer control in mining regions and large purchases here of ammunition, packed meats and other army food have swelled the balance due this country. Money markets have grown less embarrassing, stocks have gradually advanced, industries are still supported by a volume of demand for which no precedent can be found and payments through the principal Fears and not facts made a war in of demand for which no precedent can be found and payments through the principal clearing houses for the last week have been 36.6 per cent larger than last year and 57.3 per cent larger than in 1822. So great an increase shows the net result of money and potent forces making for public prosperity.

The heaviest transactions in steel rails ever made so easily cover 1 100 000 for next.

in South Bend last July and for which crime he and Harry Thomas were arrested. Handy at that time escaped from Constable Cain chile being brought to this city. Thomas is now serving a term in the penitentiary for his part of the crime. After his escape from the officer Handy went to Nevada and has been working as a section hand for the Central Pacific Railway company and had a time check for \$35.

Horse Has Two Owners.

FRIEND, Neb., Oct. 27.—(Special.)—A horse, said to have been stolen at Sutton a week ago, was located at the Rodford stable, in this city yesterday. Rodford claims to have traded for this animal from a passing stranger at a date prior to the theft. Replevin proceedings have been instituted for its recovery.

Workmen Observe Anniversary.

Lunatic Attempts Suicide.

WEST POINT, Neb., Oct. 27.—(Special.)—Mrs. Louisa Brundiek, an insane patient now in the county jail at this place awaiting removal to the asylum at Norfolk, attempted to commit suicide by slashing her throat with a caseknife. An attendant discovered her in time to save her life.

buyers to pay as much as manufacturers ask, renders spring orders much below the average

Buying of wool has been heavy at Boston—10,071,200 pounds for the week and at the three central markets 13,579,837 pounds, making 42,928,280 pounds in four weeks, against 36,394,030 in 1897, when the last great speculation was on foot. Many mills are now buying which have recently started after long idleness, besides the American Woolen company, with others, which have bought largely before, while foreign quotations and some British buying of Australian and South African wool stimulated the market, though prices are not quotably higher. The demand for goods improves and a great season is confidently expected. The advance in cotton goods does not stop, for the demand is heavy and standard print cloths have been raised &c by the selling committee. But the operatives have demanded higher wages, possibly induced by reports made works may step.

The cotton market closes 1-16c lower, the shortage of the movement being attributed largely, and perhaps too largely, to concerted holding of stocks by growers or factories.

The increase in October compared with

The increase in October compared with

The increase in October compared with last year has been heavy and exports have been small, although at such prices that 500,000 bales represent nearly as much value as 700,000 last year.

The wheat demand is practically unchanged, while Atlantic exports, flour included, have been 12,232,841 bushels in four weeks, against 13,483,656 last year, and Pacific exports 2,197,771 bushels, against 3,124,-232, and approximately aquatic plants.

The preliminary lists of the seniors indicate a large graduating class. In the list for the college of literature, science and arts there are ninety-five names (thirty-seven men and fity-eight women) and in that for the industrial college there are forty names (thirty-five men and five women). The list for the college of law is not yet made up, but it will probably include almost fifty names, making a total of clude almost fifty names, making a total of ports continue to show the magnitude of ports continue to show the magnitude of

row will say:

A quieting down of distributive trade, more particularly at retail, is reported in the telegraph advices to Bradstreet's this week, growing out of the unseasonably warm weather now being experienced in most sections of the country. Reflection of this is found in less urgent orders received by jobbers and in somewhat impaired collections at many points. As regards prices, however, there is no appreciable loss of strength, the great majority of quotations remaining steady, and among those making changes advances are still numerous. That the business condition of the country remains at an unprecedented volume is testified to by the heavy gains noted in bank clearings over a year ago and by the immense increases in railway earnings over exceptionally good returns last October. As regards the current activity in transportation it may be said that eastward traffic from Chicago in the last month has been more than double that reported in the same period a year ago and nearly twice as large as that reported in October of 1892, a record period of good trade. The ocean freight situation is gradually improving, partly because high rates are attracting all available disengaged tonnage and partly because high rates are attracting all available disengaged tonnage and partly because high rates are attracting all available disengaged tonnage and partly because the check to foreign buying partleularly of cereals, caused by the advance in vessel rates, has exercised a refex action on the latter market. Simultaneously with the drop in freight rates this week has come a hardening of quotations for cereals. Wheat has been sympathetically strong, as have other cereals, and wheat flour has been advanced this week. Coffee is firm, but much higher on the week, some speculative reaction having been noted. Among leading products decreasing in price, tin and copper among the metals have been most notable, the latter calimed to be due to production approaching more to a parity with demand. Cotton is fractionally lower as the A quieting down of distributive trade,

proaching more to a parity with demand. Cotton is fractionally lower as the result of the deadlock between foreign consumers and American producers. The situntion of cotton goods, one of aggressive strength, is undoubtedly a supporting feature of no small account. The strength of wool is natural in view of the very large sale, most of which is claimed to have been for account of manufacturers. In woolen goods demand is favorable and further price advances are predicted.

Lumber, after slight hesitation at some markets, due to enlarged supplies is again very firm, as are also hides and leather in sympathy with recent advances in boots and shoes. The situation of fron and steel is perhaps the most notable one yet presented. The feature of the market is the reported booking by the steel rail mills of the country of nearly 75 per cent of their capacity for next year's delivery. In all 500,000 tons of rails are reported to have been booked for delivery early next year, and there is in additional consideration unfinished business on 1899 account which it is claimed will still further enlarge the been booked for delivery early next year. Heavy buying of pig iron, undoubtedly to cover some of the rail sales, is reported in the central west at prices a little below those ruling for some time past. In all lines of business demand is still very heavy, demand for steel for cars, of plates for shipbuilding and for wire being additional signs of rirength. Demand for hardware is active at nearly all markets. The scarcing of the rail sales is reported in the central west at prices a little below those ruling for some time past. In all incess of supplies noted last week is still a feature and jobbers are still pushed for prices are injuring our export trade is also heard.

Wheat, including flour, shipments for the week asygregate 6.448.649 bushels against ern markets. Complaint that present high prices are injuring our export trade is also heard.

Wheat, including flour shipments for the week aggregate 6.446.649 bushels, agginst 4.160.618 bushels last week, 5.560.931 bushels in the corresponding week of 1895, 5.31,.31 bushels in 1897, 3.628.000 bushels in 1896 and 2.743.014 bushels in 1895. Since July 1 this season the exports of wheat aggregate 62,-542,169 bushels, against 67,071,830 bushels last year and 15,283,694 bushels in 1897-98.

Corn exports for the week aggregate 4,525,519 bushels against 5,056,697 bushels last week, 2.424,376 bushels in this week a year ago, 1,589,193 bushels in 1897, 2.643,425 bushels

In 1896 and 1,970.561 bushels in 1896. Since July 1 this reason corn exports aggregate 14,385,375 bushels, against 4,385,307 bushels during the same period a year ago and 48,689,564 bushels in 1897-98.

Business failures for the week number 211, as compared with 221 last week, 219 in this week a year ago, 218 in 1897, 216 in 1896 and 239 in 1898.

Business failures for the week in Canada number, twenty-one, as compared with twenty last week, twenty-three in this week a year ago, twenty-nine in 1895, thirty-seven in 1895 and forty-eight in 1895.

WEEKLY CLEARING HOUSE TOTALS.

Aggregate of Business Transactions by the Associated Banks. NEW YORK, Oct. 27.—The following table, compiled by Bradstreet's, shows the bank clearings at the principal cities for the week ended October 28, with the percentage of increase and decrease as compared with the corresponding week last year:

Prices for Stocks Induce Harder Tone in Money. NEW YORK, Oct. 27,-Bradstreet's tomor-

Vancouver, B. C.... Victoria, B. C.....

out concert, there is probably some waiting for better prices by farmers. Corn exports continue to show the magnitude of foreign demand for breadstuffs, reaching 14.478,719 bushels, against 8.546,973 last year, and the demand has been large enough to advance the price ½ cent.

Failures for the week have been 190 in the United States, against 225 last year, and twenty-three in Canada, against twenty-four last year.

BRADSTREET'S REVIEW OF TRADE.
Unseasonable Weather Has Enervating Influence on Commerce.
NEW YORK, Oct. 27.—Bradstreet's tomorrow will say:

A fair degree of activity and enlargement of interest in speculation accomplished a further, though irregular, rise in prices this week. This movement was partly based on recovery of the London market, which in the early days of the week discounted the possibility of a speedy ending of the Transvael war by a sharp advance, in which American rails shared the honors with Kaffir mines. The somewhat easier tone of money eased speculation and considerable relief was experienced when it was found that the recent rise in foreign exchange rates was due largely to exceptional transactions in securities and that no gold was likely to be shipped to London.

The increase of activity and enlargement of interest in speculation accomplished a further, though irregular, rise in prices this week. This movement was partly based on recovery of the London market, which in the early days of the week discounted the possibility of a speedy ending of the Transvael war by a sharp advance, in which American rails shared the honors with Kaffir mines. The somewhat easier tone of money eased speculation and considerable relief was experienced when it was found that the recent rise in prices this advance of interest in speculation accomplished a further than the recent was partly based on recovery of the London market, which in the early days of the week discounted the possibility of a speedy ending of the transval war by a sharp advance, in which American rails shared the honors with Kaffir

The increased activity in stock prices on The increased activity in stock prices on the succeeding days since last Monday was accompanied by a harder tone in the money market, the rates rising to above 6 per cent, and on Friday afternoon touched 10 per cent. This was accompanied, moreover, by evidences of discrimination against industrial collateral by the banks, the coper stocks in some instances having it appears to the contraction of the contracti per stocks in some instances having, it ap pears, been rejected in bank loans, which per stocks in some instances having, it appears, been rejected in bank loans, which can readily be understood in view of that class of securities. Yet the stock market was to all appearances more impressed by the talk of a speedy return of money from the interior to New York and it might be observed that large bids were received for the \$2,800,000 of New York City 3½ per cent bonds which were offered this week, the average of the bids being over 107.

The money situation was also influenced by the favorable statement of the Bank of England and the further decline of discounts in London. The interest rates, therefore, did not materially check the buillish feeling, though the industrial stocks were held in check by the restrictions which the lack of facilities for carrying them impose. At the same time Wall street fully realizes the importance of placing of contracts for 1,500,000 tons of steel rails at the recent advanced prices, deliverable

the recent advanced prices, deliverable through the year 1990, thus insuring the activity and profitable character of the steel industry of the United States for another twelve months.
