This is true that we still have some life While it is true that we still have some lik-managed banks, and probably will never be entirely free from such, yet this state has reason to be justly proud of the banks un-der state jurisdiction, and the rapidly in-creasing deposits show that the prople are aware of their safety. It is, however, a lamentable fact that men, successful per-haps in some other line of business, em-bark in the banking business to learn by experience that something more than capi-tal as expressed in money is necessary to prevent the recurrence of this evil, and nothing is left to do but weed these people out when discovered.

The banking business of Nebraska is pass-ing through a process of evolution by which it is rapidly approaching its true sphere, which is receiving deposits, mying checks, loaning money and buying and selling ex-change. The speculative banker either re-tired under the influence of drouth and panle or received such a wholesome lesson that he has reformed. The plethora of re-serves, so marked for the last year, has not, as a rule, led the banks to forget, past les-sons and expand loans by taking greater risks than would be approved by sound business judgment. Doubtless the closeness with which securities are scanned has had with which securities are scanned has had something to do with keeping the reserve so large. This condition is abnormal and the late A. E. Hassler of the Pawnee Renow gives some evidence of passing publican and has a splendid war record. He

that Dr. Hartman cured me with Pe-ru-na. My husband is 82 years old. He takes Pe-ru-na every days and says "Dr. Hartman and Pe-ru-na are worth all the world to me.' There are three or four people here taking Pe-ru-na for rheumatic troubles, and like it so much. There are a great many here that use it altogether. I wish every poor soul would try his medicine."

Mrs. J. A. Bashor of Knoxville, Tenn., writes: "It gives me much pleasure to recommend to the public such a valuable remedy as Pe-ru-na. My health was completely broken down, and had been for almost a year. I could not rest day or night, but suffered untold misery. I tried remedy after remedy, but found no relief until Peru-na was recommended to me by a friend. I have taken one and one-half bottles and am today well and hearty. I shall always praise Pe-ru-na, for I feel it saved my life. My family has received such benefits from the use of Pe-ru-na that we consider it the best medicine on earth, and we are seldom without it in the house."

Good blood is the result of good food, well digested. Bad food, even though it be well digested, cannot make good blood. Good food must be well digested to make good blood. Therefore, diseased nerves are traceable directly to poor digestion and poor digestion is directly traceable to catarrh. With the slightest catarrh of the stomach no one can have good digestion.

Very few of the many women who have catarrh of the stomach suspect what their real trouble is. They know they belch after meals, have sour stomach, a sensation of weight or heaviness, a fullness, irregular appetite, drowsinces, gnawing, empty sensations, occasional pain-they all know this, but they do not know that their trouble is catarrh of the stomach. If they did they would take Pe-ru-na.

Pe-ru-na cures catarrh wherever located. As soon as Pe-ru-na removes catarrh from the stomach the digestion becomes good, appetite regular, nerves strong and trouble vanishes. Pe-ru-na strengthens weak nerves, not by temporarily stimulating them, but by removing the cause of weak nervespoor digestion. This is the only cure that

even now gives some evidence of passing away. While it is true, as stated before, that the banks of the state are unusually strong, yet the profits of the business have shrunk to a remarkable extent. There are several causes which have contributed to the de-cline in bank profits during the last few years, and some of which will remain per-manently with us. In past years the insurance agency bus-iness and land loan business have been im-portant adjuncts, to the interior banks es-pecially, and brought to them no incon-siderable revenue, at the same time requir-ing little or no investment of capital other than labor and energy. The mutual insur-ance company has almost entirely de-stroyed the insurance business of the banks, and the local investor, competing with the outside investor, has reduced the profits derived from the land loan bus-iness until there is but a narrow margin of profit, if any, to the agent. These two sources of profit are to some extent per-haps lost for all time.
