DUN'S REVIEW OF TRADE

Iron, Wool, Hides and Other Lines Show Marked Advances During Week.

GOOD ARGUMENTS FAIL TO ADVANCE WHEAT

Western Receipts Have Materially Declined, but Cereals Could Summon No Strength—Corn Advances Slightly.

NEW YORK, Nov. 10.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say: "The most noteworthy feature of the week in the rise in prices. Cotton rose on Wednesday to 1 1/2c, with much excitement, putting the price 2 1/2c higher than it was at year ago, and yet it was still higher in September, 1897. Wool has risen relatively more, about 10 per cent in two weeks, and the average of 100 quotations by Comstock Bros is higher than it has been at any other time since May, 1898. Big iron has risen further, 42¢ being quoted for Anthracite No. 1, the highest price since January, 1888. But hides are at the highest point since January, 1873, having risen all the year with very little respite. Prices of products have not correspondingly advanced. Leather and boots and shoes were higher in November, 1898, than they are now; cotton goods were higher in January, 1898, wooled goods in July, 1898, and even the products of iron, though greatly advanced, are not as high as they were in January, 1898. Such wide discrepancies in advance cause much embarrassment, but are the natural characteristics of a rise which is mainly due, not to concerted action in any trade, but to the pressure of a consuming demand, which for the first time exceeds the output. Results begin to justify the conservative feeling which is thought to be expressed in many branches of business. "The iron industry, which has led all others in the advance, now leads the way toward a readjustment of values. While contracts for pig-iron cover the entire production of most important districts for six months in advance, many of the consuming works in some lines approach the end of their orders and have now commenced to meet. So that prices have fallen 34 per ton at Pittsburg and 49 from the highest point in September, and prices are 23 lower than at Philadelphia. At the same time bars are 51¢ a ton higher both at Philadelphia and Pittsburg, the demand being enormous, and at Chicago very heavy contracts have been made for cars and implement works. A bridge combination is thought likely to affect future business of struc-

ture, which continues based for the season. A break in the London market decreased tin and sales were made at 28c. Boot and shoe makers are generally getting the 10c per pair advance they have held for some time, and are now making contracts in most lines as they wish to do so, in view of the uncertainty about materials. They are not very strong, and in that all dealers are not anxious for greater commitments, but the consuming demand causes large sales in advance of production. "There has been very strong, though sales at London were but 15,468,000 pounds, against 15,230,000 pounds the week before for large transactions elsewhere, and in three weeks aggregate 20,250,000 pounds, and buyers hold firmly for outside prices. Nothing like the sensational rise of last week has continued and the buying by manufacturers is slower, though still large. This and accounts of good trade indicate that an extraordinary business is expected for the entire season. The rise in cotton as yet helps manufacturers whose contracts cover production well ahead, but the buying has been mainly by traders and based largely on expectation of a very low estimate of yield by the department. While last year's official estimate was quite accurate, the whole trade here and abroad counted on a large crop and was right. "Wheat has not been very active nor strong, although western receipts have much declined, being 451,967 bu. for the week against 529,000 last. Exports are also smaller, the Atlantic being 2,563,467 bu. four included, against 3,335,569 bu. last year. The rise in cotton as yet helps manufacturers whose contracts cover production well ahead, but the buying has been mainly by traders and based largely on expectation of a very low estimate of yield by the department. While last year's official estimate was quite accurate, the whole trade here and abroad counted on a large crop and was right. "Wheat has not been very active nor strong, although western receipts have much declined, being 451,967 bu. for the week against 529,000 last. Exports are also smaller, the Atlantic being 2,563,467 bu. four included, against 3,335,569 bu. last year. The rise in cotton as yet helps manufacturers whose contracts cover production well ahead, but the buying has been mainly by traders and based largely on expectation of a very low estimate of yield by the department. While last year's official estimate was quite accurate, the whole trade here and abroad counted on a large crop and was right. "Wheat has not been very active nor strong, although western receipts have much declined, being 451,967 bu. for the week against 529,000 last.
