Use of Nasal Remedies For Catarrh a Dangerous Practice.

Ear Troubles Seem to Be Growing Sunday. After the removal of the remained in This Climate.

in This Climate. In This Climate. Many a person has been seriously crippled in the sense of hearing by an indifferent use of so-called remedies. Hefore using a local remedy it would be wise to first learn what will not be accomplished by such an application. Forcing a liquid or any sub-stance into the nose is like pouring water into a sieve. The highl merely spreads over the floor of the masal cavities and rolls down the throat, or out the other nostril, or into the custachian tubes or entrances to the ears Ecoting diseased mucous down the throat is almost wicked, while plugging up the ears is equally reprehensible. We thus see that nothing is accomplished by local treat-ment. There is a ramedy known as flams' for-

There is a remedy known as Gauss' Ca-

There is a remedy known as Gauss' Ca-tarrh Tablets, which acts upon the mucous membranes of the body stimulating their secretions and enabling them to throw off the deposits of congested mucous. And if you are a catarrh sufferer don't neglect to use these internal tablets in preference to anything else called a catarrh cure. Catarrh is a deep-seated mailedy due to lesions of the mucous membrane, not alone of the massi passages, but the throat, and often the stomach, kidneys, bladder and bowels. These points are all admirably explained in a little pamphlet issued by C. E. Gauss of Marshall, Mich. proprietor of Gauss' Catarrh Tablets. These tablets are the only safe and scientific catarrh rem-edy on the market, and are sold at nearly all the first-class drug stores at 50 cents a box.

Lact of Harmony. Lact of Harmony. All is not harmonious in labor circles over the action of the Central Labor union in endorsing the day labor system of mak-ing repairs upon the school buildings of Omaha. The plumbers are the protesting members of the body, and say that unless the present system is abandoned for the contract system non-union plumbers will perforce be employed upon the work. This condition is brought about by the contract between the journeymen plumbers and the masters, which provides that no journey-man plumber shall work for any person or association not licensed as a master plumber. The school board is not so licensed and therefore cannot employ union workmen. The bricklayers also sympathize with the plumbers, for, while members of their union may work on school repairs, they are pledged to discourage brick work by any but regular brick contractors.
