no successful catarrh tablet had ever been attempted.

At this writing, however, a most excellent and palatable remedy for catarrh has been placed before the public and sold by druggists, called Stuart's Catarrh Tablets, composed of the most recent discoveries in medicine for the cure of catarrh, and results from their use have been highly gratifying.

Stuart's Catarrh Tablets contain princf. pally highly concentrated antiseptics, which kill the catarrh germs in the blood and mucous membranes, and in this respect are strictly scientific and modern, as it has been known for some years past by the ablest physicians that the most successful catarrh treatment was by inhaling or spraying antiseptics.

The use of inhalers, douches and sprays, however, is a nuisance and inconvenience and moreover can in no wise compare with the same remedies given in tablet form, either in efficacy or convenience.

A clerk in a prominent insurance office in Pittsburg relates his experience with Stuart's Catarrh Tablets in a few words but to the point. He says: "Catarrh has been almost constantly with me for eight years; in this climate it seems impossible to get rid and for the first half hour it was cough, gag. expectorate and sneeze before I could square myself for my day's work; no appetite and a foul breath which annoyed me exceedingly.

months and found them not only pleasant to take, but they did the business, and I can sincerely recommend them to all catarrh sufferers."

Catarrh Suffers.

In its early stages catarrh is more of a nuisance than a menace to the general attention because of the remarkably fast health, but sooner or later the disease extends to the throat, bronchial tubes and even to the stomach and intestines. Catarrh is essentially a disease of the mucous membrane, the local symptoms being a profuse discharge of mucus, stoppage of the nostrils, irritation in threat, causing coughing, sneezing, gagging and frequent

clearings of the throat and head. The usual treatment by local douches snuffs, salves, etc., often gives temporary relief, but anything like a cure can only be obtained by a treatment which removes the catarrhal taint from the blood and the dis-

appearance of the inflammation from the mucous surfaces. A new remedy which meets these requirements and which so far has been remarkably successful in curing catarrh is Stuart's
