

Make Lazy Liver Lively

You know very well how you feel when your liver don't act. Bile collects in the blood, bowels become constipated and your whole system is poisoned.

Act directly, and in a peculiarly happy manner on the liver and bowels, cleansing, purifying, revitalizing every portion of the liver, driving all the bile from the blood, as is soon shown by increased appetite for food, power to digest it, and strength to throw off the waste.

TOTAL ECLIPSE OF THE SUN

Unprecedented Features of This Year's Masking of Sol's Face.

ITS PATH IN THICKLY SETTLED REGIONS

Elaborate Preparations for Scientific Observations—But with Uncle Sam's Chief Stars.

WASHINGTON, March 17.—In one respect the sun's total eclipse on May 28 next will be without precedent. Its path, instead of extending over the sparsely settled regions that intervene between Iowa and the western coast, as in 1878, or stretching over the watery expanses of the Pacific, as in 1882, when the United States had to send an expedition to the Caroline islands, 4,000 miles west of South America, for the eclipse to be observed, will cross the five states of Louisiana, Mississippi, Alabama, Georgia, South Carolina and North Carolina, touch Virginia and traverse a very fairly settled portion of the republic which is covered with a perfect network of rail.

ALL AMONGST THE GREAT ECLIPSES, GREAT WEST MAY BE SEEN BY NATURE'S GREAT FREE SHOW NEXT MAY.

try will be represented. All told probably 100 expeditions of this kind will be sent to the path of totality and equipped for some portion of the work. It is a great attraction for amateurs—persons who own photographic outfits or other scientific instruments used in observing the phenomena of the solar eclipse. Letters have been received at the observatory which warrant the prognostication that probably 1,000 of these unattached amateurs will be somewhere along the path of the eclipse. The government does not discourage these amateurs, but rather gives them every encouragement, and courts contributions of photographs and data from them to add to the government records.

After the eclipse the observatory will publish a complete report of observations, with reproductions of photographs and drawings. Any sketches, photographs and observations taken in any observation in any subsequent merit to make them worthy of preservation will gladly be received by the scientists and included in this publication.

Carolina and the other in Georgia. A floating cloud which might obscure the eclipse at one place may affect in the slightest view from the other, and it is to obviate the danger from cloudiness that has caused the division of forces.
In anticipation of this year's eclipse the weather bureau has for three years past been collecting data of the weather conditions in past days along the line of totality at all times of the day. The result of this investigation has been to show that there is less danger of cloudiness in central Georgia and eastern Alabama, nearest due south of Atlanta, and that therefore this is the best region for locating the eclipse stations so far as that consideration is concerned. The scientists of the observatory, however, have taken thought of other conditions also, and although the total of eclipse is longer in the neighborhood of Norfolk, have about decided to establish stations on high ground in North Carolina and Georgia. The stations selected will be occupied two or three weeks before the eclipse. The instruments will be erected and the part each man is to take will be thoroughly rehearsed. There will be a careful division of the work during the eclipse. Each man will be assigned to some particular duty, and he will be kept every effort to the gathering of all data possible in that connection. There will be but a minute and a half in which to make all the observations, and it is imperative that the whole affair should be carefully systematized and that each man should know definitely and absolutely what he is to do.

"No previous eclipse has had the attention of so many skilled observers as will watch this one. The Smithsonian institute will have a corps in the field under Prof. S. P. Langley. Princeton college will have a force under Prof. Young, the University of Pennsylvania under Prof. Stone, and the Yerkes observatory will conduct an expedition with Prof. Hale at its head. There are only a few of the institutions which are preparing for the field. In fact, practically every college and scientific institution in the country...

There are times in a man's life when it is necessary to act quickly, and decisively.
Times when life itself depends on the doing of the right thing at the right time.
Times, perhaps, when disease has reached the point where delay of even a day or week may prove fatal. Kidney troubles are slowly but surely dragging thousands of men and women to the grave. It is only a backache at first, doesn't amount to much they say. Then come headache, dizzy spells, urinary troubles, diabetes—and then, if it isn't checked, Bright's disease, and Death.

Doan's Kidney Pills never fail. Omaha people say so—people who have been cured. Here's one instance:
Mr. Henry Witt of 1811 North 26th street, says: Never took any medicine until an attack of backache set in, which pained me so much that I rolled and tossed at night, unable to sleep, with the excruciating torture it caused. Doan's Kidney Pills were brought to my notice and I procured a box at Kuhn & Co.'s drug store, corner 15th and Douglas streets. The treatment at first allayed the pain and finally it disappeared entirely.

Doan's Kidney Pills are for sale at all drug stores, 50c a box. Some druggists try to sell you something else. Be sure you get DOAN'S and don't accept any substitute. Foster-Milburn Co., Buffalo, N. Y.

ment at Kenosha, Wis., on Memorial day. He commanded a brigade of Wisconsin regiments in the last year of the civil war.
The First Baptist church in Dover, Pa., has converted a building heretofore used for church social affairs into a shirt factory, where church members are given preference in employment. Five per cent of the wages is to revert to church work in the town.

By order of Bishop Hoban the priests of the Catholic churches in the Scranton (Pa.) diocese announce that funeral services will no longer be conducted in the churches of the diocese, although what is practically a ban on Sunday burials by Catholics there.

THE OLD-TIMERS.
Josiah Johnson Hawes, the oldest photographer in the world, has just celebrated his eightieth birthday in Boston. He is still at his work.
Stephen J. Wilson of Babylon, L. I., 97 years of age, is probably the oldest colored citizen in the United States. Mr. Wilson was at one time sheriff of the county.
One of the most enthusiastic fox hunters in Pennsylvania is Hiram Skiles, who lives at Gap, Lancaster county. He is 83 years old, but still follows the hounds and is "in at the death" about as often as any other horseman in that hard-riding section.
