MOVEMENTS OF STOCKS AND BONDS. Stock Market Continues Very Active and Varted. NEW YORK, March 27.—The stock mar-ket continued very active and varied to-

but there was an appreciable check to the upward movement of prices and a distinct falling off in the volume of the demand. The disposition to realize made itself felt in additional stocks. As a con-sequence the market came to that condi-tion during the day which the professional operators called tired, its absorptive power was impaired and the weight of power was impaired and the weight of profit-taking proved too much for many stocks which have been most prominent in the recent upward movement. This was conspicuously so of the southern group of trunk lines, including Pennsylvania, Norfolk & Western and Baltimore & Ohlo. The stocks of the latter company fluctuated widely all day and were under very palpable manipulation.

The common and the preferred stocks were again ostentatiously brought to a smalt foot, dressed, Sc, red shapper, Sc, smelts, Sc; smoked white fish, Sc.

Closing prices for stocks, bonds and mining shares: there we're some conspictions advanced in stocks not usually traded in to any extent, it would be difficult to assign a cause in any news of the day for the check to the advance, but speculative sentiment accorded more attention to unfavorable possibilities even of a contingent nature. Thus some question was allowed to rise of the future of the money market, although the present tendency is all toward greater case, rates for call loans dropping to 2 per cent late in the day. Total 3,128 5,539 3,913 CATTLE—There was a good Tuesday's run of cattle today, but the weather was a most unfavorable for a market. There was a steady fall of rain all the morning which made the cattle look anything but attractive, and which kept everyone indoors except those who were compelled to be out. The result was that the market opened a little late. The general market was without feature or importance so far as the condition of the trade was concerned.

Local packers all seemed to want fat steers and the market on that kind of cattle was fairly active, so that the most of the offerings changed hands in good season. The prices paid were just about the same as prevailed yesterday, the market being quoted just about steady.

Cows and helfers were in fair demand and the prices were about the same as yester.

Cows and heifers were in fair demand and the prices were about the same as yesterday. Good cows and heifers, as will be noted from the sales below, sold well, but common cows are poor sellers. Fat buils, if heavy, are also selling badly, as the season is pretty well advanced and packers seem to be determined to pound them down. Stockers and feeders sold in the same old notches. The weather was against the trade in that kind of cattle, but still there seemed to be a fair demand and as there were very few cattle of that kind offered, the supply was pretty well cleaned up. HOGS - Receipts were not as large as expected and at the same time there was a good demand, a situation which is always to the advantage of the sellers. To still further help the sellers Chicago reported a sain of 5c. The result was that the market at this point showed an advance of just about 7½c. The trade was fairly active at the advance, though a good many sellers held on for a still greater advance, but everything finally changed hands and in reasonable season.

The seneral run of hogs sold very largely at \$4.9574.97½, as against \$4.87½@4.90 yesterday.
