THE FIELD OF ELECTRICITY

Some Wonders of the Subtle Power Bevenied to an Investigator.

Progress of Independent Telephony in the United States-Fires Traced to Detective Wiring -Electrical Notes.

Prof. John Trowbridge director of the 19.671 cards. university. Writer to the Electrical Review

"The college professor finds himself today, In view of the remarkable practical development of electricity, at a certain disadventure compared with the electrical entimeer. The latter has at his command elegraph and telephone lines of great extent, he can experiment on cables, for instance, under oppditions which campot be produced in any laboratory, he can employ currents of enormous strength in practical investigations in heat and in metallurity. The college instructor is limited in resources out telephone exchanges in various parts In the large held of the display of great of the country, to the great advantage of famous Extreme as heaty and rainful as the cleating being. There is, however, one display of great of the country, to the great advantage of famous Extreme contacting in which he can enter into competition with the practical man or equal terms, and this field is thus of high electromotive force. I have therefore entered the country of the desired several cross-binsts of all from the public factors are directed several cross-binsts of all from the public factors in the country of the desired factors for the country of the desired factors for the country in the country of the country of the desired factors as head chicken as hea this field with the desire of using to the umoust the facilities which the practical developments of electrical phonomena have after the investigator. For the past two years I have experimented with a storage phonomena was a proceed as practical that I have lately founded it and I now have 20 000 relia in successful operation. This plant is the largest in the world at the service of the largest in the largest in the world at the service of the largest in the largest in the world at the service of the largest in the larg this field with the desire of using to the a great cheapening of service in many to place the apparatus in at open field and
