ARMERS GIVEN CHANCE TO TRAVEL

Expected that the Tales They Will Tell of the State's Prosperity Will Bring in New Settlers.

Western passenger circles have been cred to a degree of unusual interest by the announcement just made by the Burlington of its intention to establish eastound low-rate excursions from all Nebracks points to all Western Passenger association territory located between the Missouri and Mississippi rivers. The dates for the leaving of these excursions are Septem ber 10 and 26 and the return limits will be thirty days from date of sale. A rate of one fare plus \$2 for the round trip will be made. The initial action of the Burlington in this matter took all competitive roads by surprise and no plans have been formulated by other lines for similar excursions. although it is forecasted that the precedent established will be followed,

Early in the summer the Rock Island stole a march on its competitors by announcing low-rate eastbound excursions from Colorado points. All of the reads folbeen attended by entirely satisfactory results. The Burlington's present action is instead of from Calerado. "Our paramount idea in this matter," said

As a result some of their friends and acquaintances are likely to be struck with the idea of investigating these things for themselves and once bring an eastern farmer or business man of moderate means into Nebraska, bent upon investigating the conditions, it is almost certain that he will become a resident. We believe these lowrate excursions to the cast which we are about to establish will accomplish much good in this direction. Beside this, we anticipate that we will have great crowds of people on these excursions, as many, perhaps, as we can accommodate, so that the plan has a two-fold object."
