Material for Bears. NEW YORK, Aug. 20,-There was no radcal change today in the character of reent stock market operations. General news cent stock market operations. General news bearing on the situation was seant, but what there was furnished ammunition for the bears. London, which has lafterly been a burer, turned seller for a small amount and western offerings were only on special stocks. General weakness occurred in stocks with which the firm of Flower & Co. is identified, following the announcement of the death of a member of the firm. These include a half dozen most active issues and losses ranged from 1 to 2 points with Brooklyn Transit and People's Gas leading. Elsewhere selling was in moderate volume, but some pronounced declines occurred in Sugar, Tolarco, Consolidated Gas, Metropellian Street rallway. Rallroad stocks were much better sustained than the specialities, declines extending to a point These melade a bull define of the business and losses ranged from 1 to 2 points with Brooklyn Transit and People's Gasteading. Bonds showed irregularity, but changes were very small. Total sales, par value, \$655,000. United States 4s advanced 4 in the Sci. 1000. United States is advanced it in the bid price.

The Commercial Advertiser's London financial cablegram says: Excessive idleness in the markets here today caused universal heaviness except in copper shares, which were sustained by covering of short contracts. Money was much easier. Call rates began at 2% per cent and soon became nominal. Time money was 3 per cent, discount 3%. This case is expected to last to the end of the month. The India government seems to be nibbling at silver.

Cotton Market.

NEW YORK, Aug. 29.—The market for cotton futures showed considerable irregularity today. On the opening call August declined II points, while the rest of the list was 5 points lower to 2 points higher. For a time a pretty weak feeling prevailed, This was due to unsatisfactory cables and an almost entire absence of public speculative interest. Crop news, while conflicting, had a pretty bad average later in the session. A demand from the shorts, on this account, and following reports of heavy rains in Texas, with drouth in the Atlantic states, carried prices up 11214 points from the lowest level of the forenoch. Trading was not at all active, as opinions were much at variance and neither one side nor the other was disposed to act on their convictions, At the close the feeling was steady with August 7 points lower and other months 7 to 12 points net higher. Fytures closed steady with August at \$9.08; September, \$8.46; January, \$8.47; February \$8.48; March, \$8.51. November, \$8.50. December, \$8.46; January, \$8.47; February \$8.48; March, \$8.51. BIRDS AS SOWERS.

They Are the Chief Agents for Dis- No. tributing Seed. The birds are the principal agents in the distribution of seed. Let us glauce at a few instances of this, says Longman's Magazine. The branches of an oak and the ground underneath may be seen in 7 acorn time thick with rooks gorging themselves with acorns. But what is you glossy , purple fellow doing apart from the others? He has flown into the middle of the field, where he can have a better eye upon approaching enemies, and is vigorously hammering away at the ground with his strong beak. Having eaten as many acorns as his craw will hold be is burying a few with an eye to hard times. When those times come the "boy with the gun" may have got 54 him or he may fail to locate some of his buried treasures, which grow up and in time prove their gratitude by repaying the acorn with compound interest to his descendants.
