Of Persons Who Have Been Cured of Dandruff, Falling Hair and Baldness

A Barber's Experience in Two Cases

I am using Newbro's Herpicide on two customers of my barber shop, one has falling hair and the other dandruff. It is doing all that can be expected so far. The falling has almost stopped, and the dandruff., after two applications, is not near so bad as when the use of HERPICIDE was begun.

A HEALTHY HAIR

"A" External layer of epidermic sheath. "D" Inferior extremity. "B" Internal layer. 'C" Root of the hair,

In recent years science has demonstrated that the cause of Dandruff is a germ or parasite which burrows up the scalp in thin scales, while digging at the root of the hair, where it destroys the vitality of the bair, causing it to fall out. After a year's most patient and careful laboratory work a preparation has been discovered that widestroy the pestiferous parasite-

Kill the germ that causes Dandruff, Falling Hair and Baldness, you will have no more Dandruff, and your hair must grow luxuriantly. Herpicide not only contains the dandruff germ destroyer, but it is also a most delightful hair dressing for regular toilet use. No other hair preparation is on this rejentific basis of destroying the dandruff germ, and none other claims to bc, for the simple reason that it is only recently that a destroyer of the germ has

Completion of the First College for the Higher Education of Women.

Details of the New Educational Institution, Its Management, Scope and Surroundings-Coming Dedicatory Exercises.

WASHINGTON, Sept. 7 .- (Correspondence of The Bee.)-The first Catholic college in the world for the higher education of women is completed. It is named Trinity college and is situated in the northeast section of the city of Washington, near the grounds of the Catholic university and the United States Soldiers' home. On October 1 it will be opened with accommodations for fifty students and the congregation of sisters and teachers. On November 6 Cardinal Gibbons will dedicate the college and the spring of its career The presence of innumerable windows, will start up fed by the interest of the some of them arched in a long, semientire Catholic world from Rome to San circular sweep which enclose ideal bits of Francisco. This is no ordinary event, the country scenes, add much grace and light completion of Trinity college. It is ex- to the college. The room above the dining traordinary in that it signals a new era in room will be used temporarily as a chapel Catholic education for women. In that for A great attic overspreads the top and doors the first time in 1,900 years a university from this lead to the slagged roof of the education for women on an equal standard convent portion. It is here that the chef with that of men is regarded with aid d'oeuvre of the Trinity collège close is and applause by the Catholics and is discovered-that is, the view. It is magfounded under the very auspices of the nificent. The quiet and smiling welcome to the young principal's room, "side parlors," portresse's room, dining hall, library and recreation is seen, the wind of the river, the rise of room for the students, a large number of those magic Virginian bluffs, the towers of class rooms, the apartments for students, bedroom and study, alcoves, the convent proper, a portion of the cloisters and the annex to the chapel, in fact the basic nants of "Edgewood," the estate of Chief apartments of the college are all contained Justice Chase, where now stands the new in this right wing. It is a large and imposing building, the massive gray of its taries, dormitories and buildings of the walls rising cathedral-like out of the pine woods on on eminence above the surrounding country. The college enclosure is twenty-seven acres, bounded in the rear by Lincoln avenue and facing full front on Michigan avenue, where the Brookland car line of the City and Suburban Electric railway passes, meeting Lincoln avenue at the extreme point of the college grounds, which extend into a broad park known Trinity Place. Flanking the right side down a long stretch of sloping ground is an old farm house and beyond rise the monuments, the marble crosses, glistening obelisks and white gravestones of Glenwood cemetery. Thus, unhampered by contact with other buildings, it is an isolated and commanding position that Trinity college holds. It is built of that solid looking Port Deposit stone of Maryland, with base and all the trimmings, sills, window headings and entrance steps of North Carolina granite. The four sides present pediment fronts corned by decorative granite finials and the roof is fashioned of brilliant Celadon tile, that warm red celor which is a reproduction of the old Spanish and which relieves the somber gray tone of the Port Deposit. The science hall is to be the central structure. The chapel is a superh design of Gothic style, twinbe the central structure. The chapel is a superh design of Gothic style, twin-steepled, arched and rich with carved stone, that "frozen music" of Mme de Stael.

Only the foundations are now laid, but the work will be pushed as soon as the college proper is ready for occupancy.

her singing. PROFITS UNDER GLASS.

> Money Invested in Greenhouses and the Income They Yield. The Department of Agriculture has reently, through Mr. B. T. Galloway, its chief of the division of physiology and pathology, made an investigation that possesses interest not only for the class specially concerned in a great and increasing business, but for all persons who buy flowers, fruits and vegetables grown under glass. Formerly greenhouses and forcing beds were met with occasionally and it was

lieve it was only a frog when he reasted

not until 1825 that real progress in this direction began. As the country developed in wealth to also developed a taste for early lettuce and radishes, and for roses and violets out of season, so that now for roses it is "all season summer" and violets may always be had for the asking and for money The result, as ascertained by an admittedly imperfect census, is the discovery of some 10,000 establishments in the United States devoted to the growing of plants under glass. These establishments represent capital to the amount of \$2,250,-60, they turn out products valued at wholesale at \$2,250,000 and sold at retail

these products bring \$4,500,000. But this does not account for the florists. There are not less than 9,000 of these, it is estimated, with an average of 2,500 square feet of glass covering each of their growing beds. This large area of 22,500,000 square feet of glazed garden represents establishments valued at \$11,250,000 may begin to get an idea of what we are expending for flowers when it is stated as ascertained by Mr. Galloway, that the retail value of flowers sold annually is \$12,500,000, of which \$6,000,000 goes for roses, \$4,000,000 for carnations, \$750,000 for violets, \$500,000 for chrysanthemums and the rest for flowers of various names.

As another illustration of the growth of this trade in articles not many years ago regarded by the great mass of the people as luxuries, it is ascertained that the retail value of potted plants sold each year is \$10,000,000. The showing is important as well as interesting. Besides contributing to a wholesome taste in the beautifu a saturable thines produced in glass houses, the users of the product are un-

Startling Record of "Gran-Solvent."

Dissolves Stricture like snow beneath the sun, reduces ENLARGED PROSTATE, contracts and strengthens the Seminal Ducts, forever stopping Drains and Emissions No Drugs to Ruin the Stomach, but a Birect, Local and Positive Application to the Entire Urethral Tract.

GRAN-SOLVENT

Discovered by the Chemist Fabrion, it quickly interested the great Scientist and Physician, Kriman, who developed it and proclaimed that marvelous action in Urethral Aliments which electrified the world.

At enormous expense Dr. C. J. Carter outstripped all competitors and accured exclusive control on the Western Continent for the St. James Association.

The great virtue in the method of application is its direct and positive action. No vile, drastic drugs to ruin the stomach and dissolving by the heat and secretions of the body in three hours, which is sufficient time to penetrate and dissolve Stricture, there oughly medicating the

Prostate Gland.

reducing enlargement and contracting the Seminal Ejaculatory Ducts forever stopping Drains and Emissions, curing while you sies a without pain or inconvenience. The alterative and antisoptic action of "Gran Solvent" asserts itself in destroying Genecocci and the germs that infest the Bladder and Prostate Gland.

During the past year 19-80 week, strictured, wasting wracks have been cored—19-86 men born again to begin life anew with fresh vigor, full of atrength and the consciousness of restored man-hood. Under the influence of this sovereign solvent Stricture is dissolved and disledged in 15 days, no matter low old, tough or calloused it has become.

From time immemorial, cutting and dilating have filled up the brutal, functiess record of treatment in Stricture, and yet there has never been one cure by such savage methods. The eager seas with which inselled men are applying for this solvent is an open confession of their error in the past. Over 500 leading physicians in the United States and Cauada have abondered the knile and are employing Gran-Solvent in their practice as a humane and unfailing agent.

Varicocele.

Varicocele is an accumulation of sluggish blood in the veins of the Scrotom, due solely to imperfect virgulation, and has its origin in a diseased and torpid Prostate Gland. Operations in this disease are only temporary, and no mechanical device yet discovered has cured a single case. Restore the Frontaic, restore healthy circulation, Varicocele disappears and the singuish accumulation is replaced by pure, healthy, red blood.

GRAN-SOLVENT IS NOT A LIGHTLE.
