Cotton Market.

Cotton Market.

NEW YORK, Sept 24—COTTON—Today's market was a bull affair. At no time during the session was there the slightest indication of weakness and in no instance was there an attempt made to bring about a reaction from the opening rise. However, speculation was restricted mainly to the "talent" and falled to reach the huse proportions which were so characteristic of the bull market two weeks ago. The opening was steady, with prices up 11-918 points, this being largely a sympathetic movement. Liverpool having advanced far beyond the expectations. Good buying for the foreign account, an indisposition to sell on the part of local parties and a scare of pit shorts added to the firm undertone. After the first half hour business settled down to a slow room trade, with the market was of course slow in view of the big supply, but at the same time prices did not in the majority of cases suffer a very great decline.

On the late improvement Wall street was a heavy buyer of the October and January options. ket was 10@15c lower than on Friday. The greatest decline was on the medium kinds. Canners sold fairly well at about a dime decline.

Taking into consideration the heavy receipts feeder buyers took hold in good shape today. They succeeded in selling about everything they had on hand last week, which gave them considerable confidence for this week's trade. The best heavy cattle were in good demand and went from nearly steady to a dime lower, but some of the less desirable stuff was very slow sale and unevenly lower, buyers taking off fully lic. Stock heifers of good quality were not much lower and were good sellers.

There was a fairly good demand for them.

There was not much of any change in the market from start to finish, the last arrivals bringing just about the same prices as those on the opening market. Representative sales:

SHEEP—There were 38 cars of sheep reported on saie today, but the bulk of them were late in arriving, which made the market very slow in opening. A string of lambs brought \$4.75, or about 50c lower than they were a week ago today. Buyers did not take held with much life, and the feeling was decidedly weak.

It was late before any good sheep were on sale and the feeling on those was also very weak, as Chicago had a good, liberal rap. A few bunches changed hands that looked 10c or 15c lower than the high time lagt week.

YELLOW FEVER AT HAVANA

Private Advices from Cuban City Indicate that Serious Outbrenk Extats.

WASHINGTON, Sept. 24.-The surgeon general's office of the War department has no information regarding the epidemic of yellow fever in Havana, although it is known to exist there to a considerable extent. Private advices from Havana indicate that the outbreak is serious. fever exists in the best parts of the city and among Americans who have gone there. It is said at the War department that no fears are entertained of a serious outbreak among the troops of the United States, as they are outside of the city and not in the infected districts. The outbreak is not unexpected, as fever usually develops about this time of year and is even worse during the months of October and November than in the spring. Surgeon General Sternberg does not think there need be any apprehension concerning the spread of the disease.

FLOOD WIPES OUT VILLAGE Texas Creek Carries Away Every

Building-Several Persons

ST. LOUIS, Sept. 24.-Information contained in dispatches from the Nueces river valley, in Texas, says that in a little Mexican village, La Aigle, on Gallardo creek, a branch of the Nucces, not a jackal is left standing as a result of the flood. A Mexican family of four, and two American campers, supposed to have been deer hunters from Eagle Pass, perished.

Loss of life is believed to have resulted on the Circle X ranch and at Dos Pasitos, but this cannot be verified. All efforts to get word from Bracketsville, which was wrecked by a flood a year ago, failed owing to the washing away of telegraph wires.
