No. 2834 Cleveland Ave., Louisville, Ky., Dec. 11, 1899.
About eighteen months ago I was told by my doctor, after he had examined my wife, that we could never be blessed with children. The announcement astonished and disappointed me. I could not get my mind off of it and for awhile was hardly able to attend to my daily occupation. A friend noticed that something was troubling me and asked what it was. He was a near friend and I told him. "Oh pshaw!" he said, "Is that all?" I replied "Isn't it enough to make a man feel bad?" The next day he brought me a Ladies' Birthday Almanac and said: "Read that." I read it and quickly got a bottle of Wine of Cardui. Before my wife had taken all of the first bottle, I saw a great change in her. The rosy tint came back to her cheeks, her eyes were bright, her steps firm, and best of all, the fearful pains she used to have were gone. Before half of the second bottle was gone, your medicine had proved that the doctor had made a mistake. July 3rd. my wife gave birth to a ten-and-one-half-pound girl baby with very little trouble. Both, up to this day, are doing well. I think there is no doubt but that for your

our home would have been childless. I will never cease praising it. For only three dollars my wife has been made entirely well, and I am one of the happiest men on earth. Three packages of Thedford's Black-Draught completely cured my wife of constipation of three years' standing.

Mansions carpeted with velvet are cheerless abodes when the wife or mother is ill or when no children are there. But Wine of Cardui has made thousands of happy homes of humble cottages. It helps women to perfect health and often brings happy children to bless them. Every day mothers tell of the gratitude they feel for relief from sickness and barrenness. Wine of Cardui brings women immediate relief from all the ills peculiar to their sex. Painful and irregular menstruation, leucorrhoea, falling of the womb and miscarriage are all permanently relieved by the Wine.

because provided by the constitution and proposed the condition created by that instrument.

This assault meen the three co-osimale branches of our government, if it succeed, will reveluiteffize and destroy the whole system. What will follow is already visitable in his appeals to class hatred, ency and projudies. Since 1826 the national democratic party has promoted the purjoses which then justified its existence. We have urged legislation to strengthen the gold standard. In that standard the interest on the public debt has been reduced to 2 per cent and the national credit has been so strengthened that our 2 per cent bonds are at a premium. Private credit has feit the condition and by abundant capital at the lowest inferest known in our history Cheap capital, represented in economy of production, has opened the world's market to our surplus and we hold supremacy of the world's trade. The gold standard has transformed us from a debtor to a creditor nation and has made us the clearing house of the commercial world. It has increased the consumirs power of the people by industrial restoration and has added value to the farm crops of the consumirs power of the people by industrial restoration and has added value to the farm crops of the consumirs power of the people by industrial restoration and has added value to the farm crops of the consumirs of CHICAGO, Oct. 5.-James H. Eckels, ex- man, died today aged 68 years. I am sure I do not misdefine the term, when I say that what they call a "trust" is not a trust at all, but merely the concentration of capital or labor, or capital and labor, for a specific, legitimate purpose.

second to find the second of the control of the people by industrial restoration and has added value to the farm crops of the country, and to the land which produces them. The further effect of the gold standard is the ready employment of American labor and payment of its wages in the best money in the world.

Paralysis of Industry.

The destruction of that standard, the degradation of public credit, the paralysis of industry, the restriction of commerce, increased cost of production and descent to a paper basis, are the disasters threatened by the election of Mr. Bryan, who is pledged to inflict them on us as soon as he gets the power.

He seeks that power by an appeal to the anti-expanish and anti-trust sentiment of the people. The difficulties of our external policy were unforcesen, as their solution is at present unrevealed. The evil of trusts has no party parentage, and will be remedied by the combined intelligence of all parties. Without minimizing the perils of either we affirm that no greater evil can beful our government than the impairment of its vigor, the destruction of its eredit and the ruin of our industries, which Mr. Bryan is specially piedged to effect if he gets the power.

Therefore, we appeal to our countrymen again to avert disaster from their country.

Fairbanks Confident of Kansas.

WARSAW, Ind., Oct. 5.—Senator Charles
W. Fairbanks addressed a big meeting of republicans in this city tonight. He talked on imperialism and contrasted the industrial conditions existing under the last democratic administration with the prosperity that has been brought about under McKinley, Senator Fairbanks also remarked that he had just returned from a four through Kansas and was confident that state would go republican in November. Four thousand people attended the meeting, which was held under a huge tent.

win sook for his dividends and not in a reduction of labor cost.

Combination Not an Evil.

If combination of capital neither increases the price to the consumer nor diminishes the number of laborers, nor the amount of wage, it cannot be either a menace to society or a detriment to the public good. It certainly does not present such a situation in the country's affairs as to demand unusual laws or extraordinary action. The laws which apply to the dealings of daily business life I deem sufficient, the laws which make requisite common honesty and fair dealing between man and man.

It seems to me there is no justification for all this hue and cry of imperialism and threatened militarism. It is an issue conceived and uttered by the opposition to divert from the real things at stake, to conceived and uttered by the opposition to divert from the real things at stake, to conceived and uttered by the opposition to divert from the real things at stake, to conceive the purposes of those who are in the confidence of Mr. Bryan, to make for their plans at home and not work out reforms abroad. Who, knowing Mr. Bryan, analyzing his mind, following the course of his career, passing impartial judgment upon his declaration on any question, will believe him carable of heading an administration which can carry out a successful foreign policy? How is it possible for Mr. Bryan, wrong on all things at home, to be right on all inings abroad. But his position upon the Philippines is not one that entities him to consideration. He did make possible the acquisition of the Philippines by insisting upon the ratincation of the Paris treaty and now when it, his act, returns to plague him uniertakes to disprove his responsibility by asserting that his action was based upon the idea of making more manifest the dankers of imperialism. Why make it more manifest? Why leopardize, if his present that the United States to the land he claims is theirs. Why Simply that Mr. Bryan might have another issue in his presidential cannot be stored for politics
