

UNIQUE CHURCH SERVICE

Dean Fair Preaches to Mutes at Trinity Cathedral.

MEETING IS FIRST IN A SERIES

Words of the Minister Are Translated into Sign Language by an Interpreter.

A service unique in the annals of the churches of Omaha was observed at Trinity Cathedral Sunday afternoon at 4 o'clock...

VALUE OF PRAYER TO CHRISTIAN.

In the Very Warm and Wool of Daily Life.

Rev. D. E. Jenkins, professor of theology in the Presbyterian Theological seminary, occupied the pulpit of Clifton Hill Presbyterian church Sunday morning.

"We are tempted to ask what need had Christ of prayer? It would be better to ask how could He live without prayer?"

"Christ prayed, among other reasons, simply because he was a man. His example teaches the importance of prayer to a human life."

"There is, secondly, the reflex value of prayer; that is, the effect of prayer as an act or exercise of the soul."

"Thirdly, the crowning value of prayer consists in bringing our finite spirits into contact and a fellowship with the Eternal Spirit."

SIGNIFICANCE OF SACRAMENT.

To the Christian Believer it is the Embodiment of His Faith. At the Central United Presbyterian church Sunday morning Dr. Alexander Gilchrist, corresponding secretary of the Board of Home Missions and former pastor of the church, preached before the vestry...

"Many of the most important incidents in the life of the Savior seem to be accidental, but several seemed to have been carefully prepared. There were no accidents in His career, but on two occasions at least we see the preparations made and upon these occasions hang most important features of the gospel and religion of Christ."

"In the words expressed by Him on this occasion we find more than human wisdom. The passer was a commemorative ordinance in which the Jews recurred the history of their race and the events in the life of Moses leading up to the establishment of the ordinance of the passover, but Christ here was teaching His disciples to look forward. There is some virtue in looking backward over the events of the past, but from this time the religion of the world was to be centered in Jesus. What Jesus did then He does now and will ever do. If we fail to catch a view of the things which are to come we lose the words of Jesus."

"How simple His teachings and yet with what power they take hold upon his hearers. He fortified his disciples against the future, calling attention to the essential facts of his nature and his own work. In the scheme of the true religion Christ must be the central figure and He has established this ordinance so that there will be one occasion where He will always occupy the central place. No other has the power to project the thought of the believer so far into the future as Christ. Although the different branches of His church may differ as to the nature and effect of the institution of the Lord's supper, yet no sacrament is so universally esteemed. To

MINING IN THE BLACK HILLS

Paint Factory Turning Out Twenty-Four Tons of Pigment Daily.

COMPANY TO OPEN MARBLE QUARRIES

Work Being Pushed to Fill Orders Already In—Some More of the Famous Ore Has Been Discovered.

DEADWOOD, S. D., Oct. 7.—(Special.)—The paint manufacturing plant at Custer is now running full time and it is making a success. For several years the company, which is composed of Ohio people, has been experimenting with the iron and graphite ore of the Black Hills. The mill has been remodeled a number of times and large sums of money have been expended. The plant now turns out about twenty-four tons of ground paint pigment, which is shipped to Peoria, Ill., where it is mixed with oil in the company's paint shops. Three colors of red and three of yellow are manufactured. The colored material comes from a mine at Nahant, where there is a very large deposit of iron ore, bright red in color. The different shades of color are obtained by burning the ore either before or after grinding. Round down-draft kilns have been erected at the mill and in these the oxidizing process is accomplished. The mill also produces about twelve tons per day of graphite paint, which comes from ore mined at Oreville. The ore is about 50 per cent graphite. The mill gives employment to eighteen men and about twelve at the mines. The cost of producing the pigments has been reduced at this plant low enough to make it a successful enterprise. The ground material is put into sacks and shipped in carload lots to the mixing plant.

To Work Marble Quarries. The Yale Mining company was organized this week by C. C. Curtis of Vassar, Mich., and L. C. Holland of Saginaw, Mich. Both men are directors of the Black Hills Porcelain Clay and Marble company. The new company has purchased three claims, located five miles southwest of Custer, and owned by B. R. Wood and T. F. McLaughlin of that city. Three separate veins of white quartz ore run through the claims and very rich assays have been obtained, some of them as high as \$500 per ton free milling. A general average of the ore is placed at \$40 per ton. The company is capitalizing at \$1,500,000 at \$1 per share. The company will commence developing the best vein immediately with a deep shaft. All around this ground are mining companies actively engaged in developing properties. The North Star Mining company of Omaha has a shaft 200 feet on an eight-foot vertical of ore that will average \$15. The Globe Mining company has a shaft 50 feet deep adjoining the North Star on the south, the Grand Junction mine has a mile north, the Old Bill a short distance southeast and the University Mining company has commenced a shaft about a mile northeast. The Black Hills Porcelain Clay and Marble company has purchased a lot of machinery in Chicago to be used for cutting out the white and argentine marble at the quarry five miles northeast of Custer. The Burlington Railway company has pledged the president of the marble company to put in a railroad from Custer to the quarry just as soon as the material can be gotten together. The survey has already been made. The marble company will bring in a number of experienced marble quarrymen from Vermont. N. H. Darton, superintendent of the United States geological survey in the Black Hills, has made a careful examination of the deposit of lithograph stone west of Custer for a report which he is making for the government. In his report he will say that the deposit is of the finest quality lithographic stone equal to the Bavarian product. He will state that getting into the mountain a reasonable distance, away from the atmospheric influences, that blocks of merchantable size can be secured, which will then make one of the most valuable enterprises in the Black Hills.

PROHIBITION LAWS INEFFECTIVE.

Rev. Herring Denounces Saloon Question Before His Congregation.

At the First Congregational church Sunday morning Rev. Hubert C. Herring, pastor, preached on the subject of temperance. The speaker did not pretend to have anything new to say on this theme, his purpose being merely to stir up his congregation to greater effort in fighting the saloon. At the close of the service a meeting for men was held, at which was mapped out a plan of campaign against the liquor traffic in Omaha.

The pastor opened his sermon with a brief historical sketch of the temperance movement within the last century, showing how it had changed from the advocacy of moderation in the use of alcoholic beverages to total abstinence. "Moderation," he said, "means just what it means, developing to mean, and so it virtually means nothing. It did not take long for the early crusaders to learn that total abstinence must be their battle cry if they hoped to accomplish tangible results."

"I have lived in states that have prohibition laws, and from my observation of their effect I cannot say that I would be willing to continue the experiment. The saloons disregard them in a way that is discouraging to the moral elements of society."

"There are 246 saloons in this city and each of them is making enough money to pay \$1,000 a year license. It is reasonable to suppose that Omaha pays \$1,000,000 a year for liquor. Have you done anything to embarrass this traffic and to help expiate the evil? If not, then take your share of the blame for its existence."

CAREY, DIED.

CAREY—Fred, son of John L. Carey, Saturday night.

Funeral services Monday at 3 p. m. at the residence, 1312 South Thirty-second street. Interment at Shenandoah, Ia.
