When it is taken into consideration that the weather has not been conducive to a rapid movement of winter goods, and also when the political situation is called 'to mind the present demand is rather surprising. Trade out in the country seems to be of very liberal propertions and there is no doubt but what proportions and there is no doubt but what retailers will experience an enormous de-mand immediately after the first cold wave. They seem to realize that fact and are keeping their stocks in good shape so as to be prepared for the rath of business when it does come. Jobbers, of course, have not experienced a very heavy reorder business have to whop to the fact that retailers' stock are not sufficiently broken to make heavy purchases necessary. A great im-provement, however, is looked for in that time before long. Spring business is coming along in good shope and indications at the present time are that jobbers will have greater success in handing advance business than ever be-fore. BRAN-412 VEGETABLES.

In binding advance business than ever be-fore. The markets have not fluctuated to a very great extent since last report. With few exceptions prices have been well main-tained and the general tendency is by no means in the direction of lower quotations. Every one seems to have great condence in future values in practically all lines and as a result the market could not well be in a more healthful condition.

## Coffee Market Wenk.

Coffee Market Wenk. The heavy receipts of coffee at all ports, which was referred to a week ago, still continue. This is somewhat in the nature of a surprise to most people in this country in view of the persistent reports sent out earlier in the season of a short grop. As a result of the increase in the visible supply the market has been weak and prices are now '4 cent lower than at last report. It is thought by some that the heavy receipts are accounted for by the fact that very few growers in Frazil are holding onto their erop, as they are analous to market it, owing to the disturbed financial condition of the country. The fact remains, never-theless, that the crop is larger than pre-dicted.

theless, that the crop is larger than pre-dictud. There has been no change in sugar quota-tions since last week. The new crop of raws is now arriving on the market, which is relieving the shortage. The demand for the relined, however, continues exception-ally heavy and as a result the market is firm at last week's quotations. Owing to the continued warm weather most lines of dried fruit remain unchanged. Predictions, though, are still being freely made that higher prices will rule as soon as colder weather arrives, which will stimu-late the demand. Evaporated apples have already advanced from 's to 's cent. This is owing to the heavy winds in New York and Michigan, which did considerable dam-age to the growing crop and as a result not age to the growing crop and as a result not as many apples will be evaporated as was previously expected. The canned goods market continues in a

The canned goods market continues in a good, strong position. This is particularly frue of eastern peaches and tomatoes and the same may be said of California peaches. It is reported that the extra standards are well cleaned up, which accounts for the firmer feeling.

Good Demand for Hardware. Local hardware jobbers are having just about all the business they can handle. The demand for all kinds of cold weather goods is exceptionally heavy and in fact if his stated that never before was such an enor-mous trade experienced in this city as is going on at the present time. In spite of that fact jobbers figure that a drop in ter-perature would make business still more

New York Dry Goods. NEW YORK, Oct. 20 --DRY GOODS--As election approaches there appears to be more of a desire on the part of buyers to delay operations until after that date. The market today has shown no sign of weak-ness in any direction, but a general quiot has provailed, owing to the absence of buy-ers, the general rule for Saturdays. Staple cottons, moth brown and bleached, are in quiet demand, but with small stocks on hand agents are not pushing their sale. Prints are well sold ahead, with no pros-pect of change in the immediate future. pect of change in the immediate future.
