Wall street: Wall street has at last broken loose from its protracted impatience, and for reasons that do not need much explanation. For come months part, the largely preponder-ent sentimen has been that stocks, espe-instring those of the railroads, have even intrinsically unusually cheap. And yet there has senreely been an influential operator who has cared to turn this gen-eral cheapmens to speculative account. No doubt, this showees of built speculators in mereasting conservatives in speculation, for it is generally consider on the stock ex-change that the loading operators have been mere cautions about participating in campaign vertures than in former years. But anart from this feeling of caution, there have seen factors which directly connected postponement of speculative chemes, and throughout the summur and increasting for an attitude of waiting, and if has been regarded as wise policy to allow the market is drift until those uncer-taining for an attitude of waiting, and if has been regarded as wise policy to allow the market is drift until those uncer-taining for an attitude of waiting and if has been regarded as wise policy to allow the market is drift until those uncer-tainings on both these points have undergone a change which is widely con-tainties and become matters of the past. Within the last week to two, however, the probabilities on both these points have undergone a change which is widely con-trued as placing both in the list of cer-mines. 8,284 10,700 7,456 5,785 6,166 10,674 6,620 8 ing says: "There are fifteen brigade sta- solidifies and becomes a thin rod or cord, Wall street A BUSY BRIGAND THIS. tions in Berlin, each of which is served by a closely resembling the fine gut strings of a special network of fire alarms. #### Way Cleared for the Balis

Way Cleared for the Halls. Contemporaneously with this maturing of opinion on the issue of the elections the bucertainties surrounding the near future of the money market have been virtunity dissipated. The outflow of currency to the interior has evidently truched high water mark and need no longer be regarded as a factor fostering heettation about buying securities. Further, the rate at which gold is coming hither from other countries is nure evidence that New York is no longer likely to suffer any net loss of money from the vieward or southward, shipments, indeed, the fact that we can get money from Europe in any amount to suff or powerlence, removes the money market from the list of possible obstacles to an upward movement in stocks, and clears the way to a buil campaign sooner than mas been expected.

way to a bull campaign sooner than has been expected. The Chicago Board of Trade has been mgaged all summer waging war against the bucket shops, and has summarily dealt with several of its members for having had connection therewith. The governors of that institution have also ordered all public quotations stopped, and are now or-entries that relations between sorters as to

had connection therewith. The governois of that institution have also ordered all public quotations stopped, and are now or sandzing their telegraph services as as to iceop the quotations within their control ind from being obtained by bucket shop tenters. It may become necessary for all street limits exchanges throughout the numbers of wall street and other leading the recent stagnation in the commission the recent stagnation in the commission of the various exchanges. The New York licek exchange has not been functive in this great deal of the special meeting of the great deal of the section that the Chicago Battor of Trade has lately done. It may, how were, be found necessary to do so later on before the country is rid of this great with the section that the Chicago Battor of the sechange on April 19, 18%, resulting in the exchange on April 19, 18%, the exchange feels toward bucket shop the incomest of the exchange on April 19, 18%, resulting in the exchange on April 19, 18%, the exchange feels toward bucket shop the incomest of the exchange on April 19, 18%, resulting in the exchange on April 19, 18%, the kerchange feels toward bucket shop the feeling of the people toward a bond in the past to issue bonds for the erection of the exchange on April 19, 18%, the kerchange feels toward bucket shop the feeling of the people toward a bond in the past to issue bonds for the erection of the change feels toward bucket shop the feeling of the people toward a bond in the past to issue bonds for the erection of the change feels toward bucket shop the several with one of the use of the ware and the New York Stock exchange feels toward bucket shop the feeling of the sched debt. The ho long residence in South Omaha Mr. Smiley with the suggestion and today the result culist's point of view, and makes the use short. The rail sections will be 300 feet. has been quite prominent in politics, being is grateful to gods and men. Why cannot of efficient shades imperative. While the Between each will be an expansion joint of efficient shades imperative. While the eye adapts itself automatically to the sur-rounding illumination, it takes some little time for the retina to adjust itself to dif-ferent degrees of light. So that for the eye to come into a brilliant light after being in a dark place is exceedingly trying to the nerves and muscles of sight. There is no surer method of causing sight troubles with the materials of the walls granite to the nerves and muscles of sight. There is no surer method of causing sight troubles with the materials of the for Alleged Frand. Mr. Jossiyn has an idea that we should rounding (illumination, it takes some little chairs on solid vitrified tile beds, supnot live altogether for self, but should con- time for the retina to adjust itself to dif- ported by an iron casting, to which they tribute to the happiness of others. When ferent degrees of light. So that for the are cemented. The roof of the power house

WASHINGTON, Oct. 21. Detective Ser-reant John J. Halpin and N. J. Hogan of the Chicago detective beadquarters, ar-rived in Washington today to take back To show the advantage of not having too great a contrast between the illumination f on the walls of a room and the source of light, Dr. Bell places a brilliant lamp un-shaded in a good-sized room and then ob-serves the effect of placing an opal shade over the light. The apparent illumina-tion of the room is increased by the ad-dition of the shade, although the actual iterit given off by the bright lamp has been

tributed or diffused light, as a saving to the eyes, and recommends that lamps should be plared in such a way that their filaments do not come in the line of the ordinary range of vision. Incandescent Lamps. The glowing filament of a modern in-
