Tailor-Made Dresses

There is quite a tendency to get away from the severe and plain effects so long shown in the tailor-made gown. Selling so many suits as we do, ladies car nearly every day see new styles in our store. The kind of dresses we show are much different, both in style and workmanship from those sold in many places. Every gown we show is a work of art. Pretty dresses, with just a sem-

GREAT FRAUDS IN KENTUCKY Patch:

(Continued from First Page.)

We made a hard fight in that state; we went for it for all we were worth, and, while we did our utmost and hoped for the best, we did not expect to carry it.

We have carried Kentucky and we have not yet given up hope of receiving its electoral vote and we do not propose to give up. We have carried the state and we propose to fight for it. "How about changes in the cabinet,

senator?" Mr. Hanna was asked. "You won't get a word out of me about cabinet positions. I have nothing to say about that. It is none of my affair." "It has been announced that you are a candidate for the presidency in 1904?"

"If I find the man who started that report I will kill him. I won't talk about that or allow any one else to do so. It is too absurd.

"Do you mean to say you would decline the nomination if it were tendered you?" "Well, something very like it. But I don't wish to discuss that at all. It is too

TAKE A RECORD.

See How Many Friends Are Hurt By It would be just as reasonable for a emperance advocate to drink a little di-

luted whiskey as to drink coffee, for one is as truly an intoxicant as the other, and persistence in the use of coffee brings on variety of chronic diseases, notorious among which are dyspepsia, heart palpitation (and ultimately heart failure), frequently constipation, kidney diseases, many cases of weak eyes and trembling condition of the nerves.

MITCHELL, S. D., Nov. 9.—(Special Telegram)—The Flandreau Indians played Dalota university eleven this aftercoon and the Indians proved weak adversaries. The score was 40 to 6 Flandreau so red in the last half on the fumble and a momentary opening in the Mitchell line. This is only a small percentage of the great variety of diseases which come from an unbalanced nervous system, caused by he persistent daily use of the drug cafteine, which is the active principle of coffee. Another bit of prima facie evidence about coffee is that the victims to the habit find great difficulty in giving it up.

They will solemnly pledge to themselves day after day that they will abandon the use of it when they know that it is shortening their days, but morning after morning they fail, until they grow to despise them el es for their lack of cont ol.

Any one interested in this subject would be greatly surprised to make a systematic inquiry among prominent brain workers in America. There are hundreds of thousands of our most prominent people that have abandoned coffee altogether and are using Postum Food Coffee in its place, and for the most excellent reasons in the world. Many of them testify that ill health, neryous prostration and consequent inability to work, has in time past pushed them back and out of their proper standing in life, which they have been able to regain by the use of good health, strong nerves, and great vitality, since coffee has been thrown out and Postum put in its place.

The land in question is situated on the locur d'Alene lake at the outlet of the
