LIVERPOOL STRENGTH SURPRISE TO WHEAT

Onts Dull All Day-Provisions Show Some Early Strength, but Range of Prices is Narrow with Little Ontside Interest.

CHICAGO, Nov. 19.- The feature of today's Board of Trade session was the flurry in November corn. Fear of a corner in that option caused an advance at one time of 24c. The close was at Pac advance. Leading futures in wheat and corn, though opening firm, were later affected by a big nercase in the visible supply and closed weak, December wheat he lower and December corn be lower. December outs deelined &c. Provisions were barely steady and closed unchanged to Big higher.

Wheat was active and strong for a time following the opening. Considerable strength was shown by Liverpool, where no strength was looked for; there was a decrease on passage, which also was unlooked for, and weather conditions were unlavorable, although this now is not much of a factor. There was also smaller world's shipments than expected. At the start there was fair buying by local professionnis, with some indications of covering by Saturday's shorts, although this did not at any time become prominent. Prices were irregular at the opening, but the market was quickly steadled by the amount of wheat offered by commission houses and for some time the market held about the top of the opening range. When the world's visible figures were posted, however, the market quickly turned weak and for the rest of the session the trend of prices was downward, support toward the end being almost entirely withdrawn from the market. The visible supply showed an increase of 1.638.000 bu. On the decline early buyers offered freely, but found considerable difficulty in disposing of their wheat. Northwestern receipts were \$86 cars, against 818 last week and 1.228 a year ago. Chicago receipts were decrease on paszage, which also was un-

of their wheat. Northwestern receipts were 866 cars, against 818 last week and 1,225 a year ago. Chicago receipts were 86 cars, one of contract grade. The total primary receipts were 1,32,000 bu. Seabonard clearances of wheat and flour amounted to 483,000 bu. December wheat opened at 71½/71½, compared with Saturday's closing price of 71½c. It sold at 71½c, then declined irregulariy to 70½c, where it closed.

Corn was irregular, active for November and rather dull for the other months. The opening in all options was firm with wheat and on the unfavorable weather. Shortly after the opening a jump of nearly 4c took place in November, due to fears of a squeeze, shorts scrambling for the infrequent offerings. Corn came out freely at the top, however, the leading selling being the speculator who is said to control the situation, and prices declined rapidly. December, after showing firmness for a time, declined on the heavy visible increase and in sympathy with wheat and closed weak and lower. Receipts were 469 cars. December ranged from 35%435%c. Oats were dull throughout. Early some strength was shown with other grain markets and with the unfavorable weather, but easiness developed in December later, as wheat and corn declined. Receipts were 124 cars. December ranged from 224x71%c. November closed at 22½c, an advance of 15c.

Provisions were dull throughout, but

Provisions were dull throughout, but showed some strength early in spite of the lower yard prices and heavy receipts. This was due mostly to sympathy with the grain markets. Packers were not in the market and little outside interest was shown. The range of prices was narrow. January pork closed 2½c higher at \$11.82½; January lard was unchanged at \$6.85 and January ribs 2½c higher at \$6.25.

Estimated receipts for Tuesday: Wheat, 175 cars; corn, 290 cars; oats, 250 cars; hogs, 32,000 head.

The leading futures ranged as follows: Articles, Open, | High, | Low. | Close. | Yes'y,

spite of the slightly firmer money rate here and an easier rate in London. The supply of grain and cotton bills has been much diminished and exchange experts surmise that the firmness of exchange indicates an accumulation going on for some purpose, probably subscriptions to foreign loans. The volume of business in bonds as well as in stocks was considerably diminished, but prices of bonds held firmer than those of stocks. Sales were of the par value of \$2.395,000. United States refunding 2s and 3s advanced 14 and new 4s 1/8 on the last call.

The following are the closing prices on the New York Stock exchange:

TIDE OF TELEPHONE TALK.

Ebb and Flow That Come to the Hello Girl Over the Wires. "It's very curious how talk ebbs and flows over the wires," said a New Orleans telephone girl. Low tide is at 1:30 in the morning. Around that time several minutes will sometimes clapse when nobody in this whole big city is using the 'phone. When you come to think about it, that is

something very remarkable. Between 1 and 2 o'clock the calls will average from 180 to 180, rarely more, but, for some reason I was never able to understand, business always picks up between 2 and 3 in fact, it nearly doubles. Then for enally mysterious reasons there is another full and the hour between 3 and 4 is almost as quiet as between 1 and 2. I have often tried to figure out some theory for those two curious fluctuations, but have never even hit upon one that was even plausible.

"After 4 o'clock, however, there is a steady and continuous increase in the stream of talk. We girls who have been in the exchange a good while get to know exactly how the city wakes up. The market men head the procession and then follow the different tradespeople and clerks and office employes, according to the necessities of their various callings. All of them use the 'phone more or less and it is very curious and interesting to watch the graduations by which the community settles down to its day's work. By 9 o'clock the rush of traffic has become something tremendous and it grows by leaps and bounds until it reaches a climax at 10. From 9 to 10 the calls often exceed 4,000. Then there is a slight falling off, becoming more marked as the day advances, and between 4 and 5 nine-tenths of the business 'phones have subsided But, oddly enough, the residence 'phones at that juncture suddenly take up the tale and their heaviest business is between 4 and 6. I suppose the business folks are through then with the main cares of the day and have a little leisure for long-distance gossip. Throughout the early even-ing calls don't vary much one way or the other and with 9 o'clock they begin to dwindle steadily down to 1:30, which, as I said before, is extreme low-water mark, "How many calls can a girl attend to in an hour? Well, I have made connec-

tions for 200 talks between 9 and 10, exclusive of the numbers I reported as busy." Editor been Wonders. Editor W. V. Berry of Lexington, Tenn.,

in exploring Mammoth cave, contracted a severe case of piles. His quick cure through using Bucklin's Arnica Salve convinced .im it is another world's wonder. Cures piles, injuries, inflammation and all bodily eruptions. Only 25c at Kuhn & Co's.
