This course offera simple and practical instruction in agriculture for eleven weeks at a season of the year when farm work is least pressing. Requirement for entrance is simply a good knowledge of the primary English branches as taught in the district schools. The subjects that will be pursued the first year are: The soil, dairying, horticulture, stock raising, diseases of animals, plant pests, engineering and carpentry and blacksmithing. In the second year the student is given an opportunity to pursue work in field crops, soil laboratories, farm accounts, horticulture, stock breeding, injurious insects, mathematics and agricultural engineering. The estimated expense for the eleven weeks' course is between \$35 and \$40, proportioned about as follows: Room rent, \$9; table board, \$24; books, \$3; shop deposits, \$1; registration fee, \$1. Excellent facilities are provided at the university for giving this instruction. The new farm school building, erected last winter at a cost of \$30,000, provides ample lecture room to have stolen five horses from a widow for classes. The dairy hall is large and well equipped and there is also in the same a stock judging room and a laboratory for soil study. A veterinary hospital and

an agricultural chemical laboratory are also located at the farm. to inflict injury upon the other. No Place for Color Line. Realizing the necessity for the unity of the wage earners of our country, the American Federation of Labor has upon all occasions declared that trades unions should open their portals to all wage-workers, irrespective of creed, color, na-tionality, sex or politics. Nothing has transpired in recent years which has called for a change of our declared policy upon this question; on the contrary, every evi-dence tends to confirm us in this convic-tion; for, even if it were not a matter of principle, self-preservation would prompt the workers to organize intelligently and to make common cause. In making the declaration we have, we do not necessarily proclaim that the social barrier existing be-tween the whites and blacks could or should be felled with one stroke of the pen, but when white and black workers are com-piled to work side by side under the same adverse circumstances and under equally unfair conditions. It seems an anomaly that we should refuse to accord the right of organization to workers because of a difference in their color. Unless we shall give the negro workers the opportunity to organize and thus place them where they can protect and defend themselves against the rapacity and cupidity of their employ-ers, unless we continue the policy of en-deavoring to make friends of them, there he against any effort made by us for our conomic and social advancement, but race prejudice will be made more bitter and to the injury of all.
