Almost Every Avenue of Expense Shows an Increase in Prospect and the Returns Are Not All In.

LINCOLN, Dec. 7 .- (Special.)-For maintaining all state offices and institutions, for for all other expenses of conducting the be asked to appropriate \$2,721,001. This amount is \$122,628 in excess of the total of of 1899 and does not include a lot of deficiency claims that will be presented from various institutions. Neither does it in-clude the loan of \$20,000 made by D. E. Thompson for the transportation of the First regiment home. It is estimated that the total of claims yet to be presented will amount to possibly \$300,000, which will bring the grand total up to nearly \$3,000,000. The legislature will be asked to appropriate money for bounties of innumerable variety and this item alone will form a large portion of the balance of appropriations yet to be asked for.

The legislative appropriations of 1899 included approximately \$300,000 for new buildings for the various state institutions. This year the demand for money for that purpose will not be quite so heavy. The university will ask for a new building for the department of physics and several of the other state institutions will ask for the contaruction of additional buildings, but the total will not far exceed \$150,000 or

Difference Made by Election.

Many of the estimates filed with the state auditor were prepared before election, which probably accounts for the fact that they are so large. In locking over the files it is noticeable that many of the estimates filed before election asked for increased appropriations, while those filed after election asked for decreased appropriations. As a rule the state officers ask for about the same amount of money that was allowed | O. W. Nelson of Plorence Relieved of by the last legislature. For the support of the Nebraska National Guard Adjutant General Barry asks for an increase of \$16,-447, a portion of which, however, will be for deficiency claims.

The university asks for the largest appropriation, \$615,500, but of this amount only an appropriation of \$224,000, being the same two years.

CHARLES OF THE PROPERTY OF THE Members of the fire and police departments are wondering how they are going. curing the money needed to carry the departments until next August.

At the commencement of the fiscal year last August the amount available for police purposes was \$8,330, and for the maintenance of the fire department \$5,025, A portion of both of these funds were used in taking up an overlap and this accounts for the early exhaustion of the funds. Just now the police department is costing \$1,200 month. It will thus be seen that \$9,600 is needed to carry the police until next August, when the 1901 levy will be available and \$4,400 for the fire department. With the installation of a new fire hall the expenses of the department will be increased fully one-third, so that at the conclusion an overlap in the fire fund of \$7,000.

What is worrying the members of these two departments is the fact that they cannot sell their claims. None of the banks in the city will discount the paper, as has been customary in the past, neither lation handle fire or police time checks. To make matters more complicated, there will be no revenue in the spring from the saloen occupation tax. This will leave the city with \$18,000 less revenue than it usually has. Frequently this occupation tax, which is paid in May, has been used to pay firemen and policemen, but as there can be no occupation tax next year, on account of the license being raised to \$1,000, these wo departments will suffer. Warrant buyers seem to be afraid to take hold of city securities just at this time on account of the feeling of insecurity which surrounds the municipal officers. No one seems able to tell whether there will be an election in the spring or not and this uncertainty has scared buyers of municipal securities. The fact that the \$70,000 in funding bonds have not been sold is also taken into consideration. Under existing conditions the plaintiff. Vinduct Work Delayed. Chief Engineer King of the Union Stock

Yards company is complaining about the delay in receiving oak planking for the Q street viaduct. Timbers for the supports were ordered from Oregon at the same time the planking was ordered from Misand out of the opera house between 9 souri. The timbers have been here for o'clock and 11:30. At 1 o'clock the casket some time, but work cannot commence until the plank reaches here. In speaking of this matter yesterday Mr. King said that he was anxious to commence work on the bridge before real cold weather sets in. All arrangements have been made for labor and material and it is now eight; days since the oak planks were ordered It is the intention of Mr. King to place these planks on edge so as to make a roadway which will last for a number of years. In order to support this weight great timbers of extra length were sent from Oregon. When the repairs to the bridge commence the bridge proper will be closed to traffic, but the footpaths will be kept open. The running of main line motor trains on West Q street will have to be discontinued while the repairs are in progress, but it is presumed that a stub line will operate from the west end of the bridge to the end of the line at Thirty-ninth street. longing to Isaac Krasna, destroyed last to be discontinued while the repairs are Mr. Krasna had insurance to the amount bridge to the end of the line at Thirty-

Hospital Incorporation. The women composing the South Omahi Hospital association will meet on Tuesday, December 18, for the purpose of talking over the matter of incorporation. Articles of incorporation were drawn recently by At a special meeting of the council last City Prosecutor Henry C. Murphy, but have not yet been approved. Those who compose the association are willing to be liable for a limited indebtedness, but do any really new cases and the danger of not care to go into a deal without fully uncontagion is being avoided by the council's derstanding the matter. When a clause limiting the liability of the incorporators is added to the articles already drawn it will most likely be signed by those interested. In the meantime the sale of buttons for the hospital building fund goes on and money is coming in every day from this source. The hospital has an unknown friend who for two months past has sent \$50 in cash to the association. This donation of \$50 a month along with the \$25 given by the city each month assists greatly in keeping up the work of the association

Newspaper Consolidation Off. It is understood that the proposed con solidation of all of the local newspapers has been declared off. The owner of one of the plants is not favorable to the consolidation and unless he is paid his price will refuse to enter into the agreement. Mayor Kelly is at the head of the movement and it is understood that he wants a sheet which he can control. All the talk about baying an Associated Press report is considered as bosh, because no paper published in South Omaha can afford to pay for these reports if it could secure them, which is doubtful.

Labor Convention Ends in Walkent.

NEWARK, O., Dec. 7.—The Ohio Federation of Labor convention came to a close this afternoon under the stormiest conditions which ever marked a session of that body. Dayton, Mount Vernon, Newark and Columbus delegates withdrew from the convention and from the federation near the close of the proceedings.

A peculiar condition existed, in that a minority of delegates had a majority of votes and in that manner controlled the work of the body. It was during an attempt to amend the constitution to do away with this condition of affairs that the final uproar and walkout occurred. Labor Convention Ends in Walkout

One of the greatest foes with which every family has to contend is our changeable climate. To protect the family from colds and coughs is always a serious problem and often impossible.

Sconer or later it is the inevitable fate of every one to catch cold. Care in avoiding exposure and the use of proper clothing will protect from the frequency and perhaps the severity of colds, but with the greatest of precautions they will come.
