White Wings Tebean Gets a Splendid Location for His Kansas City Grounds, While Manuing is Away Out of Town.

T. JOSEPH, Mo., Dec. 28 .- (Special Telegram.)-President Hickey of the Western Base Ball league returned from Kansas City this evening and says that the announcement by a Kansas City paper that St. Joseph would be dropped out of the Western league circuit was unauthorized and without foundation. President Hickey does not look for any such thing to uccur. Mr. Hickey will leave the city totomorrow for Chicago, Indianapolis and Louisville and the last two named cities may become members of the Western league. A Western league magnate said this evening that the Western league circult for 1901 will be composed of Indianapolis. Louisville, Kansas City and St. Joseph in the eastern division and Omaha. Des Moines, St. Paul and Minneapolis in the western division. Denver, Pueblo and Sloux City will be left out in the cold.

KANSAS CITY, Dec. 28 -(Special Telegram.)-Manager Tebeau of the Kansas City Western League Base Ball club proved today that he is not frightened over the action of Jimmie Manning in locating an auxiliary American league team here. Tebeau this afternoon signed a lease on Shelly park, the most accessible tract for a ball grounds in the city, took out a permit for fence and stands and left tonight for Chicago to complete his team. Shelly park is right down town, only half a dozen blocks from the junction, and if there is anything in location Mr. Tebeau's club will start out with a big advantage over Manning's. Manning's American league grounds, for which he signed a lease yesterday, are out three miles on an old :a-

Opposition League Plans.

CHICAGO, Dec. 28.-At a meeting held this afternoon and evening in the Great Northern hotel, the Western Association of Professional Base Ball clubs was formed No officers were elected, this action being deferred until next Wednesday, when an adjourned meeting will be held in this

The members of the association so far determined upon are: Kansas City, Minneapolis, Detroit, Louisville and Toledo. Eight clubs in all will comprise the association, but those present at the meeting today declined to say what the three other cities would be, saying that they would be made from a list of half a dozen places which made application for membership. The names of these places were also kept secret, but it is known that among the number were Rockford, Ill., St. Paul and Grand Rapids, Mich. It is known, too, that if the American league shall drop either Buffalo or Indianapolis the one dropped will certainly be taken in. A constitution and bylaws were drawn up and adopted and it was then decided to postpone the meeting for several days, until opportunity shall be given to look over the field and decide which cities of those making applications for membership shall prove the most desirable members.

The management of the association will be under the patronage of the American league, as several of the magnates of that organization were present to lend their adsociation. The presidents of the local organizations which are already in the organization will be as follows: Kansas City. N. B. Carskadon; Minneapolis, Clarence Saulspaugh; Detroit, Thomas Navin; Toledo, Charles Stroebel. No announcement was made as to the president of the Louisville club, and when his name was called for it was announced that it would be divulged at a later date.

All those present at the meeting today expressed themselves as more than pleased at the outlook for a successful season and said that there would be no trouble in getting desirable members to complete the organization. It is not a question of obtaining members, they claimed, but of selecting the most desirable from among those who have already made application for membership.

Figurehead for Manning. KANSAS CITY, Mo., Dec. 28.—(Special Telegram.)—N. B. Cuskadon, president of the new Western association, is a Kansas City attorney with offices in the Massachusetts building. He is a "fan," but has never had any connection with base ball affairs. He has been selected by the local syndicate of which the team is to be the representative. The other members of the syndicate will not be known until the leauge has been fairly established. Jimmle Manning will really control the Kansas City club.

## HOW TO KILL OFF THE HOPPERS UNCLE SAM SUES ABE JONES

Nebraska Man Debates the Severa Methods Used for Destroying the Insect Peats.

The introduction of alfalfa into the westprize fights for money that might take place ern portion of Nebraska has tended to localize or concentrate the summer grasshopper and in some neighborhoods in the Platte and Republican valleys there has been quite a decided increase in their numbers. When breeding on the prairies it is not unlikely that these were kept in check to some extent by prairie chickens and quail. This species of the grasshopper does not now breed very abundantly on the table dal meeting of the Western Turf congress lands. In those localities the grasses dry out early in the season and there is a tendeucy of this family of grasshoppers to move to the cultivated areas, where crops remaining succulent longer and later in the ber deposit their eggs. > The female grasshopper deposits from sixty to eighty eggs in a little sac standing in an upright position in the ground, and deposits in ground firm enough that the sand may not run in and fill the hole while the eggs are being deposited. It is hardly possible to deposit them in very loose sand, and not usual in surface soil kept loose by cultivation. They seek the soil compact enough to stand while making the little cavity and depositing eggs. The placing and protection of the eggs seems to be nearly the last work performed by the female. They are likely to be found in great numbers in alfalfa fields, near the edges of cornfields, along the banks of irrigation ditches, and wherever an abundance of plant food had gathered them together at that season of the year.

They leased some hundreds of acres of alfalfa lands and concluded that the best way to fight them was to disc and harrow the alfalfa fields, in this way displacing and de stroying the egg sacs. It was feared that the discing of an alfalfa field would split and destroy the crowns of many alfalfa plants and thus lessen the yield. Contrary to this expectation it was found that the movement of the surface of the alfalfa field in some way stimulated an increased growth, and for the season accurate tests showed that the yield exceeded by 50 per cent the yield of fields not so treated, giving not only the advantage of the destruc-

Pullman Estate Largely Increases. Pullman Estate Largely Increases.
CHICAGO. Dec. 28.—According to a report filed today by the executors of the estate of the late George M. Pullman, the assets of the Pullman family have increased \$6,000,000 since the death of the sleeping car magnate a little over three years ago. The accounting made today to the probate court shows that the estate is now valued at \$15,000,000, as against \$9,000,000 at the time it was turned over to the executors. The tremendous increase is largely due, it is said, to the increase of the value of the stocks, bends and similar property during that period.

A large portion of the Pullman millions was invested in property of this kind.
