Men Interested in Formation of New American Association Gather

NEW YORK, Jan. 16. Delegates to the new base ball association, which may be formed in New York this week, arrived in town today. H. R. Kick represents Philadelphia, H. D. Quinn Milwaukee, H. A. Havener Chicago, W. A. Watkins the Indianapolis club, Harry Pulliam the Louiswille club and Arthur Irwin the Boston club. Other delegates will reach this city tomorrow.

A meeting is to be held tomorrow, at

The World tomorrow will publish a statement saying that the result of the recent assembling of magnates came to light yesterday. It was a bold swing to give the Frotective Association of Professional Base Ball Players a black eye by inducing two prominent lengue players to sign contracts for 1901 and thereby break the agreement existing among the ball players. A few days ago F DeHans Robison, president of the St. Louis club, sent for Pat Donovan and Jesse Burkett, members of last year's St. Louis team, to come to this city and consult with him about the make-up of the team. The players responded, and what followed is best described by their own statements:

lowed is best described by the a contract to ments:

"Mr. Robison offered me a contract to manage the St. Louis team," said Donoyan, "at a salary that would be highly satisfactory to me. I am a member of the Base live association and told Mr. Robison that in fustice to himself and my self I could not sign now. I told him if I signed now, and afterward the players were forced to accede to the league, my place would be anything but pleasant as manager of the team." ager of the team."
"I was offered a good toll," said Burkett. 'to sign a contract for next season. I have been in Mr. Robison's employ for ten years and always found him liberal and square. But under the present circumstances I had to refuse to sign.

American Lengue Committee Leave for the East to Start Club in Soden's Town.

CHICAGO. Ian. is.—President Ban B. Johnson of the American league left tonight for Cleveland. There he will be joined by C. W. Somers, who is carrying on negatlations for an American league club in Boston, and the pair will proceed cast, visiting Washington, Baltimore, Philadelphia and Boston. Since the defection of Watkins of Indianapolis there is no longer any concealment of the fact that the American league purposes entering the Hub. any concealment of the fact that the American league purposes entering the Hub.
Speaking of base ball conditions Mr.
Johnson said: "Boston is a good city. It is
now only a question of time and unless our
plans fail we will have a club there this
year. Watkins is too strongly under Nationel league influence and the influence of
John T. Brush for us to care much about
his actions. Indianapolis has always been
a trouble-maker and the club has marred
the harmonious workings of our body. Connidentially, its withdrawal will be a been,
although I have a marked respect for Watkins' base ball ability."

NEW YORK, Jan. 16.—The World says:
Yale and Harvard will meet Oxford and
Cambridge on track and field again, and
the athletes of the American universities
will endeavor to wipe out the defeat they
received at the hands of the English students in the summer of 1859.

Arrangements have been in progress for
some time in the hands of the prominent
alumni of the universities and are now well
along. Great secrecy has been maintained
by all who are in any way connected with
the proposed meeting, but it has been ascertained that negotiations were pending
and that E. J. Wendel, a prominent and
enthusiastic Harvard alumnus, to a certain extent represented his alma mater in
the matter.

The plan is to have Oxford and Camthe matter.

The plan is to have Oxford and Cambridge pay a visit here and have the contests come off on neutral grounds, preferably Manhattan field, New York.

Oxford and Cambridge May Come. NEW HAVEN, Conn. Jan. 16.—It can be stated here on high authority that although negotiations have not begun between Yale and Harvard and Oxford and Cambridge in regard to an athletic meeting this year, such negotiations may soon begin. The trouble heretofore has been the harmonizing of Vale and Harvard as to the place of trouble heretofore has been the harmoniz-ing of Yale and Harvard as to the place of meeting. There is now said to be a strong probability that Harvard will accept Yale's proposition for the selection of neutral grounds and that negotiations with the Englishmen can follow.

Opportunities Afforded by New Contury Conditions. Pifty years hence the great men of the world will be numbered by fifty thousands, writes Senator Depew in Success. Therefore, it is safe to predict that the young man of today has just as much chance of gaining success in the future as had the man who lived fifty years ago. The world multiplies by degrees and so the people become more numerous on the face of the earth. Idle territories, that are bound to increase and progress, will become the homes of this mass of human beings. Theirs is the power to create great cities, to erect new metropolises that will comnote with each other in the race for suc-

The boy of today has little to fear that the field is becoming overcrowded in our own country. It is just being opened. The only thing that will be a menace to his progress will be climatic conditions; for, with the growth of time, the country must expand from its temperate sections to those of the Arctic regions. There are some who say that, year by year, the terrors of the north gradually diminish, that the old world is passing through a certain cycle, somewhere in the vast infinitude of space that is making the temperature more genial and more even. If this be true, and we know not how true it may be, then the roung men of today, and those who are yet to be born, have conditions to look forward to that are far more favorable than they were to those of the past centuries.
