This he is compelled to do by the not tempt an early resident of lows or regulations, but it is no less provoking to he did for several months, the first post-Mr. Kountze. Later the office was moved into a general store on Chicago streat, be-tween Thirieenth and Fourteenth Areets, and the entire office consisted of an axehandle box separated into compartments.

Important Office Now.

Today the Omaha office is one of the most important in the United States, handling more mail than many offices in cities of larger size, and, in place of the single unwilling messenger, forty-cight trains are required in carrying mail in and out of the city.

In the handling of the outgoing mail nineteen clerks are constantly employed at the office. This mail comes to the office from the drops at the central office, from each of the three stations and from the collectors who gather it at short intervals through the day from the mail boxes throughout the city. When it is brought to the office it is an incongruous mass of letters, packages and papers. The clerks who first take charge of it separate the letters from the mass and arrange them with reference to their size. Letters of the ordinary size are then taken by other clerks, who postmark them. For the ordinary letter the method of postmarking has undergone a revolution in the last few Where a dozen clerks formerly postmarked them by hand, today an electrical machine, running at high speed, can- of the institute at this time. The children cels the stamps and marks the envelopes are in too limited quarters and lack many much faster than could be done by hand. things which would make their lot more In addition to its increased rapidity, the machine does much clearer work than could be done by hand and for this reason a hand machine, working on the same principle as the machino operated by the motor need of supplies " at the central office, has been placed at Station A and was used for the first time last week. The irregularly shaped letters are still marked by hand at the central office, but comparatively little hand stamp- 2098. ing is done. passed to other clerks, whose duty it is to secured for all these children and nothing Homer's "Idiocy." distribute them in the pouches. These must be left undone which will contribute ponches, arranged on large racks, are to their safety. We must have better famarked with the names of railroad routes cilities for caring for the children. In this running out of Omaha or connecting with emergency we are in great need of finanroutes leading from the city. Some pouches cial help and subscriptions, be they great bear the names of towns, in the case of or small, are heartily appreciated cities where Omaha mail is sent direct or expenses are materially increased by reain an irregular manner. Before the letters son of present conditions." are placed in these pouches they are distributed in a case, the compartments in DUNN PLAYS A DUAL ROLE the case bearing the names of states or of postal routes. At the Omaha office mail is divided by state only, with the exception of the states of Iowa, Illinois, Missouri, Kansas, South Dakota, parts of Wisconsin. Minnesota, Colorado, Wyoming, Utah and Montana. Mail for these states is not only lice court early in the week for stealing a distributed according to states, but also sewing machine belonging to a woman who with reference to the routes it will take in had been his housekeeper, has taken an apreaching its destination. serving as surety on his appeal bond.

But this man was not as hadly tangled be washed, and the institute is greatly in

electric lighting and telephone business. For this reason it is not to be assumed that any great financial benefit can be derived therefrom in the beginning, as it is more or less of a financial conjecture."

In his estimate Mr. Schurig states that 1,505,856 feet, or 285.2 miles, of duct would be necessary for an adequate system. This would necessitate 137,400 feet of trenches. Granting that the cost of laying terra cotta conduit is 14 cents per lineal foot, the expense of the conduits alone would be \$210,-\$19.84. Manholes, service boxes and other expenses would bring the cost up to about

\$300,000. The rental charges for ducts varies in An absent-minded fellow came into the different cities. The electrical commission library the other day scratching his head of Washington, D. C., considered 7 cents per and trying to remember the name of a lineal foot per annum a reasonable rental book which his wife wanted. He hesitated, and in Baltimore the electrical commission estimated that terra cotta ducts should rent and walked to the delivery window with for not less than 7% cents per lineal foot the air of a man who never fails to mail per annum and that 10% cents would be a reasonable price where the ducts had to be ventilated by artificial means. In Omaha

Street Cars Carry Mail.

When all the mail for a state or a route has been distributed it is tied in a bundle and marked to show its desination, the novel role of defending a man accused of distributing clerk placing his inithals upon a misdemeanor. It seems that McGovern the label, so that errors may be traced to was Dunn's client in a civil case, and when their proper source. As the sacks or he was arrested for an offense against the pouches are completed they are locked and statutes the relationship between them conplaced upon the platform for transmission tinued. Dunn did not appear in person in to the trains. And here again Omaha is in police court, but was represented first by the forefront of offices adopting the latest Attorney W. S. Shoemaker and later by means of transportation, as all of the firstclass mail matter sent out during the day is sent to the depots by means of the street office more time to get their mail on the trains. This system has been in use in Omnha for several years. It was introduced which Judge Learn was reversed. in Kansas City last spring. The papers and mails which leave at night are sent to the depots by wagons, which still carry the greater volume of the mail.

To the thirty-three regular mail trains and the fifteen express trains carrying mail, which leave Omaha daily, the office makes 102 dispatches each day, the consignments being divided so that the railway postal clerks can be at work before the trains leave.

Fifteen men have charge of the receipt of mails for the city. When the pouches arrive they are turned over to a number of clerks, who unlock them and pile the bundles of letters on tables. They are then untied and passed through a machine, which

places on the envelope the stamp of the receiving office. Other clerks then distribute the letters and papers, using for the purpose cases, the "pigeon holes" in which contain the numbers of the seventyeight carrier routes, the names of several institutions of the city receiving large quantities of mail, the lock boxes and the that the death of Peter was the result of general delivery. When the letters are distributed they are turned over to the carriers, to the lock box distributors or to the general delivery clerks. The work of the carrier begins when he has received letters from the distributing case, and it is thought he will recover from the Standing before a smaller rack he again distributes the missives, this time with reference to the residence of the person ad-By the time he has finished this than twelve hours his life hung in the balwork each letter is arranged so that it will ance. be found at its proper time along the route. Governor Dockery Against Honoring Requisition.

JEFFERSON CITY, Mo., Jan. 19 .- Gov ernor Dockery, after listening to a dramatic recital of the story of Miss Alma Bowman, now of St. Louis, who recently returned from her home in Shepardstown, Ky., to

avoid the alleged ill-treatment of relatives, today refused the requisition of the Governor of Kentucky for the return to that Sleepy, a big bay fellow who is now kept

the place of Jorgenson and Sherman at South Omaha Friday afternoon. If the property is ordered confiscated by the court ployed as additional counsel to advise the there will be a lively debate among the people of the sheriff's office as to the best way of doing away with the \$22 in coin that now peeps through the window of the slot machine.

CONTEST DRAGS TEDIOUSLY ALONG.

Parish-Shields Contest Case Still On in the County Court.

In the Parish-Shields contest the election judges of the First and Third precincts of the First ward, South Omaha, were examined yesterday. They declared that none of the election officers at the polling WOULD BE A DEATH WARRANT pinces where they were not that nothing of a fraudulent nature came within their observation. The witnesses identified the ballots returned from their respective precincts and then the counting by the tellers was resumed.

At noon the count of six precincts had been completed, rhowing a net gain of one vote for Parish.

Why He Didn't Pay Alimony.

Jons Thomsen appeared before Judge Easter Saturday to explain why he had not paid \$400 alimony to his divorced wife, as ordered to do by the court on December Jens simply stated that he had not complied with the order of the court because he had been unable to get possession of the required amount of cash, and Judge Baxter deferred his decision in the contempt procoodings.

Maley's Alleged Assailant in Jail.

Fred Stegeman, who is said to be the man who took a shot at Joseph Maley in a South Omaha saloon several weeks ago, is gether with Sheriff Collins of Bullett now safely lodged in the Douglas county county, Kentucky, presented the case to juil. He was arrested in Chicago and brought back to Omaha.

OUALIFICATIONS OF VOTERS

Section Covering Point Now Under Discussion in the Philip-

pines.

MANILA, Jan. 19 .- The section of the municipal code relating to the qualifications Mrs. Daly is Sole Executor and Gets of electors was much discussed today before the Philippine commission.
