COMMERCIAL AND FINANCIAL All News in the Wheat Market is of a Bullish Nature. OTHERS SHARE IN THE BENEFIT Corn and Oats Roth Close at an Advance of a Fraction and Provisions Climb Twelve Cents Higher. CHICAGO, Jan. 25 -News affecting the

wheat nurket was all builtsh today and the market ruled strong. May closing 1847 1840 over yesterday; other markets teneffitted by this strength, corn closing be-oats the and provisions a shade to 125pc higher

May wheat opened 1/11/1/c higher at 7512 to 75% c and sold early at 75% c, on a rather to make and sold carry at case, on a toru-quilet market. Higher cables, light Argun-tine shi, ments, moderate northwest re-cepts and a report that wheat in the La Plata pr winces was in a very bid condi-tion were the factors. Moderate amounts were sold on the bulge and a reaction to a strategies to the factors and a reaction to a strategies to the factors. Moderate amounts were sold on the bulge and a reaction to a strategies to a sold provide the sold of the market of the factors and spot, and pri-mary receipts showed a decided falling off. There was good buying by commosing houses and prominent professional colls. This buying spread regret among the cents for the early sales and the buying pressure caused a rally to 75% shortly after noon. Acting on the theory that it is time to sell when the market touched 76, some bears asserted themselves and forced May back to 75%. There offerings were so quickly taken and more asked for, however, that near the end of the session a sharp ad-and the close was strong. May 15% the higher at 75% that and receipts ser-forty cars, one of contract grade. Minne-apolls and Duluth reported 25 cars, against to wance from this price to 7. took dar-and the close was strong. Cotion Market. NEW YORK, Jan, 25.-COTTON-Tight-ness in the January position, due to ner-vous demand from shorts rather than to any extra effort on the part of the bulk clique, was easily the feature of today's developments on the Cottoa exchange. Speculation was very small and quite of a professional turn. These was not much in the way of news and not until the January deal began to work itself out was there any important changes in values. On the call the feeling was steady, with the price un-changed to 3 points lower. Covering soon restored the entire list to last night's basis, after which a point or two range constiis 2 feet 2% inches harrower than the Co-lumbia, and its draught is just the same as the Columbia-20 load. Its water line is 99 feet and originally it was over 142 feet over all length, but this has been cut down in the after overhang; and across the stern, where it originally measured 9 feet, it has been made a foot wider. From the after end of the water line the stern post is 12 feet are overhang. The same is true of calves and stags. The few feeders offered today sold at good firm prices. Yard traders have very few calle on hand, and as a result they were all anxious to buy some. Prices did not show any particular change, however, and the situation could best be described by calling it a good demand today and the same was true of she stuff. Representa-tive sales. restored the entire list to last night's basis, after which a point or two range consti-tuted fluctuations up to the noon hour. The current month shorts were made extremely uneasy by talk of a small "insight" for the week and higher prices in southern mar-kets. A turn to cover was soon decided upon and for the rest of the afternoon buy-ing by January shorts was the feature of business done. From outward appearance longs made no effort to the 'the shorts at a disadvantage. Later January touched 10.10. end of the water line the stern post is 12 feet 9 inches under the water. The stern-post then rakes at an angle of 45 degrees, and from the point where it meets the planking of the hull to the heel it measures 23 feet. From the underside of the arch-board in the stern heel to the stern post measures 33 feet 6 inches In the half threadth plan, in the wake of the fore end of the water line, it measures 16 feet 7 inches out to the outer edge of the deck and at the end of the water line. The for-ward overhang is 26 feet and the after over-hang 24 feet 6 inches. In the shape of the longitudinal section. except that the center of the lateral re-sistance is three feet farther aft than it is in the Columbia, the boats are very much alike. In area of lateral planes Crowninshield has made a gain over the Columbia, having about fifty feet less. The center of the about fifty feet less. The c feet 9 inches under the water. business done. From outward appearance longs made no effort to trår the shorts at a disadvantage. Later January touched 10.10. This advance caused the rest of the list also to improve sharply. A few moderate-sized buying orders from the south and an advance of in spot cotton here helped the market. At the close the market was steady, with prices 2019 points higher, with the exception of February, which was nominally 4 points net lower. lateral resistance in the Columbia is fiftyone feet, while in the Lawson boat it is fifty-four feet baft the face of the stem at the load water line.

In the midship sections of both boats there is great similarity. Each has a sharp dead rise, and except that the bilge in the Lawson boat drops a little below that of the Columbia, thus showing that it has more stability of form to the section than the Defender of 1899, the boats, in regard to this all-important factor of the greatest transverse sections, are very close, as is shown by the areas of the midship sections, which are as follows:
