

The Liquid Air Lecture.
Some of the experiments that will be shown at Boyd's theater Thursday, January 21, by Mr. Palmer:
Liquid air is exhibited so that all can see it and some explanation given of its nature and properties.
Dipping handkerchief in liquid air—it still remains dry.
Spectacular experiment with frozen roses, rendered brittle, but retaining their color.
An ordinary rubber ball is bounced, then being subjected to liquid air it becomes hard, after which it is smashed on the floor like glass.
Showing air in vacuum bulbs.
Welding steel pens.
Strawberries or cranberries frozen while steel pens are welded in same glass at the same time.
Crushing of tin flippers, strips of tin and copper, like so much paste-board.
Humorous experiments with steaks, eggs, fruit and other substances frozen in liquid air.
Spectacular experiment of a spray of the liquid air.
A plug driven with force into a vessel containing liquid air is quickly blown out—showing expansive power.
A steam whistle is blown by using a small quantity of liquid air in a tube; ice gathering on the tube.
An ice made of frozen alcohol, and whisky and other substances ordinarily difficult to freeze are easily frozen.
Nails are driven with a hammer made of frozen mercury.
Specific gravity.
A kettle of liquid air boils on a cake of ice, steam issuing freely from the spout.
A kettle is placed over a fire and ice is formed therein while actually over the flame.
Illustrating the medical uses of liquid air.
Combustion of cotton.
Burning of hair felt.
Spectacular experiment of burning carbon in a tumbler formed of ice and containing liquid air; the burning carbon not melting the ice. A marvelous contrast in temperatures.
Seats on sale. Price, 50 cents.

GLASGOW, Jan. 26.—The smallpox epidemic here is somewhat alarming. Twenty-nine fresh cases were reported today and hundreds of cases are in the hospitals.

WE'LL DO IT
The Cramer Chemical Co. writes us they would have a full page ad in the Sunday Bee and ask us to call attention to it in our space. It seems to us ridiculous to do it but we will. It strikes us funny that a big concern like Cramer's should ask us to do this—for if you can't see their ad without this mention you'd better get a new pair of glasses. There now, Mr. Cramer, we've done it, and we hope it will please you.

REBUILDING SALE.

A book about CALIFORNIA
72 Pages—62 Illustrations.
All for six cents.
One of the most attractive railroad books ever published has just been issued by the Burlington Route.
Its title is "California."
It contains 72 pages and there is a picture on almost every page.
One chapter treats of the climate of California; another of Monterey; a third of the Yosemite Valley. Six interesting pages are devoted to San Francisco. Then there are twenty pages or so about Southern California and its attractions for health and pleasure seekers.
Sent on receipt of six cents in stamps.
J. FRANCIS, GENERAL PASSENGER AGENT, OMAHA, NEB.
P. S.—In connection with California, please note that the Burlington route personally conducted tourist-car excursions three times a week to Los Angeles; twice a week to San Francisco. Palace sleepers, Omaha to San Francisco daily.

HAYDEN'S Leading Dress Goods House of the West.
We have already received over a car load of new spring dress goods, and we have sold more Spring Dress Goods up to this date than any other store in Omaha will sell during the entire spring season. We receive two consignments of goods each month from January until the 1st of May.
We invite every lady in Omaha to call and examine all our new spring lines. The products of the leading mills of England, France and Germany, also our own domestic mills.
Among the newest tailor suitings is the reversible cloth to be made up without linings, on one side, all the popular spring shades; on the other all the new shades of linings—the price is from 80c to \$2.50 per yard.
THE NEW FRENCH PRUNELLAS—in both the course and fine weaves. They make one of the most beautiful dresses of the season, and the price range from 90c to \$2.00 per yard. Priestley's make the finest black.
DRAPE is the name of a new fine French cloth on an exceedingly high finish. They come in different weights, and sell at from \$2.50 to \$5.00 per yard. Priestley makes this cloth in black.
The beautiful FRENCH VENETIANS are as popular as ever. They run from 80c to \$2.00 per yard. We would call particular attention to one cloth manufactured by Miquel & Co. of Paris. While it is a perfect Venetian it has a fine broadcloth finish which can't be removed by sponging. Of course Priestley makes the best black Venetian on the market.
While we carry all the homespun made we have an entirely new homespun that has not been on the market before. It has a beautiful warp and a drawn worsted filling, which gives it a hard wavy finish, and makes one of the finest suitings ever placed on the market—it is called a Scotch Tweed—but is manufactured in Bradford, England, and costs \$1.50 and \$1.65 per yard. It comes in all colors of gray.
We have all the new VELLING, all the new VOILES, all the new Challis; all the new Mohairs, and everything new made for spring, and as the proper season approaches will call attention to all the different lines.

Beauties of the New Wash Goods.
HAYDEN'S showing of Fine Foreign Wash Fabrics for Spring of 1901 is the talk of the city and no lady who has visited this department in the last week but has expressed the greatest admiration for the magnificence of our immense collection.
All the new French Foulards, Irish Dimities, Satin Stripe Dimities, Mousseline de Soie, St. Gaul Swisses, Tissues, Scotch Madras, Grenadines, Irish Linens, Alberta Satins and many other of the finest productions, are now on our counters.
