tended to make that class of cattle sell lower.

About fifty cars would cover the receipts of cows today. At the start the market was just about steady and buyers all seemed anxious for the better grades, but, the same as in the case of steers, the common and medium kinds were hard to move. Later in the morning, after packers had filled their more urgent orders, they wanted to buy their supplies lower and sellers who had anything but the very choicest kinds found they had to take off 5c and sometimes 10c before they could dispose of them. Canners did not show so much change, as the greatest decline was on the medium grades.

hogs here this morning, and, as other points reported lower values, packers started out bidding 2526c lower. They did not get many hogs at those prices and gradually raised their hands until on the close they were paying almost the same prices as they did vesterday. The general market averages just a shade lower than yesterday. The bulk of the hogs sold at 35,30 and \$5,334, with a top at \$5,35. The lighter hogs and also some of the early sales were at \$5,274, and from that price down. It was a good, active market after the trading fairly began and all the early arrivals were sold in good season.

Late in the morning several cars arrived and they did not sell as well, as packers had about all they wanted. They were bought up mostly at \$5,274 and at \$5.30, or about the same as the first sales of the day. Representative sales: blood. 22023c: braid combing. 20021c; lake and Georgia. 22c. Wool Market.

BOSTON, Feb. 12—WOOL—The wool market here shows only a fair amount of steadiness, although considerable wool is being taken from time to time. Prices cannot be quoted materially lower, however, and many holders are firm in the present basis of prices. Conditions remain the same as for the last few weeks. Manufacturers have no stocks on hand, but they desire none until they sell the goods. At present there seems no chance for prices advancing and there is an absence of any speculative feeling. Territory wools continued to head the list of the business transacted. Prices are quoted at 45/45c for fine medium and fine scoured, staple in, and the strictly staple article at 48/650c. Fleece wools are slow, with prices nominal Following are the quotations for leading descriptions;

LONDON, Feb. 12.—The settlement requirements increased the demands to a restricted supply of money. Discounts were firm. There was little business doing. The joint banks were not working freely, beyong the general carry-over. Deallings on the Stock exchange were small. Consols were steady. The market quotation of the new exchequer bonds is 374. Americans lowered to the approximate New York level and closed firm. There was an indisposition to engage in new business owing to the and closed firm. There was an indisposition to engage in new business owing to the holiday on Wall street. Union Pacifics were exceptionally firm. Grand Trunks were better. Kaffirs retained their advances, though the public was holding aloof and there was some profit-taking. Consequently there was a sharp reaction. Spanish securities were depressed. Coppers were dull. The accounts were characterized by a cheerful tone, except home railroads, which declined all around in consequence of disappointing dividends. The poor outlook and bad trade reports and traffic returns helped the decline. There was no business in any department except Americans in which there were any substantial rises, notably in Union Pacifics, which were up 114, and Atchisons and Wabash B debentures, which were 11 points above the last settlement. were 11 points above the last settlement.

Juror in Judge Estelle's Court Escapes Punishment on Account of the Day.

John Barton, one of the jurors on the panel that is trying the burglary case against Henry Smith in Judge Estelle's court, was half an hour late yesterday in putting in an appearance. His tardiness tept the court, the attorneys and the other jurors in idleness and anxiety, and when he

finally appeared he was commanded to give an explanation to the judge. Barton said he had been detained by business affairs that called for his personal attention. "That's no excuse," said Judge Estelle, "and if it were not for the fact that this is Lincoln's birthday and I'm in an unusually good humor, I would punish you for putting your private business before your public duties."

Township Library System Payored-Fine for Descerating American Fing-Liquor Bill Against the Druggists.

PIERRE, S. D., Feb. 12 .- (Special Telegram.)-The Watertown capital boomers have practically decided to quit the field and there is little possibility of any re-

moval bill at this session. The opponents of wolf bounty had their innings today and the action of yesterday by which the Sweet repeal bill was killed was expunged from the record and the bill is again much alive. The motion to expunge was made by Everitt and supported by him and Heath. The leading opposition came from Benedict, McDougall, Goddard and Anderson. The vote to expunge was carried by 39 to 35. After Benedict had changed his vote for the purpose of moving a reconsideration, which will be done tomorrow and promises another fight, Seward moved that the bill be recalled from the committee on state affairs and placed on in the hands of the committee on agriculture, which was carried.

The committee on education reported favorably on the township library system. On third reading the house passed house bills allowing each senator and representative to name ten pupils in some state in stitution free of tuition, fixing the penalty for desecration of the American flag at a fine of \$100, and to allow reassessment for taxes for improvements where former assessment had been declared void for any

reason. The senate bill to provide for waste gates in dams was called up, but as opposition developed, it was recommitted for mendment

House bills introduced were to require townships to make repairs in bridges of less than \$20 cost, and county to make repairs in excess of that sum; to repeal act of 1895 providing for uniformity of text books: providing for scale inspection, mayor of city and chairmen of boards of supervisors to be inspectors, and to repeal the act providing for the destruction of noxious weeds.

opposed the anti-cigarette bill on second reading and moved its indefinite postpone ment, which was carried, 27 to 16. This bill was strongly opposed by the Germans and Russians and was a vital measure t

The house bill to give the governor power to remove constitutional officers not subject to impeachment was opposed by the populists, though it was one of their party measures two years ago. On vote the bill was passed, 35 to 8. The house bill to license transient merchants was passed. The investigation committee sent a telegraphic summons to ex-Governor Lee to appear Thursday and testify in regard to the charges made in his message, and this afternoon the message was returned with the notice that the Western Union was not able to find the ex-governor.

The investigating committee will take advantage of the adjournment to go to the insane hospital. From there it will go to Sioux Falls to investigate the penitentiary, and may go to Plankinton to the reform school before its return.

DESTINY OF RAPID CITY Great Hopes Are Based on Building of the Dakota Pacific Rail-WRY.

RAPID CITY, S. D., Feb. 12 .- (Special.) In 1900 the Black Hills mines produced \$10,-800,000 in gold, and it is confidently expected that this year the production will equal \$15,000,000.

The gold production has gradually increased every year for twenty years, and paid monthly dividends, never skipping a brought about by the new process of cyaniding. There are now in the hills country a dozen plants using the cyanide process. Properties heretofore thought to be practically worthless are now on a dividend paying basis, because their ores can and are being mined and reduced by the cyanide process for \$3 a ton, making it profitable to work the lowest grade of ores to advantage and with large profits. The Homestake company will soon start up the largest cyanide plant in the world, having a dally capacity of 1,000 tons. The same company now mines and mills 2,000 tons a day, and there is in sight enough ore to keep all the plants going at the present rate of output for fifty years. All of the properties and plants of this company are situated at or tributary to Lead City. The mining activity in the hills country

was never so strong as now. There is abundant water, fuel and timber, and minyear around. The climate is fine. The weather office of the United States government shows more days of sunshine in the Black Hills than at any other point in the country. Capital from the east and west is finding its way into various mining districts of the southern hills, and this year no doubt several new mining companies will be placed on a dividend-paying basis. Certain districts in the southern hills have only been scratched over, because the transportation facilities have been too limited, but with new railroads completed to these districts a new era of prosperity will be inaugurated in the southern hills.

From a reliable source it is learned that the Dakota Pacific railroad, between this city and Mystic, will beyond doubt be completed in a few months. The road runs through the heart of the southern hills. of the grading of the entire line is done. Sixty-five-pound new raths are being used, and an examination of the road shows that project in every respect. Nothing but new business which will doubtless be put and first-class material is being used in its good use. construction. The eastern connection of this road in this city is the Fremont, Elkhorn & Missouri Valley railway, and the western connection at Mystic is the Burlington & Missouri River railroad. The object of the road is to gain access to the ditions a host of boy thieves is growing up heavy bodies of timber and the gold, silver, fron and copper ores known to exist. The right of way between Rapid City and Mystic passes through rich gold, silver, copper and iron districts, already partially developed, and the owners of mines there will furnish the road with all the traffic it can WILL SELECT NEW DEPUTY handle in the shipment of ores just as soon as the road is completed and in operation. The chlorination plant in this city can use 150 tons of ores a day, and the electroyanide plant at Mystic will take 125 tons

ready for shipment to these reduction works, and also to Deadwood. Denver and Omaha, thousands of tons, and it is anthe Dakota Pacific that will make it one of the best paying enterprises in the west With the actual business now in sight there alone, and without any reference to join business with the other roads, is regarded as justifying the early completion and operation of the Dakota Pacific railroad. The president of the Dakota Pacific railroad, Hon. William T. Coad, has shown great perseverance and enterprise in the promotion and carrying forward of this project. He is the originator of the enterprise, and has never relaxed his efforts, in hard or good times, to complete and put the road in actual operationt. Mr. Coad's success means much for this city. The city will get a new growth.

Many believe Rapid City is destined to be the rallway center and commercial metropolis of the Black Hills. It is a beautiful site, the natural point of approach from the vast prairies of the east to the mines, for ests and quarries of the bills to the west It is situated to the Black Hills mining districts and cattle ranges, as Denver is to those of Colorado. CROOK PASSES AS A SLEUTH

Fred Bert Makes Good Money by Pretending It is Bad.

YOUNG FARMERS ARE HIS VICTIMS

Man With an Alias Impersonates Government Detective and to Arrested-His Dupes Iden-

tify Him.

Fred Bert, alias Nicholson, the smooth man who has been posing as a government detective and flimflamming young farmers out of their cash under the pretense that it was counterfeit, has come to grief at last, He was arrested in a South Omaha rooming house yesterday morning by Detectives Savage and Dunn and has been positively identified by one of the victims.

Bert turned three tricks, it is alleged. during January and February. The first, which has not hitherto been made public, occurred on January 7, when Bert met Eldon Gardner in South Omaha and induced him to come to this city. They stopped in a secluded spot of the wholesale district and Bert accused his companion of having counterfeit money. Of course he denied it and dug up thirty-two good dollars, which Bert took for the ostensible purpose of having them examined at the "secret service office." Then Bert told Gardner to go to the police station and tell the chief that 'McCarty" had arrested him and to wait until he came over before locking him up. The scheme worked nicely and Bert got away with the money. Since his arrest he has been confronted by Gardner, who has

positively identified him. One other job yielded \$28 to Bert and another \$10, it is said. In each case his methods were identical and never falled to work. The other victims will be brought here to identify Bert. He says his name is Nicholson, but the other name is tattooed on his left forearm. It was feared that he would never be brought to justice, as the police had very poor clues and descriptions to work upon, and Savage and Dunn did a
