TELEGRAPHIC ORDERS EFFECTS THE MOVE

Merriam is Now in Command of Department of the Missouri.

General Lee has been relieved of his command of the Department of the Missouri by the arrival of Merriam at St. Louis. Merriam was placed in command of the department on the retirement of General Lee, but did not know when the change would take place. He came to Omaha Friday on his way to Denver from an eastern trip, and the telegram ordering him to take command of the department was received by him while in this city. He immediately went to the headquarters and assumed command.

General Lee is Relieved

Merriam is Now in Command of Department of the Missouri.

The coming of Lee in wheels is to be the motorcycle, and from the present outlook this machine will come in with the popularity which attended the introduction of the "safety" bicycle when the high-wheeled "ordinary" was in the heyday of its existence. From time to time specimens of the motorcycle have been brought to Omaha and other western cities, but not until this season has any active effort been made to introduce them. Within two weeks it is probable that every bicycle house in the city will have from one to three machines on hand for sale. The price of the motor cycle is really in the formative stage of its existence and it is not believed that the machines will become numerous in the west until the end of the summer, but dealers expect that the season of 1902 will find them at the height of their popularity. The prices at which the machines are being offered are extremely moderate, the ruling price being \$150, while motor attachments for regular bicycles are quoted at \$115.

...I have derived great good from the use of Dr. Greene's Nervera and always considered it "my medicine." A friend of mine said she had known of doctors who had recommended it for their patients in cases like mine, and she felt sure it would do me good. I am thankful to say that she was right, for it did for me all that she recommended for. I gladly recommend Dr. Greene's Nervera blood and nerve remedy to all and I often advise people to use it.

...Mark Twain appeared before a committee of the New York legislature one day last week and delivered a characteristic speech in support of a bill permitting and regulating the practice of osteopathy in the state. Personal liberty as to the right to employ whomever one sees fit to minister to his bodily infirmities was the keynote of Mr. Clemens' talk. Everyone laughed at his jokes and the members of the committee joined with the large assemblage in vigorous applause.
