Modern Preachers

AND ARE THEY TO BE TRUST-ED AND BELIEVED?

The only value of the question in the of all classes of testimony, that offered by N. C. for truth and right, and thousands follow

them living up to the same precepts of rectitude. These followers are no whit less truthful than their leaders. Yet because the preacher is a leader it is natural to give weight to his statements. His very position and responsibility to his people and the world at large not only forbid the thought of untruth in him but lend emphasis to any voluntary declaration of fact which he may make.

If a pastor says to one of his congregation who is coughing, "I cured a very bad cough once by the use of Dr. Pierce's Golden Medical Discovery," he could offer no stronger endorsement as to the value of that well known medicine as a cure for coughs; and if such a pastor makes for the time the world his parish, and puts out the same testimony he is only enlarging the scope of his benefaction. For if the world at large knew and was persuaded of the wonderful curative powers of "Golden Medical Discovery" in cases of diseases of the respiratory organs, it would mean a great increase in the general health and comfort, not to say a probable saving of a great many lives.

"AS TRUE AS GOSPEL"

ed cell into which the local practitioner has shut him, and from a weak, emaciate wreck restored to rugged health by the use "Discovery," it is impossible to shut the door of hope on any one however weak he may be. It is the record of such cures which has given Dr. Pierce's Golden Medi al Discovery a pre-eminence among all preparations for the cure of diseases of the organs of respiration.

"I desire to send you this brief, unsolic ited testimonial," writes Rev. Joseph H. headline is to bring home the fact that Fesperman, of Barium Springs, Iredell Co., "In 1898 one of my daughters was the clergy would be most promptly accept-ed without doubt or cavil. Dr. R. V. Pierce's Golden Medical Discovery with gratifying success, and she now enjoys excellent health. This experience caused me to recommend Dr.Pierce's medieine to my neighbors, who without exception used them with favorable results. This being true, I hereby heartily

endorse your medicines." It can be truly said of Dr. Pierce's Golden Medical Discovery that it always helps and almost always cures. Nincty-eight per cent of all who use "Golden Medical Discovery" are perfectly and permanently cured. The remaining two per cent though not cured acknowledge appreciable benfit. They cough less, eat better, sleep better and feel better for the use of the "Discov-

THE IMPORTANT POINT. While extreme cases of disease are cured by the use of "Golden Medical Discovery." the important point is not to neglect the slight cough. From such neglect fatal results have come to many thousands. It is useless to try the mere "cough medior palliative, which soothes but does not cure. The one thing desirable is to be cured quickly and permanently, and it is in such cures that the "Discovery" proves its value.

"I took a severe cold which settled in the bronchial tubes," writes Rev. Frank Hay, of Nortonville, Jefferson Co., Kansas. "After trying medicines labeled 'sure cure,' almost without number, I was led to try Dr. Pierce's Golden Medical Discovery. I took two bottles and was cured, and have stayed cured. When I think of the great pain I had to endure, and the terrible cough I had it seems almost a miracle that I was so soon relieved. That God may spare you many years and abundantly bless you is the prayer of your grateful friend."

Men or women suffering from disease in chronic form are invited to consult Dr. Pierce by letter, free. All correspondence is held in strict privacy and sacred confidence. Address Dr R. V. Pierce, Buffalo,

OPPOSES GUGGENHEIM DEAL

Effort to Enjoin American Company from the Purchase of Smelters.

FIGHT ON IN THE COURTS OF NEW JERSEY the year ending October 31, 1900, were \$3,-

Applicants for Injunction, President Ansh and Others Submit Affidavits Pertnining to the Condition of the Company.

The legal fight to prevent the acquisition of the Gugg othern smelters by the American Smelting and Refining company is on in the New Jersey courts. William M. Donald, Stephen V. White, Abraham Sartorious and Henry A. Zemans of New York and John W. Gordon and William H. Curtis of South Orange, N. J., representing something more than 27,000 shares of the stock of the Amer ican Smelting and Refining company, have applied for an injunction to restrain the stockholders of the company from voting to increase the captial stock from \$65,000. 000 to \$100,000,000, and to restrain the board of directors of the company from purchasing the several smelting and refining plants owned by M. Guggenheim Sons in this country, Mexico and South America for the sum of \$45,000,000. A temorary restraining order has been granted and the present proceedings are for and against the application to make the order permanent

Vice Chancellor Stevens has overruled a motion by the plaintiffs to take depositions from Henry H. Rogers and Leonard Lewisohn, former directors of the company, for the purpose of unding out something about the real condition of the defendant company, the value of the Guggenheim properties and how the proposed stock increase and the purchase of the Guggenheim smelters came to be suggested to the stockhold-

The proposition of the directors of the American Smelting and Refining company Takes Charge of Knox Presbyterian as appraisers to put a price upon all city made to the stockholders in the latter part of last December was to increase the capital stock of the company from \$65,600,000 to \$100,000,000, and with the \$35,000,000 acquired by the sale of this stock, together with \$10,000,000 worth of the original stock was Tuesday night in the presence of an authorized but unissued, to purchase all audience which filled the church. The plaintiffs have submitted a number of affidavits in support of their application for a permanent injunction. Stephen V. Opposes Guggenheim Purchase. According to Mr. White's affidavit Mr. Lewisohn said that he had no idea what the several plants were worth; that the directors of the company had never had them appraised, and that no account of their value was taken at the time it was decided by the directors to recommend the purchase of the properties. Mr. Lewisohn said, further, ac- | Mcnida, Mont. cording to Mr. White, that a resolution had been proposed and seconded at a meeting of the board of directors providing for the appointment of a subcommittee of directors to : xamine into the value of the Guggenh Im projecties and to report the result of the examination to the board. Mr. Lewisohn said according to Mr. White's affidavit, that this motion had been strenuously opposed and lost. As to the working capital of the company, Lewisohn said, according to the affidavit, that he had no very special information, but that he did know that the company had a floating indebtedness of \$7,000,which it had no means of paying except by the acquision of fresh capital. Lewisohn also told Mr. White, according to the affidavit, hat before the resolution recommending the purchase of the Guggenheim properties and the increase of the company's capital stock had been passed, Edward W. Nash, president of the American Smelting and Refining company, said to some of the directors that he. Nash, had arranged that in case the capital stock should be increased tion, the directors should have \$4,000,000 of the preferred stock at 80, and \$4,000,000 of the common stock at 50, making 5,000 shares of the new stock for each of the sixteen directors.

Several mining engineers made affidavits declaring that, in their opinion, the Gugproperties were worth only genheim

about \$7,000,000 What President Nash Says.

Among the affidavits submitted for the defendant company was one by President Edward W. Nash. He averred that he had been a director of the American Smelting and Refining company since the company's organization and that at no time had he held less than 10,000 shares of the stock. He denied the assertion that the American Smelting and Refining company owns all the plants for refining gold, silver and lead ores in the United States and Mexico, except those controlled by the Guggenhelms; he declared that there was a large number of refineries in which neither concern had an interest. Further along in his affidavit he admitted that it was true as the plaintiff avers, that on January 1 1901, the American Smelting and Refining bonds for the use of attorneys.

A telephone message received at the police station from Lincoln Tuesday evening conveyed the information that Fred Siy, a well-known Omaha thief and former convict, had been convicted there on a charge of highway robbery.

Albert Dewitt, Eddie Woods and Austin Campbell were bound over to the district court Tuesday afternoon by Police Judge Learn for trial on a charge of burglary. It is alleged that the trio robbed the house of John Hughes at 2711 South Twentieth street on the night of November 20 last.

William Sully of 2113 Webster street, a company had no surplus or working capital and that in fact, its capital was impaired but he declared that nevertheless the com pany has a large surplus in accumulated earnings. He also asserted that the company had a very practical working capital. consisting of cash, ores, metal and other quick assets, amounting to \$15,000,000 gross, and about \$9,000,000 in excess of the company's debts.

The net working capital of the company according to Mr. Nash, has been largely increased by profits since its organization and this in spite of the fact that \$1,250,000 has been paid to discharge mortgage liens and \$2,000,000 for construction. Mr. Nash declared that it was absurd to say that the value of the Guggenheim plants was only \$10,000,000. He admitted that he was unable to say exactly what it would cost to duplicate these plants, but their true value could not be properly considered without taking into consideration the question of the old concern's good will and other elements, included in the taking over of a long-estab

lished business Good Business Policy. President Nash's affidavits declared that

it had been decided by the directors to acquire the Guggenheim plants because it was considered to be good business; the two plants operated in conjunction could be operated more economically than as separate concerns, and consolidation would re suit in a great saving of freight rates and
