Remuneration of the architect is another question which is proving troublesome, as who has attended the conferences said:
The question of the remuneration to be received by an architect is largely a personal matter. The company has provided get his mail, having arranged with his brother, William, to have a registered let.

No two men will work on the same building alike. Where one man will be satisfied with three or four drawings another man will go deeper into the details and may have a dozen drawings. There is no doubt that under ordinary circumstances the man who prepares drawings for every detail is worth more than the man who supervises the work guided only by general plans.

For this reason many of the architects believe that the settlement of the percentage to be paid the successful competitor should not be made until after plans are approved, the company making a statement as to the minimum amount which may be

GOT HIS HAIR BACK.

Was Perfectly Bald When He Started

Frederick Manuell, Maryland block, Butte, Mont., bought a bottle of Newbro's Herptcide, April 6, 1899, and began to use it for entire baldness. In twenty days, he says, he had hair all over his head, and on July 2 he writes, and today my hair is as thick if you had asked what I considered the and luxuriant as any one could wish. Newbro's Herpicide works on an old principle and with a new discovery—destroy the cause and you remove the effect. Herpfeide destroys the germ that causes dandruff, falling hair, and finally baldness, so that with the cause gone the effect cannot remain. Stops falling hair at once and starts the new growth in a week.
