

CLOSES STATE LIBRARY

Court Clerk Herdman Looks Its Doors and Posts Placard.

LACK OF FUNDS GIVEN AS REASON

Sign at Entrance Greets Eyes of In-dignant Lawyers and Users of Library When They Want In.

LINCOLN, April 2.—(Special Telegram.)

As a result of the governor's veto of the appropriations for the supreme court commission and court and library officials and employees, Clerk Lee Herdman this morning closed the state library and office of court reporter.

Herdman said: "Yes, I have closed the library and office of court reporter, and you may say furthermore that they will remain closed."

Lawyers and others who have made use of the library are expressing their indignation in unbounded terms at what they contend is an entirely unwarranted action on the part of the court clerk. The constitution of the state provides that the clerk of the court shall be state librarian and it is openly charged that by his action in closing the library Herdman has violated a strict mandate of the constitution. The matter will doubtless be brought to the attention of the court when it meets tomorrow morning.

BOYD COUNTY IS PROSPEROUS

New Settlers Arriving and Old Ones Buying More Rich Farm Land.

BUTTE, Neb., April 2.—(Special.)—Boyd county is experiencing a substantial growth this spring, greater in fact than at any time since the first rush of settlers to this section. The soil of the county is unexcelled by any in the state and has always returned a good harvest.

These facts have had their influence and now that the life has again turned westward, Boyd county is getting its share. With the country, the towns are also enjoying prosperity. The soil at the present time is in prime condition, stock has gone through the winter in excellent health and the prospects for the coming season are exceptionally bright.

Considerable land is changing hands. Some years ago much of it came into the possession of non-residents and speculators, who secured it at prices prevailing during the period of depression through which the entire country passed. This is practically all on the market at present and much of it has already been sold. The new settlers have taken a considerable portion, and with the advent of better times the old settlers are investing their profits in more land. Though one of the newest counties in the state, it is already well settled and at the present rate another year will see practically all of it under cultivation.

BLOW UP A POSTOFFICE

One Robber Stabbed, Grand Against Pleasanton Inhabitants While Other Secures Plunder.

KEARNEY, Neb., April 2.—(Special Telegram.)—Word was received in Kearney today of the robbery of the postoffice at Pleasanton, twenty miles north of this city, at 12:30 Sunday night. The citizens of Pleasanton were startled by an explosion. C. W. Griffin, who lives near the postoffice, gave the alarm and was answered by a shot from the robbers. Looking out of the door of his home, he saw a burglar standing guard. At the alarm the robber outside called to the one who was collecting the plunder to hurry up, and they both started north.

The town is situated at the foot of the hills on the Loup river and the robbers lost no time in getting in the hills under cover. At this time W. S. Eldridge made his appearance, well armed, chased them four miles and lost sight of them. Cash to the amount of \$110 was secured, \$80 in a box being overlooked. The safe doors were blown off and the safe records, nearly all the glass in the building was blown out. The tools used by the robbers were stolen from a carpenter gang working on the Loup bridge.

Relief of Jefferson Davis.

HUMBOLDT, Neb., April 2.—(Special.)—Ex-Senator R. A. Clark is the possessor of a very valuable relic. In 1853 or 1854 Commodore Perry was sent to Japan to negotiate a treaty with that country and induce the Japanese to open their ports to American products. He was successful, and

BRAIN FOOD

Is of Little Benefit Unless It is Digested.

Nearly every one will admit that as a nation we eat too much meat and too little of vegetables and the grains. For business men, office men and clerks, and in fact everyone engaged in sedentary or indoor occupations, grains, milk and vegetables are much more valuable.

Only men engaged in a severe outdoor manual labor can live on a heavy meat diet and continue in health. As a general rule, meat once a day is sufficient for all classes of men, women and children, and grains, fruit and vegetables should constitute the bulk of food eaten.

But many of the most nutritious foods are difficult of digestion and it is no use to advise brain workers to eat largely of grains and vegetables where the digestion is too weak to assimilate them properly. It is always best to get the best results from our food that some simple and harmless digestive should be taken after meals to assist the relaxed digestive organs, and several years experience have proven Stuart's Dyspepsia Tablets to be a very safe, pleasant and effective digestive and a remedy which may be taken daily with the best results.

Stuart's Dyspepsia Tablets can hardly be called a patent medicine, as they do not act on the bowels nor any particular organ but only on the food eaten. They supply what weak stomachs lack, pepsin diastase and by stimulating the gastric glands increase the natural secretion of hydrochloric acid.

People who make a daily practice of taking one or two of Stuart's Dyspepsia Tablets after each meal are sure to have perfect digestion and much more perfect health. There is no danger of forming an injurious habit as the tablets contain absolutely nothing but natural digests; cocaine, morphine and similar drugs have no place in a stomach medicine and Stuart's Dyspepsia Tablets are certainly the best known and most popular of all stomach remedies.

Ask your druggist for a fifty-cent package of Stuart's Dyspepsia Tablets and after a week's use note the improvement in health, appetite and nervous energy.

WYOMING CATTLEMEN MEET

Association Conference Not as Large as in Former Days.

ORGANIZATION HAS IMMENSE MEMBERSHIP

Formed for Protection Against Cattle Rustlers Who Threatened Demoralization of Industry—Wealthy Men Represented.

CHEYENNE, Wyo., April 2.—(Special.)

The annual meeting of one of the oldest range live stock associations in the west, the Wyoming Cattle Growers' association, held here yesterday afternoon, adjourned last night, having performed the same work that requires five to ten days during the earlier years of the organization. It was the twenty-sixth annual meeting, and was attended by less than fifty members.

In the early '80s, during the palmy days of the range stock business, the meetings were attended by from 200 to 250 members, and many of these came from New York, Boston, Chicago and not a few from England and Scotland. Almost all were wealthy men who ran their herds on the great plains of Wyoming and never visited the state except on the occasion of the association meeting; trusted managers looked after their interests during the balance of the year. These cattle barons traveled in style and their coming always meant great things for Cheyenne and increased traffic for the railroads. Many of the members had their own private cars and not a few came by special train, accompanied by their families and large numbers of friends, who wanted to visit a wild and woolly section. Hotels and business houses always did a thriving business. Cheyenne was in gala attire on the occasion of the annual meeting of the barons.

All of this has been changed during the last few years and while the wealthy men in the east still retain an interest in the stock business here, also retain their membership in the organization, they seldom attend its meetings. In years gone by there was sharp rivalry among the numerous candidates for official positions in the association, but this has now changed. Now the cattlemen get together, take in new members, enjoy a social chat and adjourn. They have got the association on a good working basis, good men are at its head and the man that stays at home well known for his interests are being looked after.

For Protection Against Rustlers.

The Wyoming Stock Growers' association, as originally formed, was for the purpose of protection against cattle rustlers, who infested the plains in large numbers and who, at one time, threatened to drive the large owners out of business. The organization employed stock detectives and waged such an active war on the thieves that they were finally compelled to leave the country. One band, known as the Hole-in-the-Wall gang, was more numerous than any of the others, but these outlaws were rounded up eventually and shared the same fate as those before them.

During late years the association has been paying more attention to looking after the routes of the mail and express companies. The organization employed stock inspectors who have been named every year and stationed at the leading market centers, where they have caught many of the thieves and returned them to their owners, thus saving the cattlemen of the state, whether they were members of the association or not, hundreds of thousands of dollars annually. The roundup arranged in charge of competent men and the percentage loss has been reduced to the minimum. In legislative matters the members of the association have pulled together to accomplish legislation beneficial to the stockmen in this state and in other states beyond their expectations. The association is growing fast and is now classed as one of the strongest organizations of its kind in the country.

At yesterday's meeting President W. C. Irvine called for resolutions to order in regard to the reports of officers and inspectors were read the following officers were re-elected: President, W. C. Irvine; vice president, Alexander Bowie; secretary, Alice Smith; treasurer, H. G. Hay; trustees, J. M. Carey, Ora Halsey, Colin Hunter, William Booker, E. W. Whitcomb, C. F. Miller, William Sturgis and Alexander Bowie.

FIND UNKNOWN FROZEN BODY.

MINERS Discover Dead Man in His Cabin Near Sherman, Wyoming.

CHEYENNE, Wyo., April 2.—(Special Telegram.)—Two miners today found the frozen body of an unknown man in a cabin near Sherman. There was no evidence of a crime and it is thought he died of heart trouble. It is reported that \$12,000 worth of bonds and mortgages were found under the mattress of his bed. It is also known that the man, who was past 50 years of age, conducted a general store at Tie Slide last fall, when that place was headquarters for the grading gangs working on Sherman Hill.

To Make Brick at Rawlins.

RAWLINS, Wyo., April 2.—(Special.)—The Rawlins Pressed Brick company will begin making brick at once. The necessary machinery has been ordered. Samples of the clay found near Rawlins have been sent to a number of eastern manufacturers of brick and all have pronounced it equal, if not superior, to any clay found in the country.

Accused of Stealing Cattle.

SHERIDAN, Wyo., April 2.—(Special.)—Robert E. Lee was arrested, charged with

THIRTEEN DOCTORS FAILED.

Mrs. M. A. Close, of Nebraska, Was Cured of In-cipient Consumption After All Medical Aid Had Failed—Read Her Letter.

FOUNDED HERSELF GROWING WORSE.

Dr. S. B. Hartman, Columbus, Ohio: Dear Doctor—"I desire to express to you my sincere thanks for the interest you have shown to my case, and for the timely aid and advice which has effected a cure of as bad a case of consumption as could be well imagined.

AN OLD COLD.

In Catarrh, and Catarrh Leads to Consumption. The tendency of catarrh of the head is to pass downward through the bronchial tubes to the lungs. Any one who has had catarrh of the head for a year or more finds the disease gradually progressing downward. In some cases the progress is rapid, and in other cases it is slow; but sooner or later if catarrh is allowed to run, it will go to the lungs and set up the disease known as consumption. It is doubtful if consumption is ever caused by anything except catarrh.

The catarrh usually begins as a cold in the head or throat, and is neglected until it becomes chronic; then it begins to dawn on the victim that he has catarrh. Unless he is very foolish indeed he will not rest easy until the catarrh is entirely cured.

If Peruna is used the cold never becomes chronic and hence catarrh is prevented. But after catarrh has become thoroughly established Peruna will cure it, but it will take much longer. Even in cases where catarrh has attacked the lungs and the symptoms of consumption have shown themselves the Peruna will cure. A great many cases of genuine consumption have been cured with Peruna after the patient had been given up to die, as in the case of Mrs. Close.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving full statement of your case and he will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Peruna and Manalin have done what thirteen of the best physicians in the country have failed to do. For more than three years I doctored for consumption, and spent thirteen weeks in a Pulmonary Sanitarium at Milwaukee, Wis.; but finding myself growing worse, as a last resort, I came West where I was bedfast for many weeks, and the physicians which my husband called gave no hope but said, She cannot possibly live more than a few days." But thanks to Peruna, I fooled them all. In an incredibly short time after I began to take Peruna the hemorrhages stopped. I began to mend slowly at first, but the improvement became more marked, and now I can truthfully say that there is not the slightest trace of my old complaint.

"I would have written you a long time ago, but have purposely waited to see if the effect was lasting; and in conclusion I would say, God bless you and keep you with us that you may go on with your work of mercy for many years to come."—Mrs. A. Close.

P. S.—"I am going to visit friends in Wisconsin who never expected to see me alive again, so please forward mail to me at 589, Pacific St., Appleton, Wis."—M. A. C.

Thousands pay no attention to it until it is too late. If Peruna is used the cold never becomes chronic and hence catarrh is prevented.
