THE OMAHA DAILY BEE: WEDNESDAY, APRIL 10, 1901.

HUNDREDS HEAR DR. MEYER LAST DAY OF THE PASSOVER **REPORT OF CITY ENGINEER**

Lenden Prescher Attracts Great Crowds to His Bervices.

TELLS THE GOSPEL IN PLAIN LANGUAGE

Free from Sensation-Even a Child May Comprehend His Words.

The great crowds which greeted Rev. Dr F. B. Meyer yesterday afternoon in Kountze Memorial church and in the First Methodist church last night proved that the simple story of Christ has not lost its power to attract mankind, and the lament that men will not attend church was proved false, for even in the afternoon nearly onchalf of Rev. Meyer's listeners was men.

Dr. Meyer is an unusual preacher. His appearance is that of a bishop. He is tall and slender. His hair is gray. His face is clean-shaven and he wears the plain black stock which is seldom essayed by clergymen in the United States.

A more natural man in the pulpit than Dr. Meyer cannot be imagined. He has a full rich voice and an English accent. His language is so simple that not a child in his audience failed to comprehend every word.

Free from Sensation.

The message he brought was free from the sensational features that characterize entertainment. It was not disappointed. the sermons of many evangelists. It was a plea for a higher standard of morality and in Omaha, is by no means new. Fifty-six a truer devotion to Christ and His teach- years ago it was given in New England ings. His sermon was not devoted to ple- and twenty-five years later was repeated turing horrors awaiting lost souls, but emphasized the peace and happiness that marks the lives of men and women who the entertainment in Omaha with great keep themselves above the whirlpools of success. The twenty-four numbers of the worldliness and sin.

Dr. Meyer is accompanied by A. B. Fitt, a son-in-law of the late Dwight L. Moody. Dr. Meyer was associated with Mr. Moody cient origin. The singers were dressed in in evangelistic work both in America and in England. He has preached in nearly all ceived unstinted applause. The proceeds parts of the world and is probably the most were for the benefit of St. Matthias' church. widely known evangelist who is now living. He is pastor of Christ church, Westminster, hished amusement for the younger people but three months of each year he leaves until midnight his congregation in charge of an assistant and devotes his time to work in foreign fields.

"Back to Bethei" was the theme of Dr. Meyer's sermon yesterday afternoon. God's order to Jacob to return to Bethel and build there an altar was the portion of the scripture upon which the discourse was based.

Power in Mother's Prayers.

Dr. Meyer likened Bethel, the spot where the angel appeared to Jacob, to the pure home which is presided over by a Christian mother. He spoke feelingly of the righteous teachings which are inspired by mother love and asked his auditors to recall the prayers which mothers raised to God in their behalf.

Rachel was mentioned as a type of noble woman and her influence for good was pointed out as an indication of the great power women were to exercise in the world. "Women are protected from the rush and worry of business life by their husbands and brothers and fathers," said Dr. hover. They have a better opportunity to com-

mune with God. It is for women to keep the fire of religion burning, in our homes Man can't hold his own against an irreligious or worldly wife.

'Liquor and gambling are gaining hold of women. In society liquor and games of chance were not common among women a few years ago, but it is not so today. Worldliness is invading the home and this afternoon and show cause why they

It is Celebrated with an Appropriate Service at the Harney Street Temple.

The last day of the Jewish passover was elebrated Tuesday evening at the Harney street temple with appropriate prayer. traditional music and a brief address by Methods of This Notable Divine Are Rabbi Simon on the subject, "Some Spring Thoughts." Several of the songs used in

this service have been sung in Jewish temples for centuries, and have a significance which makes them appropriate to this accasion. In his address Rabbi Simon likened the

spring of the year to childhood. All children are poets, he said, and called attention to the deep import seen by the first members of the human race in the forces of nature. When winter came they would become depressed at the death of her beauties, while spring they regarded as a happy season of resurrection. As the gardener carefully trains his vines and shrubs in the spring so should parents

exercise care and judgment in the rearing of their offspring.

OFF FOR CHICAGO MEETING

Delegation of Omaha Women Go to **Convention of International** Kindergarten Union.

Ten of the Omaha kindergarteners went to Chicago Tuesday evening to attend the annual meeting of the international Kindergarten union, which convenes today and continues through Friday. The sessions are to be held in the Fine Arts building and will be of more than usual interest to the followers of Froebel.

Mrs. A. B. Chittenden, the supervisor of the Omaha kindergartens, was at the head of the delegation, the other members being Mesdames Gluck and Drake, Misses Hungerford, Davis, Otis, Allen, Torrey, Hamilton and Bruner. Mrs. Chittenden, Miss Hungerford and Miss Torrey are the delegates from the local Froebel society.

underground service? Shall a tranchise be given to one company to construct and operate underground conduits at fixed max-imum rates per mile duct, or shall the city build a system of subway conduits and compel all electrical companies to place their wires within them at a fixed annual rental to be paid into the city treasury? The solution of this problem requires, first, a consideration of what is practicable; second, if practicable, what methods are available, third, which of the available methods is best for the city of Cmaha to adopt. Andrew Rosewater Enters Into Extended Discussion of Electrical

City Engineer Andrew Rosewater submitted his annual report to the city council Tuesday night. It is replete with interesting information and suggestions,

based upon wide experience in municipal OMAHA, Feb. 1, 1901.—To the Honorable Mayor and City Council, Gentlement, I have the honor to submit to you the ac-companying abstracts of work done by the engineering department during the year inding December 31, 1900. The extent and engineer paths work done

ending December 31, 1990. The extent and cost of public work done under the supervision of the department is submitted in detail in the accompanying tables. Summarized, it comprises work as follows: Total cost of contract work done under the supervision of the city comparements do the supervision of the city engineering de-partment during 1990;

⁴Paid for by the Union Pacific and R. & M. railroad companies. Cost estimated. A characteristic feature of paving work in the last year bas been the tendency to minimize the paved width between curbs resulting in not alone economizing in the cost of paving, but in the improved ap-pearance of narrow residence streets. Eight years ago I advised the reduction of space between curbs from forty to thirty feet on resident streets and submitted ordi-nances providing for such reduction on all such streets where pavement or repave-ment was contemplated, thus reducing the mileage cost of paving 25 per cent. Public sentiment has gradually developed a ten-dency to still narrower pavements, and, in my judgment, a large portion of future resident streets will be reduced to twenty-two feet between curbs. This will so reduce the cost that nearly every section of the city will have it within reach of secur-tions of the city. The questions most fre-quently asked size, can a wagon turn on two teams comfortably pass each other? The answer is that it is but little trouble to drawer is that it is but jittle trouble in further to all intersection for the purpose of turning, besides, the necessity for turn-ing is not of sufficiently frequent narre Pald for by the Union Pacific and B. & M. is whether this work shall be done by the city and a rental charged per duct mile sufficient to pay interest and maintenance or whether the electric light and other companies shall be required to construct conduits under direction of the city and subject to the right of the city to acquire possession at appraised value of such work in the future. The advantages would seem to me to be for the city to do this con-struction. Independent of the superior fa-cilities it would afford for utimate owner-ship or control of electric lighting plants to drive to an intersection for the purpose of turning; besides, the necessity for turn-ing is not of sufficiently frequent nature to justify a large extra outlay for that purpose. As to the facilities for more than two teams to pass at a time, the traffic on residence streets seldom calls for more than two teams to pass comfortably, and as in the case of turning, the infrequency of such occurrences does not instify in cliftes it would afford for utimate owner-ship or control of electric lighting plants in the future, it would enable the city to secure competition in lighting for public and private service, as less capital would be required to develop competition and no obstruction would exist to the establish-ment of competing plants. Another marked advantage of municipal construction lies in the seconomizing of f such occurrences does not justify 50 per cent increase of permanent outlay

Another marked advantage of municipal construction lies in the economizing of space with the least interference with sewers, water and gas pipes and other underground construction. By the use of separate or partitioned manholes in the system high and low tension wires can be placed in separate ducts of the same con-duit system, side by side, without inter-ference or injury. That this can be done with safety I refer to the accompanying letters from A. J. O'Reilly, supervisor of city lighting of the city of St. Lonis, and Mr. Edward B. Ellicott, city electrician of Chicago. Competition in Paving Materials. Competition in Paving Materials. The tendency of the last year to con-solidate interests has developed more than ever the necessity of measures for protec-tion against extortionate charges for pav-ing work. The only available remedy lies in affording the greatest facilities for com-petition in paving with all available classes of substantial materials, including different classes of the same material. This, for-tunately, our charter provides for and it depends upon the taxpayers in each dis-trict whether they avail themselves of it or not.

or not, The engineering department has been s called upon more than ever to furnish data and testimony upon contested taxes in the recurs. The basis of the greater portion of contests are mere technicalities as to the signatures of parties i rightfully owning the izanable frontage. The stat for the critical dot is the second to the priod prior to 1883. W. J. Connell and A. J. Poppleton, without exception, interpreted the charter as not the requiring a petition to authorize paving stat for special tax for the paving and the shall contain a waiver of all technicalities as a board of equalization shall determine as a board of equalization shall determine the stat.

iew was offered the company, and since the more compliant has been heard as to the impracticability of electric light service. The solution of this problem requires.

Services at Night.

At the First Methodist church last night an audience that filled every nook and corner gave the closest attention to Dr. Meyer for more than an hour. A number were compelled to stand throughout the service, but even with this discomfort an unbroken quiet prevailed.

'Holiness to God" was the keynote of Dr. Meyer's discourse. He said in substance that many people consider their religion as a thing apart-to be put on and off as they do their clothes. Too many business men live in two houses-a religious house on Sunday and a business house during the week. They seem almost saint-like on the Lord's day, but when you meet them at their stores or offices they tell you that "business is business"-that religion has nothing to do with it. "You may think," said Dr. Meyer, "that

when you worship the Lord on the Sabbath that you have done your duty, but your time is His and if you give Him but one day of the week you retain six-sevenths that belong to Him."

Dr. Meyer will preach in Kountze Memorial church at 4 o'clock this afternoon and Thursday afternoon. He will speak again in the First Methodist church this evening and will close his services in this city with a sermon in that church tomorrow evening.

"The Dairy Farm"-

Eleanor Merron's pretty pastoral play, or, as she terms it, her quaint domestic drama, opened a three days' engagement at the Boyd Tuesday night.

This is the second time local theatergoers have been given an opportunity of seeing this play the present season, it having been given its initial Omaha production early in December, at which time it was so well received that Manager Burgess requested a return engagement.

Plays of the cleaness and purity of theme as "The Dairy Farm" are always welcomed by Omaha play-goers, especially when presented by a company as evenly balanced and one of such true merit as that with which the piece is at present. entrusted. Besides being well acted the variations there may be and details may replay is splendidly staged, especial attention being paid to the little details that go to make up a perfect production. To stitched seams and includes the latest novthose who enjoy plays of this character of the best in its class and it is well worth spending an evening to see.

There will be two performances today, matinee and night, and the engagement will close with a single performance Thursday night.

dinance. Kind of Construction. The nature of construction of conduits for wires admits of various materials, among the best being vitrified clay sec-tions in single and multiple system. Independent of these the use of a part of the areaways under sidewalks for wire cables affords the most room and greatest convenience for distribution. It will, of course, be claimed that this space in a measure is the acquired property of ad-joining buildings-this is a mooted quos-tion and Mr. Elleott, city electrician of Chicago, informed me recently that there the clty maintains and asserts its right to the use of as much of the area space as is deemed desirable and necessary, and that this right is unquestioned. For extension of subways on oufer resi-dent, streets it will be, in my judgment, perfectly practicable to combine the con-struction of four and six-foot cement side-walks and even brick and stone walks, with clay conduit sections so as to reduce their aggregate cost 50 per cent and render the connection of house service wires without poles or street excavations. Drawings showing plans of such combination walks accompany this report. **Viaducts.** The last year has witnessed the compleas a board of equalization shall determine. Sewers. The important feature in sewer construc-tion during the last year has been the completion of the storm sewer in the northwest part of the city to such connect-ing points with the main creek as to safely insure that section of the city against future floods. The demands for sewerage in the Sad-dle Creek valley has necessitated the de-signing of some plan of sewage disposal for that section of the city, there being no outlet stream of sufficient size to warrant the discharge of raw sewage into it with-out some provision for the purification of the sewage. The application of the septic tank with intermittent fluration of the liquid effluent through either artificial ox-idizing filter beds or fixed areas of soil can readily be resorted to in this case at a comparatively small expense for the area provided for, and plans for such ap-plication will be submitted for your ap-proval at an early period. The repairs of the large brick main sewer along their flow line, so much needed and often referred to, have nearly all been successfully carried out by the use of Port-land cement concrete composed of Sher-man gravel and Portland cement mortar, or the metal slag from the smelting works and mortar. The only portion not yet fully repaired will be completed early this spring. Sidewalks.

Viaducts. The last year has witnessed the comple-tion of the first of a series of viaducts agreed upon between the city and the Union Pacific and Burlington Railway com-panies. This is the Sixteenth street steel viaduct. Its cost was about \$170,000 and was entirely paid for by these companies. It is 15445 feet in length and has a road-way 25.4 wide, with walks on each side 5 feet in width. The road carries a double track street railway. The bridge is de-signed with a copacity of 100 pounds per square foot of entire width and a road roller fifteen tons in weight. The next viaduct to be built and com-pleted the coming summer is under this agreement on Twenty-fourth street, from Hickory street south, a distance of ap-proximately 1.020 feet and of substantially the same width and construction. Its es-timated cost is \$120,000. General Office Work. Vinducts.

Any Old Frame-

Will not do for that picture of yours-You may not value it in its present state, but if brought to our framing department and correctly and artistically framed its value will be apparent to the most inexperienced-We make specialty of framing pictures in moulding and frames that will bring out every detail, every line and tone perfectly, giving you pleasure and satisfaction in one-For all this our prices are the lowest-perfect work at prices that are right-Bring that picture to be framed today.

A. HOSPE, Music and Art. 1513-1515 Douglas.

Sidewalks. Nearly four years ago I made an at-tempt to eliminate wooden sidewalks from the future construction in this city, but although the city council passed the requisite ordinance to make such a step possible, they finally yielded to the pres-sure of interested parties and the con-struction of such walks was resumed. It is my conviction that the numerous judg-ments and compromised claims against the city justify the discontinuance of the construction of new wooden sidewalks as well as crosswalks. For temporary pur-poses a cinder, gravel or macham walk is much cheaper and decidedly safer and more durable, and, whilst the charter authorized the issue of permits for wooden walks, there is no provision requiring a permit for such temporary walk to be issued. The only question to be determined by the law department is whether in the case of an ungraded street a tax can be en-forced for cinder walk construction under our present law.

our present law. Electrical Subways.

Electrical Subways. The question as to what step is advis-able to relieve the public from the nuisance and danger incident to overhead electric wires has been submitted to me on two occasions during the last year, but in view of other matters in hand I have not until recently had the opportunity to give it such consideration as its importance merits. Considered from any standpoint, there are certain inevitable conclusions that cannot be evaded. First, the construction of overhead wires
