Fifteen hundred prizes will be awarded in The Bec's dot counting contest. The names of the successful contestants will be announced in the Sunday paper instead of the Saturday paper, as was originally intended. The number of contestants was so great

that the clerks are unable to check up guerses and prepare the list of successful contestants in time for publication in the Saturday paper.

Guesses came from all parts of the United States. The business office was flooded with letters from people who had busted themselves in counting the little dots. The number of answers exceeded expectations. They were more numerous than the replies to the proverbial chain letter.

MANNING MAY STEP

Well Known Union Pacific Master Mechanic Likely to Resign.

MAKES A BRIEF VISIT TO OMAHA

Rumored Resignation Lacks Official Verification, but it is Generally Credited-Manning a Close Friend of McConnell.

More than the usual interest attached to the brief visit here Thursday afternoon of J. H. Manning, master mechanic of the Wyoming and Colorado division of the Union Pacific. It has been reported in Cheyenne, where Mr. Manning's headquarters are, that he has resigned his position. In this city the report has been extended so that it is now rumored that he is to accept a position with a supply house having headquarters in Chicago and San Francisco, he taking the superintendency of the San Francisco house.

train Thursday, returning from a business trip to Chicago. He spoke to friends at the depot and the remarks he made led them to believe that the rumor is true. His answer to one gave the impression that he is going to California-but it was not said whether for pleasure or to locate there. At the Union Pacific headquarters it has been denied that Mr. Manning has resigned and doubt is thrown on the story. His friends in the city, however, point to the remarks he made Thursday and to the fact that he was in very close sympathy with J.

OUT H. McConnell, former superintendent of mo-tive power and construction. Mr. Manning entered the service of the Union Pacific nearly thirty years ago as a machinist's helper in this city and his rise has been a steady one. He is highly regarded in the mechanical branch of the railroads.
