WOMAN WITH REVOLVER

Points It at a Boarder and Drives Him to Police Station.

THERE THE OFFICERS DISARM HER

Chief Declines to Entertain Her Complaint, but Files One on His Own Account Against the Incensed Female.

Mrs. Annie Kaveney, who conducts a boarding house for railroad men on South Third street, is under arrest at the city jail, charged with carrying a concealed weapon. The concealed weapon, a large 44-caliber Colt revolver, is locked up in Chief Albro's safe at police headquarters. Mrs. Kaveney accused one of her boarders, named Van Doran, last evening with speaking ill of her behind her back, and flourishing the gun in his face, she threatened to fill him full of holes if he did not retract. Van Doran stood pat and declined the invitation, but he reckoned without his cost. At the point of the revolver Mrs. Kaveney made him accompany her in a street car to the police station, where she wanted to file a complaint against him for disturbing the peace. The police declined to entertain the complaint and demanded that Mrs. Kaveney surrender the revolver which she held under a big cape. This she flatly refused to do and defied the officers to take it from her. Chief Albro and Detective Ed Smith accepted the def and after a sharp but short struggle, during which the chief pinioned the woman's arms behind her back, Officer Smith managed to wrench the gun from her grasp. She was locked up and booked for carrying concealed weapons. Mrs. Kaveney's husband some few years ago was committed to the insane department at St. Bernard's hospital.

Our Hosiery and Underwear has been selected with care and our prices are lower than elsewhere in the city. We are headquarters for Perfumery and Toilet Goods, including all the newest odors.

PREPARED TO PAVE STREETS. Contractor Wickham Gets Ready to Fulfill Last Fall's Plans.

Contractor Wickham is preparing to begin work by May 1 on streets the paving of which was contracted for last fall. The total paving contracts of last year which were not completed and which will have to be finished this summer amount to 93,291 square yards, as follows: Eighth street, from Broadway to north line Myer street, 1,500 square yards. Seventh street, from Broadway to Washington avenue, 2,500 square yards. Sixth street, from Broadway to Washington avenue, 2,500 square yards. Scott street, from Broadway to Washington avenue, 2,500 square yards. Stutsman street, from Broadway to Washington avenue, 2,500 square yards. Seventh avenue, from Main street to Sixth street, 2,500 square yards. North street, from Main street to West street, 2,500 square yards. Ninth avenue, from Broadway to Water works grounds, 8,116 square yards. Pierce street, from First street to Bluff street, 1,500 square yards. Bluff street, from Pierce street to north corner Ninth avenue, 1,500 square yards. Fourth street, from Broadway to North street, 1,500 square yards. Sixth street, from Main street to west corner Third street, 1,500 square yards. Willow avenue, from Main street to west corner Third street, 1,500 square yards. Broadway, from First street to east corner Frank street, 9,415 square yards. In addition to this work it is proposed to pave a number of other streets and streets proposed to be paved will come up for final action and determination at the meeting of the city council tonight, having been postponed from the session of Monday. While a few minor changes may be made in the resolution, it is not expected any important streets contained therein will be cut out. Some opposition is looked for from certain property owners in the Fourth ward who have expressed a preference for asphalt, but it is understood that the aldermen will decline in favor of brick. These streets are: Sixth and Seventh streets from Broadway to Fifth avenue, Eighth street from Broadway to Eighth avenue and First avenue from Pearl street to Eighth street. The petitions for asphalt so far filed with the city clerk do not represent a majority of the interested property owners whose holdings abut on these streets. Several of the property owners who attached their signatures to the petitions expressed their preference for homemade brick. A city official who has given the matter considerable attention in authority for the statement that the petitions on file demonstrate that the property owners as a rule are not anxious for asphalt, but that the real estate men and rental agents are the prime movers in the agitation against brick on the streets in the Fourth ward. It is understood the council has decided to order these streets paved with either Des Moines or Galesburg brick for top course, with the cement filler. Experience has shown that brick with the cement filler is the most durable paving possible and that it practically needs no repairing, at least for a long number of years. What can be done with brick and the cement filler has been demonstrated on North Main street, which was paved last year. While this was laid with homemade brick for both courses, the addition of the cement filler has, in the opinion of Mayor Jennings and other city officials, made it one of the best paved streets in the city. The city officials with few exceptions are unalterably opposed to asphalt, on the grounds of the expense the city would be put to in keeping it in repair. This expense cannot be taxed to the property owners and would have to be borne by the city. This, Mayor Jennings contends, the city is not in a financial condition to do. It has been contended by some of the

DELEGATES TO THE BIENNIAL. Women's Clubs of the State Send Lists of Delegates.

Mrs. Frank Spencer, who has been visiting friends here, returned to her cousin, Mrs. Edith Shives, who will pass the summer there.

MINING IN THE BLACK HILLS. (Continued from Second Page.)

Lead, on the Homestake belt. The company has acquired a large tract of ground, which is being unusually fine, outcrops of galena in the Eastern capitalists have purchased sufficient stock to buy the necessary machinery. The ground has a continuation of the Homestake ore lode. Antimony Mine Proves Rich. The antimony mine that is being developed by A. D. Arundel of Minneapolis is turning out to be very rich. The main ledge of ore has been traced several thousand feet by its outcrop and a number of pits and shafts have been sunk, showing the ledge to widen out with depth. The ore carries lead, silver and some gold. Experiments are being made at the present time on some sort of a process that will save all of the values. It is probable that a smelter will be erected at the mine. Custer business men are still working at the May mine, which was one of the richest prospects at the surface ever found in the Southern Black Hills. A second shaft is being sunk on the ledge across the gulch from the first discovery. The ore runs well in value. Shipment of specimen ore will be made this week from the Etta mine, east of Hill City, by F. P. Williams of that place. This ore is valuable for its lithia, which it contains to the amount of four to six per cent. It is shipped east for fertilizing purposes also. In the Etta mine, which was worked a number of years ago for its tin, there is a very strong ledge of this spot, some of the crystals being a foot or more in diameter and five to ten feet long. North Star of Omaha. The North Star Mining company of Omaha has received a new Prescott pump, which will be placed in the drift at the North Star mine. Two new ledges of ore have been encountered in this mine, which makes one of the finest properties in the southern Black Hills. The company is backed by a number of Omaha capitalists, who are going to sink the shaft to the 600-foot level, before erecting ore reduction works. Development work at the Newark and Maydowner mines, west of Custer, contin-
