With the rebellion practically at an end and the natives pacified, a thorough search of the Islands will be prosecuted soon, and the extent of their mineral recources demonstrated.

Dr. George F. Becker of the United States Geological Survey reports that pan mining for gold was one of the ancient industries of Luzon, and yellow metal was one of the chief products of the island. Dr. Becker says the more important known gold fields are three in number. The most northerly of them lies about Mount Data. in the country of the Igorrotes. The second and best known district is that of Camarines Norte, easily accessible by sea, and about 115 miles to the southeast of Manila. The only other hopeful region is the northeastern portion of Mindanao and

He who had handled much Igorrote gold commercially, informed me that no outsiders of any race were permitted to visit the quartz mines or even to prospect for quartz. The Igorrotes are not afraid to tackle solid rock, and I presume that their quartz mining, though rude, is tolerably effective, perhaps approaching Mexican

work. In the gold district of Camarines Nort there are numerous placer mines, and beach sands are also washed. Of this region Hernando Riquel wrote, in 1574 There are many mines of gold which have been seen by Spaniards, and the native work them as they work silver mines in New Spain. The Filipinos came to town early in the morning and lined up in the church which will hold 5,000 people. They marched the bible and also kissed the crucifix when the oath was taken. Emperor Does a Tarn with victories so long as the South African was Buckwheat Cakes. is costing Great Britain \$7,000,000 a week.

His importal majesty of Germany wants to eat the American buckwheat cake, the toothsome flapjack, the seductive Welsh rarebit and other dainties dear to the palates of a majority of the people of the United States. To the end of gratifying a gastronomic taste, quickened by an experience on board an American steamship. which he prolonged with the express pur pose of reveling in the wondrous delights of its grill room, the kaiser has sent his chief cook over to this country to take

There are those who have hinted, and more than hinted, that William II was beginning to show symptoms of an absolute and arbitrary disdain of the rights of men, and to hold himself as so far the people. To sell goods in continental above and beyond the sphere of ordinary mortals that direful consequences to his empire and his people were in store. No one who believes that the stomach is the point through which the best impulses of our common humanity may be best reached will be inclined to accept these innuendoes of a deteriorated mental and moral conception. The monarch who craves such democratic simples as homny pancakes may be fairly expected to hold a decent respect for the opinions and prerogatives of his fellow-men, and every opportunity should be accorded to imperial chef for the acquirement of knowledge of those secrets of cookery upon which the great republic of the west has

"Upon what meat doth this our Caesar feed that he is grown so great?" will not be the petulant query of the sturdy Teuton after his sovereign has had a diet indicated by his partiality for dishes set before him by the cooks of the American vessel and which have moved his better nature.
