For "Looking Up" Things

"Ridpath" stands an casy first among books of historical refer-ence. Its index is a wonderful affair. It enables you to turn to any historical event or person in a moment, and when you have found the matter in question you find also that the facts are set down in a straightforward way. You find that it gives you a clear cut idea of just what happened at that particular time and place to that particular person. It doesn't leave you with a dozen unanswered questions in your mind. It fully answers the inquiries that any reasonable person asks of it.
