## COMMERCIAL AND FINANCIAL

Wheat Advance Lost on Lower Cables and Crop Prospects.

CORN EASIER ON FAVORABLE WEATHER

Considerable Business in Oats, but Price Range is Narrow, Closing a Shade Lower-Weakness Prevatis in Provisions.

CHICAGO, June 28.—The advance made in wheat yesterday was more than lost today, lower cables and fine crop prospects being too much for the bulls, and September closed %27%c lower. September corn was unchanged, oats was a shade lower, while provisions closed unchanged to 5c lower.

Disappointing cables and excellent crop prospects were the features, which caused a weak opening in the wheat pit. Early in the seasion the selling was quite general, both for local and outside accounts. The buying, however, was confined mostly to profit-taking shorts, who bought freely on the decline, and prices railled somewhat. September opened be lower at 65%a0%c, but dropped to 66%c on commission house selling. On covering by shorts there was a slight raily and the close was \$42%c lower at 65%a0%c averanged with \$85,000 bushels last week and 2.35,2000 a year ago. Seaboard reported fifty-four boatloads taken for export and clearances of wheat and flour were equal to 28,000 bushels, against 415,900 bushels hast year. Minneapolis and Duluth reported 26 cars, against 2% cars last week and 19% cars a year ago. Local receipes were forty-two cars, none contract. Corn opened easier on favorable weather and in sympathy with wheat offerings were liberal in most all classes, but the demand was poor. Reports of poor crop in Kansas and Nebraska caused a firmer feeling to prevail. September sold between 4½ and 4½c, closing unchanged at 4½c. Argentine shipments were \$2,000 bushels average. Considerable business was done in the cats pit, but the prices ranged within a narrow limit. The opening was steady and the stead less continued throughout the entire seasion. The firmness was done in the cats pit, but the prices ranged within a narrow limit. The opening was steady and the stead less continued throughout the entire seasion. The firmness was based principally on the cash movement, which has been nearly 1,000,000 bushels for here during the last two days. September delivery ranged between 26%c and 26%a26%c, closing a shade lower at 25%g62%c. S CHICAGO, June 28.—The advance made in

PEORIA. June 28.—CORN—Steady; No. 3, 42½c.

OATS—Steady; No. 1, 544.665c; sample.

BUSINESS

General Condition of Country Not Responsible for New York Failures.

PROMISE OF AN ABUNDANT HARVEST

Iron and Coal Prices Well Maintained -Satisfactory Export of Footwear to Great Britain-Cotton Tends Higher.

NEW YORK, June 28 .- R. G. Dun & Co.'s Weekly Review of Trade tomorrow will

Weekly Review of Trade tomorrow will say:

It does not follow because bad banking methods have caused one of the smaller New York banks to close its doors, with attendant circumstances that create discussion in Wall street, that general business is in any way affected by or is at all responsible for the trouble. The country is undoubtedly prosperous, and with prospect of an abundant harvest to supply our own needs and increasing European deficiencies, the situation is viewed with confidence. A few more labor disturbances have arisen, but others have been settled, notably the dispute over the tin plate scale. Some disagreements in the coal regions at times assumed a threatening aspect, but the troubles have been local and do not affect the mining industry. Reports from the country speak of a continued active movement of merchandise with the jobbing trade and embracing nearly all lines.

The fiscal year closes with conditions in the iron and coal industry in marked contrast to the situation at the corresponding date in 1900. Quotations were then receding rapidly without stimulating activity, idleness was the rule at furnaces and mills and wage scales were under serious discussion, with employers and labor organizations far apart in their views. This year difficulty is experienced in stopping machinery long enough to make necessary repairs, prices are well maintained and steady, without unreasonable inflation, while a successful season makes it possible for many concerns to avoid controversy by voluntarily reducing hours or advancing wages, and evidences of serious disagreement are the exception. Construction proceeds at an unprecedented pace, so that structural material, builders' hardware and kindred goods find ready purchasers. Railway incidities are inadequate to handle expanding traffic and shops are crowdedwith orders for new freight cars and other equipment.

Footwear forwardings from Boston have averaged 100,000 cases weekly for two equipment.
Footwear forwardings from Boston have

Footwear forwardings from Boston have averaged 100,000 cases weekly for two months, raising the total for the half year to 2,358,521 cases, according to weekly records of the Shoe and Leather Reporter. The largest previous total for the corresponding month was in 1900 and fell 154,151 cases short of the current year. Exports to Great Britain are a most satisfactory factor in the present movement. Some eastern shops are so well supplied with contracts that deliveries cannot be promised before September. Local manufacturers are running on short time or closed for stock taking. Stocks in dealers' hands are light, which gives the market a strong tone.

for stock taking. Stocks in dealers' hands are light, which gives the market a strong tone.

Leather is active and firm, with hemiock sole in good demand. Upper leather is seiling freely, not equalling the activity in sole. Receipts of imported dry hides are light and prices well sustained, while slaughter hides at Chicago have made further advances and holders are inclined to wait for still better terms.

Wheat prospects are further improved throughout the entire producing region. More satisfactory to the producer than evidences of a banner yield is the failure of quotations to show commensurate decline, for there is good profit at the present prices. Foreign needs continue the sustaining influence. In four weeks Atlantic exports, flour included aggregate 13,669,000 bushels, against 10,280,076 last year and 8. 334,648 in 1892, while Pacific exports were stiff on and 2,445,749 two years ago.

Corn is supported by reports of injury and receipts are less than half last year's, but the export movement is equally unsatisfactory.

Wheels at textile mills are no longer generally idle. Improvement in all branches of this industry has come with a rush and manufacturers are making up some earlier losses. Gains are more conspicuous in the woolen goods division because depression had lasted longer and been more severe. As the raw material gradually sought a lower level, mills restricted purchases in anticipation of better terms, except where orders for goods were secured.

The clothing trade is now seaking man.

anticipation of better terms, except where orders for goods were secured.

The clothing trade is now seeking men's wear woolens and worsteds and buyers find stocks light. Values have not yet hardened, but there is little thought of lower prices either for goods or raw wool. In knit goods jobbers are taking stock, after which activity is expected. Last week's gains in cotton goods have been held, and there is more business than at any time this season. Prices are still unsatisfactory, especially in view of the further rise in raw material. Many reports of injury to growing cotton tend to advance prices in the face of heavy receipts on the old crop. Failures for the week number 204 in the United States, against 20 last jest year, and 23 in Canada, against 21 last year.

BRADSTREET'S FINANCIAL REVIEW.

Market Unfavorably Influenced by Unexpected Disturbing Infleunces.

NEW YORK, June 28.—Bradstreet's Financial Review tomorrow will say:
Disturbing factors of an entirely unexpected kind this week unfavorably influenced the market, which, however, has behaved exceedingly well. Money was considered likely to hold firm pending the heavy July I interest disbursements, but as gold shipments had apparently ceased, it was thought this week's bank statement might be more favorable than the last four Saturdays. Renewed banking troubles to many did not seem to occasion much disquiet either in Berlin or in London, though the latter market was somewhat heavy on the pessimistic utterance of the British prime minister about the Boer war and the fading hope of its early termination. Continued fair crop prospects, active business conditions and railroad earnings, which present increases even over the very large totals of a year ago, rendered our markets measurably insensible to anything adverse in the foreign financial situation, and Wall street was disposed to consider that when the July payments were completed and the summer investment demand asserted its influence there would be a fresh series of railroad and other deals, with developments concerning the large industrial and other corporations, which would keep up and widen the bullish speculation.

While no great activity was hoped for at the moment, the street was apparently disposed to regard the future of the market with confidence. The closing of the Seventh National bank on Thursday by the comptroller of the currency showed, however, that its position was worse than had been concluded, and call loan money rates rose to as high as 15 per cent, though most of the loans were at 6 per cent or a little above that figure. Large banking houses and institutions lent money freely, and there was no general calling of loans. The fact that public interest in the market is relatively small and that stocks are to a large extent accumulating in strong hands had its due effect and prices, though inclined to decline, did so in an orderly fashion and w NEW YORK, June 28.—Bradstreet's Financial Review tomorrow will say: ion and without indications of pressing liquidation.

Friday's market was in keeping with the conditions just referred to. The assignment of Messrs. H. Marquand & Co. was announced. As a considerable part of their Stock exchange commitments were on the short side of the market, considerable stock was bought in for them under the rule. This, however, failed to depress prices, ror did higher quotations for money, running up to 10 per cent on call, create any particular disturbance.

BRADSTREET'S REVIEW OF TRADE. Higher Temperatures and Distribution of Seasonable Goods.

NEW YORK, June 28.—Bradstreet's tomorrow will say:

Trade, crop and industrial developments this week have been largely favorable, temporarily firmer money, due to July interest disbursement preparations and slight financial troubles, due to improper business methods, not detracting from the generally satisfactory and confident feeling with which the half-year in business closes.

High temperatures have aided the distribution of seasonable goods at retail and stimulated reorder demands from while salers, although the volume of business has been limited by small stocks. The cotton goods situation has gained rather than lost in strength, but the volume of business has been limited by the fact that sellers are not disposed to commit themselves, largely in view of the unsettled outlook for raw material prices. There is also a better tone in woolen goods, and this is reflected in firmer quotations for the finer grades of raw material prices. There is also a better tone in woolen goods, and this is reflected in firmer quotations for the finer grades of raw material prices. There is also a better tone in woolen goods and this is reflected in firmer quotations for the finer grades of raw material prices. There is also a better tone in woolen goods. The continue of the maximum, again exceeding 100,000 cases from eastern points for the week, while the margin in favor of this year's shipments. NEW YORK, June 28.-Bradstreet's to-

NEW YORK, June 28.—COFFEE—Spot, quiet; No. 7 invoice, 6 ili-16c; mild, steady; Cordova, 84#1234c. A better feeling obtained in speculation today. The opening locally was steady, with prices unchanged to 5 points higher, following a slight rise in the European markets, smaller receipts in the crop country than expected and an improvement in spot demand. Buying was done on easier intervals during the day for the account of prominent interests, based on the belief that the present prices were unjustifiably low, with the market heavily overseid. Brazilian market news was bullish. The market at the close was quiet, with prices net unchanged to 5 points higher. Total sales were 17,500 bags, including: July, 5.10c; August, 5.20c; September, 5.30c; October, 5.35c; December, 5.55c; February, 5.65c; May, 5.50c.

has been selling so uneven the pass what they are worth, but it is safe to call the market lot to 25c lower for the week on 114 the common kinds.

The supply of cows was very light today, but packers continued their plan of pounding the market. The good suff was not so much lower today, out the undestrable bunches were very slow sale and low r. 224, The same as in the case of steers, the common kinds of cow stuff and the grasers, in particular, are selling very unevenly unless they were very choice. The same was true of stags and also of caives.

There were only a few stockers and feeders in the yards today, and the good kinds sold about steady. The common stuff, however, was lower. There seems to be almost no demand at all for the stock cows and heliers and prices have brose. BEEF STEERS.

counts. Call rates still rule at 3% per cent.
The following are the closing prious eathe New York Stock exchange:

NEW YORK, June 28.—The market today has shown a quiet demand throughout. The weather here is excessively hot and tells against spot business. All staple cloths continue firm. Ginghams are firm but quiet; print cloths unchanged in price, but demand indifferent; linens are indifferent, but prices continue firm.
