THE OMAHA DAILY BEE: FRIDAY, JULY 5, 1901.

Prosperity is Greatest Since the Opening Up of the Country.

GOLD OUTPUT INCREASED ONE-FOURTH

MINING IN THE BLACK HILLS

Mines Being Redeemed from Idleness by Cyanide Process-Tremain Mill to Be Installed at Gopher Mine.

DEADWOOD, S. D., June 30.-(Special.)-On every hand in the Black Hills there is of Hill City, and the same sort of a mill at apparent prosperity and activity. There is the Golden Silpper mine, east of that city. more genuine development work in progress The Elizabeth Mining company of Milnow than at any time in the history of the waukee is putting in a forty-stamp mill at installed and more men are employed than stone, is being repaired and made ready for getting a good name outside of its creek before fail. borders. There is more harmony existing among the mining men of the Hills than ing of unity between the southern and are attracting atlantion and capital is coming that way at a rapid rate.

Gold Output is Increased.

The output of gold from the Black Hills for the quarter ending with this month has been increased about one-fourth, this being due to a great extent to the working of the new cyanide plants throughout the country. Eight new plante are turning out gold bricks every month valued at \$75,000. The largest plants are those of the Homestake company, Spearfish company, Cleopatra company. Portland company, Wasp No. 2 company and the Golden Crown company. All of these plants, with the exception of the Homestake, will be enlarged this summer in capacity, giving an increase of at least ong-third of the present output. The Homestake company will increase its cyanide output by building a new plant at Central City, in which to treat the tailings from three stamp mills on that side of the hill.

The Spearfish company is putting in ten new cyanide tanks and the Cleopatra company will soon do likewise, thus increasing its capacity to 100 tons per day. The Homestake people are jubilant over the success of the 1,200-ton cyanide plant. Regular cleanups are being made, which net something like \$40,000 per month. That it is a success on the tailings of the mills is demonstrated by the preparations that are being made by the company to put up another plant with about 800 tons daily ca-The success of the Homestake Dacity. cyanide plant has set a pace for other propositions of this kind There is at present a great domand in the Black Hills for the large low grade propositions, especially by Colorado people. This demand is shown by the eagerness with which the ground north and south of the Homestake was picked up by Denver and frocks with many tucks are as much in Colorado Springs people. Were it not for the fact that the tailings, or rather the base ore in the Homestake ledge, could be treated by the cyanide process, there would not be much demand for ground on the belt.

Standby Mine is Redcemed.

row black velvet ribbon; but lawn, batiste and all the long list of white and colored At Rochford, in Pennington county, there is a mine that is about to become a large washable fabrics might be substituted or any one of the simple silks and wools. producer on the same lines as the Homestake.
