

CONDITION OF OMAHA'S TRADE

Volume of Business Rather Light Last Week Owing to Intense Heat.

RAPID ADVANCES IN LINED OIL

Unfavorable Crop Reports from Various Parts of the Country Caused Higher Prices on Some Lines of Canned Goods.

The volume of business transacted in the wholesale districts of this city was not particularly heavy last week. Jobbers were apparently more interested in weather reports and crop bulletins than in any immediate business that might be done.

Not only was last week rather quiet as regards the volume of business transacted, but it was also characterized by a number of unfavorable crop reports, but still the great majority of the commodities in this city are selling in exactly the same notches as they were a week ago.

Canned Goods Going Higher. The most interesting feature of the grocery market last week was the effect of the dry weather in having on the wheat and corn crops.

There has been no change in sugar during the week, practically all grades remaining the same.

Nothing startling in hardware. There is practically nothing new to be said of the situation in hardware.

COMMERCIAL AND FINANCIAL

Reports of Rain in Missouri Cause Prices of All Grains to Tumble.

WHEAT TRADING LIGHT SECOND SESSION

Exciting Opening in Corn Pits—Oats Steady, but Market Showed Weakness—Provisions Were Dull.

CHICAGO, July 13.—Reports of rain in Iowa and Missouri, indicating a break in the existing drought, caused a tumble in prices of all grains today. September wheat closed an even cent lower.

Higher cables and reports of the spreading of the hot dry weather into the spring wheat territory caused a strong opening in wheat. However, the advance was maintained but a few minutes when, upon reports of rain in the northwest, shorts became panic-stricken in their anxiety to sell and prices dropped accordingly.

There was a recovery and a confidence returned from predictions of continued hot weather for another thirty-six hours, but the market was again depressed.
