Immediate Business Quiet, as Merchauts Are Holding Back Their Orders.

PRICES FEEL THE EFFECTS OF HOT WEATHER

Although Crop Reports Have Been Unfavorable, Confidence in Future Business Still Remains-Cancel-Intion of Fall Orders Scarce.

Business men in all lines have had rather an anxious week in this section of the country. Press reports from nearly all parts of the country tributary to this mar-ket have told of the extreme heat and dry weather and the consequent damage to the corn crop. As Omaha wholesalers and manufacturers are very largely dependent apon the outcome of the corn crop, it is not to be wondered at that they have been a trifle disturbed by the general dry weather. It is to be noticed, however, that conditions improved as the week advanced. While there were no general rains in Ne-braska, still there were a great many local showers that have done an immense amount of good. In surrounding states considerable rain has fallen, so that on the whole the outlook is better than it was a week ago. According to the most was a week ago. According to the most authentic reports the damage done in Nebraska has been greatly exaggerated, as up to the present time the general crop is in excellent condition and able to withstand a long siege of hot wenther. Those who are best informed on the general situation are by no means discouraged, but, on the contrary, are as confident as ever that business in Omaha and surrounding territory will break all previous records this coming season.

business in Omaha and surrounding territory will break all previous records this coming season.

There is no disputing the fact, however, that trade at the present time is quiet, it is trade at the present time is quiet, it is trade at the present time is quiet, it is the tall bills the way they generally do at this time of year. Traveling men are making their usual rounds, but the general tendency seems to be for merchants to stand them off until the next trip, when more will be known about the corn crop. Neither are there many morehants arriving on the market, and, in fact, hast week was one of the quietest seen in some time in that respect. That merchants are not bady frightened, however, is shown by the fact that local jobbers have not received enough cancellations of orders to be worthy of notice. When retailers are actually frightened the cancellations come rolling in at a rate that can leave no doubt as to the conditions existing in the country. The whole situation at the present time is summed up by saying that merchants are simply waiting for developments.

During the present luli in immediate business local jobbers are taking advantage of the opportunity to rush out their advance orders. Fail stocks are now quite complete, so that the shipping is progressing in good shape.

Market conditions are very much the same orders. Fail stocks are now quite complete, so that the shipping is progressing in good shape.

Market conditions are very much the same as they were a week ago. Leaving a few market fluctuations on groceries, which were brought about by dry weather, out of consideration, it can safely be said that there has scarcely been an important change during the week. Prices, however, are firm on practically all classes of goods, with prospects for the future most encouraging.

Sugar a Trifle Lower.

Sugar a Trifle Lower.

Wholesale grocers report a very fair week's business, though, of course, trade is not exactly rushing. The market, with lew exceptions, is steady with last week, except where the dry weather has damased growing cropes and brought about higher prices. Sugar is one of the most notable exceptions. The market was more of less unsettled and finally dropped down five points. As to future movements, no one is attempting to make predictions.

The coffee market is the same as it was a week ago, with the exception of Arbuckle package coffee, which is ½c lower. A week ago the Lyons people cut their price ½c and now that Arbuckle has cut the two brands are once more on a parity.

In farinaceous goods oatmeal is quoted a little higher, and, as reports from all over the country show a shortage in the oat crop this year, there is no prospect of ower prices on the meal. Beans are also app 55% per bushel. It is claimed that the potato and bean markets are very closely connected, so that what affects one affects the other. The potato crop is said to be badly damaged by dry weather and as a result beans have advanced.

Canned goods are still in a very strong position owing to the drouth. Fruit has been dropping badly the past week or two and such lines as corn and tomatoes have seen more or less damaged. That early a dry and a strong the country show a scorn and tomatoes have been more or less damaged. That early and the country is also for special brands. Speiter, quiet at 31.82%.

Canned goods are still in a very strong position owing to the drouth. Fruit has been dropping badly the past week or two and such lines as corn and tomatoes have been more or less damaged. That early a dry and a dr result beans have advanced.

Canned goods are still in a very strong position owing to the drouth. Fruit has been dropping badly the past week or two and such lines as corn and tomatoes have been more or less damaged. That being the case the pack of these lines will probably be somewhat curtailed. Western packers of tomatoes are not quoting prices at all, and on corn they have advanced their prices 567½c per dozen.

Syrup continues to advance for the same reason that the lines mentioned above have been going up. The coddish market his also been affected, not by dry weather but by the extreme heat, which makes the curing of the fish a difficult operation. Prices are some higher than they were a week ago and stocks are reported light. Other staple lines of groceies remain about where they were a week ago.

Hardware Quiet.

The hardware market has been quiet the past week, both as regards price fluctuations and the volume of the past week, both as regards price fluctuations and the volume of the past week and the volume of the past week as a tew filling in orders are, of course. Coming in, but it is evident both from the past week as a lees and size, that merchants are not buying every far in advance of their actual requirements. That is the only feature of the hardware trade for last week as pices have not changed in the least. There has not contract, as no one is the effect the great strike of metal worke as will have on future values. That question, however, is only problematic, as no one is in a position to tell how long it will take to settle the differences between the work. The manual their employes.

The past of course, been a great deal of talk about the advance of the past week, as no one is a constituted to settle the differences between the work. The past of t The hardware market has been quiet the

Dry goods jobbers report trade a little quiet. Merchants are not arriving on the market in as large numbers as could reasonably be expected at this time of year, and they probably will not come very rapidly until Nebraska is given a seaking rain. Jobbers' stocks of fall goods are now quite complete and ready for the inspection of merchants, and the general opinion is that there will be such a grand rush of merchants to this market as has never been seen here, provided, of cours, that it rains. That is all that is needed to give local jobbers the best run of trade they have ever experienced. Even the way things are now they are locking for a good many buyers this coming week, as in many localities rain has fallen and restored confidence in future business to a nermal condition.

But while immediate business last week

while immediate business last week was quiet, jobbers were working their men overtime getting out the advance orders As previously mentioned, they are auxious to get those out of the way owing to the fact that they confidently expect an onermous trade a little later in the season and they want to be in shape to handle that with promptness and regularity.

The market has not changed much during the week, although buyers who are well informed consider American prints a d four-yard brown cottons as being under the market and consequently sales of that class of goods have been unusually large of lat.

No Change in Leather Goods.

Boot and shoe jobbers also report trade as being none too rushing. There has been no special feature to the trade, as all that is going on is the filling of a few sizing up orders, the same as usual in July, and also the shipping out of advance orders for fall. Local houses are getting a good start on their advance orders and hope to have the bulk of them out of the way in good senson. What has been said of the leather goods trade applies equally well to the rubber goods trade.

Fruits and Produce.

There has been a fairly good demand for fruits the past week. Lemons in particular have been in good request, but there has been no change in prices. California fruits are also selling in just about tesame notches they were a week ago. Raspberries and blackberries are still on the market, but they are arriving in smal quantities and are gradually advancing.

The most noticeable feature of the week was the higher prices on a number of vegetables, caused by dry weather farther south and the damage done to crops. Potatoes are now selling up to 90c per hushel, which is considerably higher than they were a week ago. The price at while the various lines are selling will be found in another column.

Commission men are still having a great deal of trouble with the termonal process. The price at while the various lines are selling will be found in another column.

Commission men are still having a great deal of trouble with the column.

CONDITION OF OMAHA'S TRADE poor that they will not sell for enough to pay the freight.

Poultry is quoted about the same as it was a week ago, with the exception of spring chickens, which are weak.

OMAHA WHOLESALE MARKET.

Condition of Trade and Quotations on Staple and Fancy Produce.

PIPE LINE CO.

Registrar and Transfer Agent. PURITAN TRUST COMPANY Boston

Holdings, 11,4064 acres in Beaumont, Sour Lake and Sulphur districts of the Texas and Louisiana oil fields.

Paying wells have been guaranteed to the Company on three of its properties.

The Heywood Oil Company, which has already brought in four gushers on its own lands, sent to Pres. Towne, June 14, a written offer to drill a hole on the Spindle-Top Heights property of the Export Oil & Pipe Line Co., guaranteeing to produce a gusher.

written offer to drill a hole on the Spindle-Top Heights property of the Export Oil & Pipe Line Co., guaranteeing to produce a gusher.

A well known Pennsylvania oil expert has offered to drill a weil on its 10th-acre tract in the W. Dyke survey in Orange county, to receive no pay unless he produces oil in paying quantities.

One of the most successful drillers in the Beaumont fields, who has already brought in three of the largest gushers in the clistrict, has made the same offer in reference to the Company's 150-acre tract on the J. S. Johnson survey in Jefferson county.

No stronger evidence could be adduced of the certain value of these properties than the above offers from practical oil men who are in the oil business and know the oil fields.

The EXPORT OIL & PIPE LINE CO. will be producing oil just as quickly as the actual work of drilling can be accomplished. It is now sinking a well on its Spindle-Top Heights property and is sure of a gusher. Every well sunk on that hill has proved a gusher, and the Export Co.'s property is in the center of the ring. The listh gusher, that of the Manhattan Oil Co., brought in July 12, is only 150 feet from the Export land; the Lucas is 300 feet south, the Beatty 500 feet southwest, the Heywood No. 2 520 feet west, the Heywood No. 3 800 feet southwest, the Hogs-Swayne 250 feet southeast.

The average flow of these gushers on Spindle-Top Heights is not less than 50,000 barrels daily. The Lucas well, flowing 70.500 barrels doily to the entire capitalization of the Export Oil Co., and the Company has ample room on Spindle-Top Heights for at least six gushers. Estimating them each at only 10,000 barrels flow, they would pay back the Company's capital more than five times over.

And this, without reckoning any of the company's hoidings outside of it

OF BEAUMONT.

Incorporated under the Laws of Texas.

CAPITAL - - \$2,000,000

As to the sale of this product, arrangements now pending will, when completed, give the Export Co. a cash market for enough of its oil to pay 30 per cent income on its capitalization.

CAPITAL - - S2,000,000

Divided into 2,000,000 Shares of the Par Value of \$1.00 Each—Fall Paid and Non-Assessable.

President - Hon. Charles A. Towns of New York City and Beaumont, Texas Directors.

HON. CHARLES A. TOWNE. STEPHEN M. SCOTT. Beaumont, Texas JOSEPH E. BROUSSARD. Beaumont, Texas JOSEPH E. BROUSSARD. Beaumont, Texas HANVEY J. HOPKINS Buffalo, N. Y. GORDON S. ORME New Orleans, La. JOHN P. WITHERS Beaumont, Texas JOHN P. WITHERS BEA

It is now a recognized fact that business is being done in Texas oil, that the production and sale of petroleum from the Texas fields is not a myth or a temporary sensation. Several companies are daily selling oil for fuel to a nundred different industries, from face and lumber mills to sugar refineries and power plants; one company alone shipped, during the week ending June 19th, 1st carnoans of \$500 gallons each; another has it tank cars now steadily in service, and is having more built; the use of fuel oil has been commenced on the southern railroads, and it will be only a short time before they are all bidding for the Texas product.

The Export Oil & Pipe Line Co. is a business men's company, organized on business principles to do a commercial business in the production and sale of oil, and will soon be in a position to do its share in meeting this constantly growing demand. Mr. W. T. Campbell, Second Vice President of the Citizens' National Bank of Beaumont, writes regarding the Spindle-Top tract:

'In my opinion you are as certain of a gasher as though a well was now drilled and spouting oil.'

With a sure product and a sure market there is no question of the Export Co.'s doing a successful business. It is now a recognized fact that business

For the purpose of developing the properties of the company a limited amount of capital stock is offered at

60c PER SHARE,

par value \$1.00, full paid and non-assessable.

REMEMBER, that when the well "comes in" the stock goes out—that is, off the market. The only time to secure it at any price is before oil is struck; and the only time to secure this stock at 60 cts. is immediately. ediately. Subscriptions should be forwarded either to the company at Beaumont, Texas, or to its Fiscal Agents as below, with checks or drafts payable to the order of WALTER G. HUDSON & CO.

Send for illustrated prospectus mailed promptly on request.
