NERVOUSNESS IN THE CORN MARKET

Volume of Trade Comparatively Small -Local Conditions Governing Sen-

CHICAGO, Aug. 6.—Weakness in corn and a weaker export weakened wheat today and September closed \$22% lower. Corn closed is down and oats ac depressed. Provisions at the close showed a decline of log

AMEN ONLY BEE: WEDNES closed is down and outs be depressed. Provisions at the close showed a decline of 10g 12½c to 20c.

While the Liverpool market showed some advance it was disappointing when compared to the buige in wheat here yesterday. In addition it was believed that the recent heavy movement to the other side would show a decrease when the scaports were heard from. These considerations in a restricted market had their natural effect at the beginning of business. September opening isayle under yesterday at 70%c to 70½c. On covering a small line of short wheat the price was run up to 70%c within five minutes of the opening. For some time thereafter the tone was weak, sympathy with corn and the heavy receipts being depressing factors. Selling was on an extremely moderate scale, but prices did not steady till September was quoted at 40%c. A sharp raily to 70%c followed reports of heavy export sales, but the absence of confirmation of these reports resulted in an equally sharp decline to 70c, and the close found the market weak. September ½2%c under yesterday at 109704c. Some attention was given tidings from the northwest, where it was said the weather had wrought some damage. It was claimed that in some Sections where twenty-five bushels per acre had been expected from eight to fitteen bushels only would be threshed. Exporters reported 25 carloads taken. Seaboard clearances in wheat and flour were equal to 50,000 bushels, while primary receipts were 90,000 bushels.

Nervousness caused a rather narrow fluttering of prices in the corn market, but while messages from the west were of the usual gloomy tenor the general feeling that all drouth dimages had been liberally discounted was the ruling factor in the market. The volume of trade was comparatively small, a condition squenting that national structure observable, but this was due to wheat chiefly. When wheat tarned easier the corn market took the cu 4c to 20c. While the Liverpool market showed some

Cotton Market.

NEW YORK, Aug. 6.—COTTON—The market started off weak in tone and feverish, with prices 8 to 12 points lower and for the rest of the session was well nigh demoralized, with values at no time up to the opening figures. Everything pointed to a lower market. The weekly government report stated that there had been a general improvement of cotton since the last report, that the plant in the drouth section of the southwest was standing the ordeal well and that cotton was being picked over the southern cition of Texas and marketed. The private crop reports received were the set of the treasury balances in the general tendency was to buy the fall for the market was rather slow and weak. Some of the better grades sold at lust about steady prices, but the commoner kinds sold generally a dime lower. The half-fat stuff in particular was hard to the disjonse of at any price, as packers did not seem to care for that class of cattle. There were practically no western range 72.

There were quite a few cows and helfers on sale today, about 35 cars being offered. The private crop reports received were that cott n was being picked over the southern ction of Texas and marketed. The private crop reports received were quite in keeping with the government statement and did much to dishearten the tired longs. A few feeble efforts were made from time to time to bring about a rally, but proved ineffectual, as buying came solely from shorts and was immediately followed by fresh pressure from both sides. The decline sent August off to 7.10c; October, 7.13c, and January, 7.24c. The market was finally barely steady, with prices net 16 to 18 points lower. Spot closed quiet and lower; middling guif, 84c; sales, 371 bales.
