with good weather for the remainder of the senson the pack will not exceed 25 per cent of what it was a year ago. The dried fruit market is, of course, af-fected in just about the same way as canned goods and prices are advancing more or less on nearly all lines. The out-look for the California peach and prune crop is not nearly as encouraging as it was thirty days ago and the output will in all probability not come up to earlier esti-mates by a wide margin. There will be a big demand from the east for California dried fruits this year, owing to the damage big demand from the east for California dried fruits this year, owing to the damage done in the east to the fruit crop, so that indications are very favorable for high prices throughout the coming season. Farinaceous goods have shown little or no change since last report, practically all lines being quoted just about the same. The coffee market is also unchanged and the same may be said of tea. The demand for sugar is considerably heavier thun it was a week ago, but prices are the same.

with good weather for the remainder of the

Watching the Strike Situation.

Hardware men are, of course, watching with a great deal of interest the progress of the strike against the great steel com-bination. As previously stated, unless a settlement is reached in the near fature settlement is reached in the near fature there will be a shortage of goods such as has not been experienced in the history of the trade. Before the strike was instituted mills were unable to keep up with their orders and there was very little stock on hand and now that the production has very nearly stopped entirely the surplus will not last long and a shortage in many of the staple lines is imminent. Prices for that reason are very firm all along the line and it is certain that any change in the near future will be in the direction of higher quotations. A big demand for hardware is looked for in all sections of the country this fall, which will, of course, make the shortage all the more pronounced, but whether prices reach a much higher level or not of course depends upon how soon the strike is settled and for that reason hard-ware men are watching the situaton ware men are watching the situaton closely.

Dry Goods Buyers Arriving.

Dry Goods Bayers Arriving. There were a good many arrivals re-forted last week at the different dry goods hebraska were represented and also a great many buyers came in from the far we have a second of the second of the

Leather Goods Selling Freely.

Boot and shoe jobbers are now landing a good many orders for fall and winter stock. The late buyers are placing their orders when the traveling men for local houses good many orders for fall and winter stock. The late buyers are placing their orders i when the traveling men for local houses call upon them and then, too, quite a few merchants are arriving on the market and i placing their orders here. Those who are buying now seem to be looking for a good trade. The work of shipping out advance orders is progressing ficely and it may be said that the bulk of them are now shipped. I Rubber goods are also beginning to move out quite freely and a number of the houses have added extra men to their shipping forces in order to handle the busi-ness.

Fruits and Produce.

There has been very little change since last report in the prices being quoted on fruits and vegetables. The market on prearly all lines is keeping up to the high prices that were made after the drouth kiled so many vegetables in this section of the country and indications are that there will not be much decline in the near fu-

Eggs are a little higher than they were a week ago, as the quotations below will show. Butter is also firm, but poultry is a little weak.
