REPORTS FOR CROP

> provement in Most Loenlittes.

LINCOLN, Aug. 27 .- (Special.) - James H. Spencer, observer temporarily in charge of the crop service, has issued the following JURY'S VERDICT IN GILLILAN CASE bulletin setting forth the condition of the crops throughout the state for the last

week:

The week has been warm, with light showers in most localities. The daily mean temperature has averaged 6 degrees above normal throughout the state. The daily maximum temperatures have ranged from 85 to 36 degrees.

The dry weather of the previous week continued, except in a few small areas, where an inch or more of water fell. Nearly all sections, however, received light showers during the week, and these have proved of some benefit to late corn and pastures, and where sufficiently heavy have placed the soil in condition for fall plowing. All sections are now in need of rain.

The warm weather of the last week has caused early corn to mature rapidly. Considerable of the early planted is being cut for fodder in a number of southern counties. Late corn continues to show some improvement in most localities.

Fall plowing is progressing rapidly in the southeastern section, in other localities the soil is generally too dry to plow, and this work is being retarded. Reports indicate that a large or an increased acreage of fall wheat will be sown. Haying is nearly completed in a number of northern counties and the crop is good.

Southeastern Section.

Southeastern Section.

The week has been a favorable one, although rain is now needed. Late corn continues to improve in condition. The soil in a majority of counties has been sufficiently moist to plow for fall wheat, and this work has progressed rapidly and in parts of the section is about completed. A report from Otoe county states that the late rains have been beneficial to peaches and that this fruit will be quite plentiful. Pastures have also improved somewhat.

Fairly heavy showers have occurred in most of the eastern and central portions of the section and late corn and pastures continue to show slight imprevenent. Fall plowing has made slow progress, owing to the dry condition of the soil. The week has been especially favorable for having.

Southwestern Section. Conditions have improved during the week, good showers having fallen in most of the central and eastern countles, while the western part of the section had heavy rains during the previous week. The ground is in fairly good condition to plow and this work is now in progress.

Western and Northwestern Sections. The weather has been very favorable for having and fine progress has been made in securing the crop, which is excellent.

at Hastings.

HASTINGS, Neb., Aug. 27 .- (Special Telegram.)-The second day at Camp Lawton. G. A. R., shows that a regular old-time reunion is in progress and the camp has now assumed the appearance of an old-time soldiers' gathering. Last night over 4,000 people slept on the reunion grounds and that number will be doubled tonight. At 2 o'clock the department officials and the citizens' committee appeared upon the platturning the camp over to the department was gone through with.

He formally turned the camp over to Commander Steele, who, in a few well chosen words, accepted the camp and expressed his satisfaction and that of the department for the competent manner in which they found the camp. While regretting the inability of the local committee he could readily understand that in a season of drouth it would be impossible to furnish the amount of hay named in the contract. He also suggested that the hay would be of more benefit upon the farms than upon the

reunion grounds. Upon the completion of this ceremony and the acceptance of the camp, Mayor Shockey delivered an address of welcome to the cld soldiers and others who have henored the city with their presence upon this occasion. He tendered the old veterans the freedom of the city and stated that he had taken the strings off of the old soldiers and put them up on the police.

CANCER

Sufferers from this horrible malady nearly always inherit it - not necessarily from the parents, but may be from some remote ancestor, for Cancer often runs through several generations. This deadly poison may lay dormant in the blood for years, or until you reach middle life, then he first little sore or ulcer makes its appearance -or a swollen gland in the breast, or some other part of the body,

gives the first warning. To cure Cancer thoroughly and permanently all the poisonous virus must be of it driven out. This S. S. S. does, and is the only medicine that can reach deepseated, obstinate blood troubles like this When all the poison has been forced out of the system the Cancer heals, and the

disease never returns. Cancer begins often in a small way, as the

Cancer begins often in a small way, as the following letter from Mrs. Shirer shows:

A small pimple came on my jaw about an inch below the ear on the left side of my face. It gave me no pain or inconveneince, and I should have forgotten about it had it not begun to is dame and itch; it would bleed a little, 4°-2 scab over, but would not heal. This continued for some time, when my jaw began to swell, becoming very painful. The Cancer beand it was
