Fea Pictures of the Irishman on His Native Heath.

HOMES THAT ARE MARVELS OF NEATNESS

Etchings of the Mud Cabin and the More Modern Stone Dwelling—Typical Evening in the Emerald Isle.

Nowhere in the world is the Irishman seen to better advantage than by his own people. He is the most interesting of hosts, and his hospitality is only equaled by the delightful manner in which he makes the visitor feel that he is honored by his presence.

It is needless to refuse the entertainment for the ready tongue of the native will overrule a whole array of excuses. The "tany" soon materializes and is served in stone mugs or tin "porringers."

Perchance we stray on a mud cabin similar to the accompanying illustration. Its substantial construction is immediately noticeable. In nine cases out of ten it is an uninviting place. The two "family" goats have eaten most of the "quicks" in the hedges enclosing the cottage.

On the whitehorn bushes, near the road, flutter several ragged articles of personal attire, and a "tub" tilted against the as-

dull grey of the heavy boulders. The flourishing Virginia creeper is making an effort to cast shadows through the glistening windows into the "bist room in th' house;" a row of ferns are just beginning to give their blood-red blossoms a glimpse of the life-giving sunshine.

To complete the study of the Irish cottager, however, we must have a glimpse of his kitchen, the one room that is dear to his heart than the castles of the landlords. It does not always follow that a rude exterior denotes an uncleanly interior. Far from it, indeed. Some of the neatest

kitchens in Ireland are enclosed in crumbling mud walls and weed-covered thatch. A representative kitchen is presented above. We first observe that the pig, of common story, is not allotted the "bist corner."

SOCIALISTIC CULT IN OMAHA

Uneven Expansion of the Society and Its Present Extent

DEBS' NOTION HAS MOST FOLLOWERS

So-Called American Idea Gains Favor Over the European Branch of the Order—Political in Its Aspects.

The growth of socialism in the city of Omaha is one of those things which baffles the closest student of the phenomena of politics, for it is of such an uneven nature, at times seeming to be greatly accelerated and then dropping off in a way which leaves one in doubt as to whether the idea has had any permanent growth.

According to age, the social labor party must be reckoned as the original socialist propaganda in Omaha and the "regular" party. This society at present consists of one section, having not more than eighteen active members. It owes allegiance to the central body, which has its headquarters in New York City, where it publishes a daily paper, and from whence come orders to the faithful all over the country.

The international social labor party is looked upon in some quarters as the successor of the international workmen's association, which existed in the United States until about 1890, but was strongest about 1885 and 1886, the time of the Haymarket riots in Chicago, which resulted in the execution of a number of persons who were members of that society.

In Omaha none of the socialists are present from America, and upon their return an active propaganda was started. Among the old members of the international workmen's association it found ready growth, and the socialist labor party in Europe increased their ranks. It was noted as a peculiar circumstance that while the most of the immigrants professing to be anarchists have come from the south of Europe, the larger number of the members of the social labor party in Omaha have come from the north of Europe, Denmark and Germany sending the greater number of them.

is his championship of the modern trust. He claims that these combinations are good things, because they show the people how saving can be effected in all branches of trade and manufacture by co-operation, giving them an opportunity to see what might be saved in the way of labor by the complete co-operation which they say, would result from government ownership of all of the different lines of trade.

The other socialist party is essentially an American growth. Its members have been gradually passed through, easy gradations from the greenback party to the social democratic party established a few years ago by Eugene V. Debs and now, by the operation of the laws of several states which do not permit them to use part of a name of another party, have dropped the word "democratic" and are known as "socialists."

It has in Omaha several sections, the strongest being that one which holds weekly meetings in Washington hall. Its total membership is now about 100, the total number having joined in the last month and the entire membership having been secured since the middle-of-the-road populists of Douglas county decided that the populist party had been killed by fusion with the democrats.

It is this party which is making the open propaganda in Omaha at the present time and which will hold a state convention in this city September 21. Through the state it has received considerable accessions from radical populist partisans who are through with fusion, but its membership is problematic, as the members themselves claim that their voting strength is far below the number enrolled in the sections.

Not Active in Politics. The social labor party does not actively engage in politics in the state of Nebraska and does not expect immediate adoption of its principles. On the other hand, the "socialists" claim that the country is on the eve of a social revolution and look forward to the adoption of socialistic ideas by the government within a few years. One of the peculiarities of the socialist

PAT'S COSY MUD CABIN.

tree to dry is proof positive that "th' woffe has done with washin'" for another week. A wreath of smoke comes through the open doorway, seeming to mock the usefulness of the clay-daubed chimney. A hungry-looking cur sits on his tail in the sunshine and when not barking snappishly finds amusement in biting viciously at the tormenting flies.

Altogether the view is far from reassuring and we quicken our footsteps in order to examine the more modern stone dwelling of the peasant in slightly better circumstances than his neighbor of the mud cabin. There is an air of tidiness about this habitation totally lacking in the other. The cottage nestles snugly behind the neatly trimmed hedgerow. The rocky hill, rising so abruptly from the green fields, adds to the color of the ivy, feeling its way over the roof and casting an evergreen outline on the

called "th' kaly." If we tarry long enough we will see the pipes laid down, one by one, on the sides of chairs and "creep" stools, and the seats drawn closer to the "ould fella" with his back to the crane post and his feet in the ashes, as he tells the wonderful stories of men with one thousand lives, and fables that come through "kayholes," and giants of supernatural strength, and other things.

The fire burns low, the candle flickers in its own grass, and the listeners notice them not. Finally the "ould fella" shrugs his shoulders and says: "That's more'n enough for th' night, boys." Chairs and stools are pushed back, the candle snuffed, just as it begins to mark the table, a match struck while the "kaleys" find the door, and then, when the few live coals have been "raked" in the ashes, the last good-night is said. together until thoroughly mixed; then turn into a saucepan; set over boiling water and stir until the eggs are thick and creamy, season with pepper and salt and pour over hot buttered toast; garnish with a few sprigs of parsley and serve while hot. Egg Cutlets—Boil half a dozen eggs for at least twenty minutes; shell and cut them into longwise slices; when perfectly cold dip each slice into beaten egg seasoned with salt and pepper; then cover completely with breadcrumbs in which has been mixed a little minced parsley. Fry these cutlets in hot fat, sufficient to float them; arrange on a hot dish with slices of grilled or pan-fried tomatoes and serve with bechamel sauce. Fricassee Eggs—Hard boil six eggs. Put two level teaspoons of butter in a saucepan; when melted add two of flour and stir until smooth; add a cup of gravy or stock; season with salt and pepper to taste; add two minced mushrooms and a sprig of parsley, minced; let the mushrooms cook for five minutes in the sauce if they are canned; if fresh cook them in the butter before the four goes in. When the sauce is made slice the hard boiled eggs and add them to the sauce. Let the sauce boil up once and serve. Eggs with Stewed Celery—Stew two cups of celery, cut into small pieces; drain and with a cup of the water in which it was cooked, two level tablespoons of butter and two of flour, make a white sauce; season to taste with salt and pepper; add the celery and keep hot over boiling water, while you peach six or eight eggs to a "film" in water kept just below the "boil." Add half a teaspoon of salt and a tablespoon of vinegar to the water; spread the stewed celery on a hot dish; lift out the eggs carefully; drain and place on the celery "mattress"; garnish the dish with pointed bits of toast and parsley. Eggs with Red Herring—Beat four eggs; add a pinch of cayenne and a teaspoon of minced parsley, and a green onion minced
