You get pulled in out of the wet in the long run. Every legitimate business must sell its goods at a fair living profit and any diversion from this established fact is disastrous. plain facts are that the advertised low prices on these goods are baits to get your trade and these baits to get your trade and these losses will be made up by a heavy overcharge on the other goods you buy. Our aim is to do a legitimate business with the lowest range of profits possible and by giving us your trade you will have more money at the end of the year than you would if you are taken in by the shrewd tactics of these cut price artists who are after your money only.
